ROCK SPRINGS-RADIO: ILS glide slope has light to moderate roughness between OM and LF rng.
ROCK SPRINGS ARPT: Caution - first 500' NW end NW/SE rnwy clsd - marked.
SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.
TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip on fld. Use extreme caution.
PUERTO RICO: SAN JUAN-ISLA GRANDE ARPT: First 500' W end rnwy 9R-27 unusable. Daylgt operns proceed with caution-ngt operns observe threshold lgts. Use outside taxiway in front of large hangar near entrance. Equip. on hangar ramp. Cranes 50' to 60' high operg intermittently approx 1000' off E end rnwy 9R-27L. From 1600-2100Z daily three-hour min ground delay on mil acft due priority airlift.
SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from twr-caution. (6-7)

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods: (a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator(FPDI) centered, the omnibearing selector should read 0° with the to-from indication being "From"; or the omnibearing selector should read 180° with the to-from indication reading "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an indivisual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of +4° be indicated through use of the ground check or ± 6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of this date check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 112.0 mc)
*Chicago (Midway 111.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)
**Wichita (Municipal 111.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

OKLAHOMA CITY AIR SHOW TRAFFIC AREA

The National Aircraft Show will be in progress at Will Rogers Municipal Airport, Oklahoma City, Oklahoma, from 1100CST to 1700CST on September 1, 2, and 3. On August 30 and 31, between 1100CST and 1700CST, air show rehearsal maneuvers will be conducted in this area.

The above will involve extensive high speed and acrobatic military activity operating in accordance with VFR in the air show corridor, (See below), from the surface to 45,000' MSL. Additionally, a stage and orbit area, (See below), will be occupied by high speed military aircraft operating from the surface up to and including 4,000' MSL.

It is suggested that all civil aircraft and military aircraft not participating in the air show avoid the air show corridor.

Tinker AFB will be closed to all aircraft other than aircraft participating in the air show from 1200 CST August 29 to 1200 CST September 4.

Will Rogers Field, Oklahoma City, Oklahoma, will be closed to all itinerant aircraft, except Scheduled Airlines, between the hours of 1100 CST to 1700 CST on August 30, 31, September 1, 2, and 3, 1956 while the National Aircraft Show is in progress.

We strongly urge that all those planning to attend the National Aircraft Show plan their departure time to arrive in Oklahoma City prior to 1100 CST.

During the Air Show hours, military aircraft participating in the show will be orbiting within the staging and orbiting area (See below). We urge acute surveillance be maintained at all times while in this area.

All aircraft landing in Oklahoma City prior to Air Show hours that do not have prior reservations at Will Rogers Field should land at Tulakes Airport and/or Cimmarron Field, Oklahoma City. Transportation from these airports to Will Rogers Field will be provided, as well as aircraft service.

Staging and Orbiting Area:

35-37N 97-19W, 35-32N 96-40W, 35-06N 96-22W, 34-00N 96-05W, 33-47N 97-00W, 33-55N 98-30W, 34-14N 99-20W, 35-12N 99-20W, 35-19N 97-42W, 35-37N 97-42W, 35-37N 97-19W.

Air Show Corridor:

35-37N 97-19W, 35-21N 97-19W, 35-21N 97-31W, 34-57N 97-31W, 34-57N 97-42W, 35-37N 97-42W, 35-37N 97-19W.

(7 Aug 1956)

Revisions to Instrument Approach Procedures

INSTRUMENT LANDING SYSTEM PROCEDURES

If an ILS instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations). ✓

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-.. --- -... .--. (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON INSACS COMMUNICATIONS CHANNELS: If excessive interference is noted on INSACS VHF or UHF simplex frequencies, pilots should request the INSACS to reply on the VOR voice channel. This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, regardless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights operating at an altitude of at least 1000 feet on top, either at pilot's request or because of an ATC clearance, shall conform to the following position reporting procedures:

1. Flights along airways, regardless of actual altitude, shall report only over those fixes that are compulsory reporting for flights at all altitudes unless additional reports are required by ATC.

2. Flights operating on a direct route, regardless of actual altitude, shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and also over each compulsory reporting point along the route for flights operating at all altitudes unless additional reports are required by ATC.

Pilots filing direct route flight plans requesting an altitude of at least 1000 feet on top should designate the route of flight by appropriate fixes approximately 200 miles apart over which they plan to report.

✓ RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

(Part 608 - Restricted Areas - Amendment 177)
(Immediately)

(1) The restricted area alteration to Section 608.49, appearing in paragraph 6 of Amendment 175, published in the Federal Register on July 26, 1956 (21 F.R. 5619) is hereby corrected to read: "Scenic, South Dakota Area", in lieu of "Scenic, North Dakota Area".

(Part 608 - Restricted Areas - Amendment 178)
(September 20, 1956)

(1) In Section 608.41, the Cherry Point, N. C. area No. 2 (R-125), amended on July 7, 1956 in 21 F.R. 5049, is redesignated as follows: "Designation by Geographical Coordinates: Beginning at lat 35-46-30, long. 76-47-00; thence southwesterly along the E edge of Amber Civil Arwy #9 to lat 34-21-40, long 77-41-30; thence clockwise along the arc of a circle with a radius of 60 s miles centered at lat 34-54-30, long. 76-53-00; to lat 34-26-50, long. 77-46-35; thence N to lat 35-20-30, long. 77-40-50; thence NE to lat 35-40-00, long. 77-23-40; thence clockwise along the arc of a circle with a radius of 60 s miles centered at lat 34-54-30, long 76-53-00; to the point of beginning. Designated Altitudes: 6000 ft MSL to unlimited. Time of Designation: Sunset to sunrise daily. Controlling Agency: MCAS, Cherry Point, N. C.

✓ CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective September 20, 1956, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Amber civil airway No. 9 (Charleston, S. C. to Norfolk, Va), is amended to read: "From the Charleston, S. C., rdo rng stn via the Myrtle Beach, S. C., nondirectional rdo bcn; Wilmington, N. C., nondirectional rdo bcn; New Bern, N. C., nondirectional rdo bcn; the intsxn of a line bearing 11° T from the New Bern, N. C., nondirectional rdo bcn and the SW course of the Norfolk, Va., rdo rng to the Norfolk, Va. rdo rng stn. The portion of this arwy above 5500' above mean sea level within 60 miles of a point at Lat. 34° 54' 30", Long. 76° 53' 00" is excluded daily from sunset to sunrise."

(2) Red civil airway No. 10 (Amarillo, Tex. to Charleston, S. C.), is amended between Birmingham, Ala. and Atlanta, Ga., by deleting the portion which reads: "the intsxn of the E course of the Birmingham, Ala., rdo rng and the W course of the Campbellton. Ga., rdo rng; Campbellton, Ga., rdo rng stn;" and by substituting the following in lieu thereof: "the intsxn of the E course of the Birmingham, Ala., rdo rng and a line bearing 267° T from the Atlanta, Ga., rdo rng;"

(3) Red civil airway No. 67 (Crestview, Fla. to Atlanta, Ga.), is amended to read: "From the Crestview, Fla., rdo rng stn via the Dothan, Ala., rdo rng stn; the intsxn of the NW course of the Dothan, Ala., rdo rng and the SW course of the Columbus, Ga., rdo rng; Columbus, Ga., rdo rng stn; the intsxn of the NE course of the Columbus, Ga., rdo rng and a line bearing 182°T from the Marietta, Ga. (Lost Mountain) nondirectional rdo bcn to the intsxn of the line bearing 182°T from the Marietta, Ga. (Lost Mountain) nondirectional bcn and the SW course of the Atlanta, Ga., rdo rng, excluding the portions above 19,000' MSL which lie within Tyndall restricted area (R-33c) between sunset and sunrise, and excluding the portion which overlaps Fort Benning restricted area (R-129)."

(4) VOR civil airway No. 1 (Charleston, S. C. to New York, N. Y.), is amended to read: "From the Charleston, S. C., omnirng stn via the Myrtle Beach, S. C. omnirng stn; Wilmington, N. C. omnirng stn; point of intsxn of the Wilmington omnirng 005°T and the New Bern, N. C. 297°T radials; Cofield, N. C. omnirng stn; intsxn of the Cofield omnirng 058°T radial and the Norfolk ILS lclzr SW course; Norfolk, Va., ILS lclzr; to the point of intsxn of the Norfolk, VA. ILS lclzr NE course and the Norfolk, Va. VAR N course. From the point of intsxn of the Norfolk, Va. VAR N course and the Norfolk, Va. Navy rdo rng E course via the intsxn of the Norfolk VAR N course and the Salisbury omnirng 206°T radial; Salisbury, Md. omnirng stn; intsxn of the Salisbury omnirng 038°T and the Coyle omnirng 203°T radials, Coyle, N. J. omnirng stn; to the Idlewild, N. Y. omnirng stn. Those portions of this arwy between the Coyle, N. J. omnirng stn and the point of intsxn of the Colts Neck, N. J. omnirng 073°T and the Coyle, N. J. omnirng 031°T radials lying more than 3 miles either side of the centerline, and those portions in conflict with the Patuxent restricted area (R-43) and the Warren Grove restricted area (R-26), are excluded."

(5) VOR civil airway No. 12 (Santa Barbara, Calif. to Philadelphia, Pa.), is amended by changing all after the West Chester, Pa. omnirng stn to read: "West Chester, Pa. omnirng stn; to the point of intsxn of the West Chester omnirng direct radial to the Coyle, N. J. omnirng stn and the Woodstown, N. J. omnirng 045°T radial."

(6) VOR civil airway No. 13 (Houston, Tex. to Duluth, Minn), is amended by changing the portion which reads: "Shreveport, La. omnirng stn;" to read: "Shreveport, La. omnirng stn, including an E alternate;"

(7) VOR civil airway No. 16 (Los Angeles, Calif. to Boston, Mass.), is amended by changing all between the Big Spring, Tex. omnirng stn and the Texarkana, Ark. omnirng stn to read: ""Big Spring, Tex. omnirng stn; Abilene, Tex. omnirng stn, including a S alternate; Mineral Wells, Tex. omnirng stn, including a N alternate and also a S alternate via the intsxn of the Abilene omnirng 096°T and the Mineral Wells omnirng 247° T radials; Dallas, Tex. omnirng stn, including a S alternate; Sulphur Springs, Tex. omnirng stn, including a N alternate from the Mineral Wells omnirng stn to the Sulphur Springs omnirng stn via the intsxn of the Mineral Wells omnirng 066°T and the Sulphur Springs omnirng 272°T radials; Texarkana, Ark. omnirng stn, including a N alternate;"

(8) VOR civil airway No. 17 (Laredo, Tex. to Goodland, Kans.), is amended by changing all after the Waco, Tex. omnirng stn to read: "Waco, Tex. omnirng stn, including a E alternate; intsxn of the Waco omnirng 352°T and the Fort Worth omnirng 159°T radials; Fort Worth, Tex. omnirng stn; Oklahoma City, Okla. omnirng stn; Gage, Okla. omnirng stn; Garden City, Kans. omnirng stn; to the Goodland omnirng stn, including a W alternate."

(9) VOR civil airway No. 19 (El Paso, Tex. to Great Falls, Mont.), is amended by changing the portion which reads: "Crazy Woman, Wyo. omnirng stn, including an E alternate," to read: "Crazy Woman, Wyo. omnirng stn, including an E alternate via the intsxn of the Casper, Wyo. 007°T and the Crazy Woman omnirng 146°T radials;"

(10) VOR civil airway No. 20 (laredo, Tex. to Richmond, Va.), is amended by changing the portion which reads: "New Orleans, La. omnirng stn," to read: "New Orleans, La. omnirng stn, including a S alternate;"

(11) VOR civil airway No. 26 (Cherokee, Wyo. to Cleveland, Ohio), is amended by changing the portion which reads: "White Cloud, Mich. omnirng stn;" to read: "White Cloud, Mich. omnirng, including a N alternate;"

(12) VOR civil airway No. 27 (Los Angeles, Calif. to Seattle, Wash.), is amended by changing the portion which reads: "Salinas, Calif. omnirng stn;" to read: "Salinas, Calif.

omnirng stn, including a W alternate from the Paso Robles omnirng stn to the Salinas omnirng stn via the intsxn of the Paso Robles omnirng 314°T and the Salinas omnirng 149°T radials, excluding the portion which conflicts with the Fort Ord restricted area (R-284) and also excluding the portion which conflicts with the Camp Roberts restricted area (R-415) during the hours of daylight;"

(13) VOR civil airway No. 35 (Miami, Fla., to Syracuse, N.Y.), is amended by changing the portion which reads: "From the Miami, Fla. omnirng stn via the intsxn of the Miami omnirng 274°T and the Fort Myers omnirng 133°T radials;" to read: "From the Miami, Fla. omnirng stn via the intsxn of the Miami omnirng 276°T and the Fort Myers omnirng 142°T radials;"

(14) VOR civil airway No. 38 (Iowa City, Iowa, to Elkins, W. Va.,), is amended by changing the portion which reads: "From the Iowa City, Iowa omnirng stn via the intsxn of the Iowa City omnirng 092°T and the Joliet omnirng 265°T radials;" to read: "From the Iowa City, Iowa omnirng stn via the intsxn of the Iowa City omnirng 093°T and the Joliet omnirng 265°T radials;"

(15) VOR civil airway No. 54 (Quitman, Tex. to Charlotte, N.C.), caption changed and is amended by changing the portion which reads: "From the Texarkana, Ark. omnirng stn via the Little Rock, Ark. omnirng stn, including a N alternate via the intsxn of the Texarkana omnirng 031°T and the Little Rock omnirng 255°T radials;" to read: "From the Quitman, Tex. omnirng stn via the Texarkana, Ark. omnirng stn; Little Rock, Ark. omnirng stn, including a N alternate via the intsxn of the Texarkana omnirng 031°T and the Little Rock omnirng 255° T radials;"

(16) VOR civil airway No. 61 (Fort Worth, Tex. to Lawton, Okla), is amended to read: "From the Fort Worth, Tex. omnirng stn via the intsxn of the Fort Worth omnirng 315°T and the Wichita Falls omnirng 139° T radials; Wichita Falls, Tex. omnirng stn, to the Lawton, Okla. omnirng stn."

(17) VOR civil airway No. 63 (Waco, Tex. to Milwaukee, Wis.), caption changed and is amended by adding a new first portion to read: "From the Waco, Tex. omnirng stn via the intsxn of the Waco omnirng 036°T and the Sulphur Springs omnirng 234°T radials; to the Sulphur Springs, Tex. omnirng stn."

(18) VOR civil airway No. 66 (San Diego, Calif. to Sulphur Springs, Tex.), caption changed and is amended by changing all after the Culberson, Tex. omnirng stn to read: "Culberson, Tex. omnirng stn; intsxn of the Culberson omnirng 090°T and the Midland omnirng 234°T radials; Midland, Tex. omnirng stn; Big Spring, Tex. omnirng stn; Abilene, Tex. omnirng stn; intsxn of the Abilene omnirng 066° T and the Fort Worth omnirng 248°T radials; Fort Worth, Tex. omnirng stn; to the Sulphur Springs, Tex. omnirng stn."

(19) VOR civil airway No. 68 (Albuquerque, N. Mex. to Brownsville, Tex.), is amended by changing the portion which reads: "intsxn of the San Antonio omnirng 169°T and the Corpus Christi omnirng 321°T radials;" to read: "intsxn of the San Antonio omnirng 168°T and the Corpus Christi omnirng 321°T radials;"

(20) VOR civil airway No. 73 (Wichita, Kans. to Salina, Kans.), is amended to read: "From the Wichita, Kans. omnirng stn via the Hutchinson, Kans. omnirng stn; intsxn of the Hutchinson omnirng 025°T and the Salina omnirng 184°T radials; to the Salina, Kans. omnirng stn."

(21) VOR civil airway No. 77 (San Angelo, Tex. to Des Moines, Iowa), is amended by deleting the portion which reads: "Oklahoma City omnirng 187°T" and substituting the following in lieu thereof: "Oklahoma City omnirng 180°T"

(22) VOR civil airway No. 91 (New York, N.Y. to Montreal, Que.), is amended to read: "That airspace over U.S. territory from the Idlewild, N.Y. omnirng stn via the point of intsxn of the Idlewild omnirng 042°T and the Wilton omnirng 185°T radials; Wilton, Conn. omnirng stn; Poughkeepsie, N.Y. omnirng stn; Albany, N.Y. omnirng stn, including an E alternate via the intsxn of the Poughkeepsie omnirng 007°T and the Albany omnirng 140°T radials and also a W alternate; Plattsburgh, N.Y. omnirng stn; to the Montreal, Que omnirng stn."

(23) VOR civil airway No. 94 (Salt Flat, Tex. to Gregg County, Tex.), is amended to read: "From the Salt Flat, Tex. omnirng stn via the Carlsbad, N. Mex. omnirng stn to the Hobbs, N. Mex. omnirng stn. From the Abilene, Tex. omnirng stn via the intsxn of the Abilene omnirng 096°T and the Britton omnirng 264°T radials; Britton, Tex. omnirng stn; to the Gregg County, Tex. omnirng stn."

(24) VOR civil airway No. 114 (Pueblo, Colo. to New Orleans, La.), is amended to read "From the Pueblo, Colo. omnirng stn via the Dalhart, Tex. omnirng stn; Amarillo, Tex. omnirng stn, including a N alternate; Childress, Tex. omnirng stn, including a S alternate; Wichita Falls, Tex. omnirng stn; Dallas, Tex. omnirng stn; intsxn of the Dallas 135°T and the Gregg County omnirng 273°T radials; Gregg County, Tex. omnirng stn, including a N alternate from the Dallas omnirng stn to the Gregg County omnirng stn via the Quitman, Tex. omnirng stn; point of intsxn of the Shreveport, La. omnirng 176°T and the Alexandria omnirng 300°T radials; Alexandria, La. omnirng stn, including a N alternate from the Gregg County omnirng stn to the Alexandria omnirng stn via the Shreveport omnirng stn and the point of intsxn of the Shreveport omnirng 176°T with the Alexandria omnirng 300°T radials; Baton Rouge, La. omnirng stn; to the New Orleans, La. omnirng stn."

(25) VOR civil airway No. 131 (Emporia, Kans. to Topeka, Kans.), is amended to read: "From the Emporia, Kans. omnirng stn via the intsxn of the Emporia omnirng 050°T and the Topeka omnirng 174°T radials; to the Topeka, Kans. omnirng stn."

(26) VOR civil airway No. 140 (Amarillo, Tex. to New York, N. Y.), is amended by changing all after the Coyle, N. J. omnirng stn to read: "Coyle, N. J. omnirng stn; to the Idlewild, N. Y. omnirng stn, excluding the portions of this arwy between the Coyle, N. J. omnirng stn and the point of intsxn of the Coyle omnirng 031°T and the Colts Neck, N. J. omnirng 073°T radials more than 3 miles either side of the centerline and the portions which overlap the Aberdeen restricted area (R-54)."

(27) VOR civil airway No. 161 (Fort Worth, Tex. to Minneapolis, Minn.), caption changed and is amended by changing all before the Blue Springs, Mo. omnirng stn to read: "From the Fort Worth (Amon Carter Field), Tex. ILS lclzr via the intsxn of the Fort Worth (Amon Carter Field) ILS lclzr NW course and the Ardmore omnirng 192°T radial; Ardmore, Okla. omnirng stn; Tulsa, Okla. omnirng stn; Butler, Mo. omnirng stn; Blue Springs, Mo. omnirng stn."

(28) VOR civil airway No. 163 (Brownsville, Tex. to Oklahoma City, Okla.), is amended by changing the last portion to read: "From the Waco, Tex. omnirng stn via the intsxn of the Waco omnirng 315°T and the Mineral Wells omnirng 198°T radials; Mineral Wells, Tex. omnirng stn; Fort Worth, Tex. omnirng stn; Ardmore, Okla. omnirng stn; intsxn of the Ardmore omnirng 350°T and the Oklahoma City omnirng 137°T radials; to the Oklahoma City omnirng stn, including a W alternate from the Ardmore omnirng stn to the Oklahoma City omnirng stn via the intsxn of the Ardmore omnirng 331°T and the Oklahoma City omnirng 180°T radials and also an E alternate from the Ardmore omnirng stn to the Oklahoma City omnirng stn via the intsxn of the Oklahoma City omnirng stn via the intsxn of the Oklahoma City omnirng 107°T and the Tulsa, Okla. omnirng 222°T radials. The portions of this arwy which conflict with the Corpus Christi restricted area (R-227) are excluded."

(29) VOR civil airway No. 186 (St. Louis, Mo. to Vandalia, Ill.), is amended to read: "From the St. Louis, Mo. omnirng stn via the intsxn of the St. Louis omnirng 032°T and the Vandalia omnirng 273°T radials; to the Vandalia omnirng stn."

(30) VOR civil airway No. 229 (Wilmington, N.C. to Cofield, N.C.), is added to read: "From the Wilmington, N.C. omnirng stn via the New Bern, N.C. omnirng stn; to the Cofield, N.C. omnirng stn. The portion of this arwy above 5500 feet above mean sea level within 60 miles of a point at latitude 34° 54' 30" N, longitude 76° 53' 00" W, is excluded daily from sunset to sunrise."

(31) VOR civil airway No. 231 (Missoula, Mont. to Ronan, Mont.), is added to read: "From the Missoula, Mont. omnirng stn to the point of intsxn of the Missoula omnirng 354°T and the Mullan Pass, Mont. omnirng 089°T radials."

(32) VOR civil airway No. 241 (Kinston, N.C. to Cofield, N.C.), is revoked.

(33) VOR civil airway No. 247 (Douglas, Wyo. to Crazy Woman, Wyo.), is added to read "From the Douglas, Wyo. omnirng stn to the Crazy Woman, Wyo. omnirng stn."

(34) VOR civil airway No. 248 (Paso Robles, Calif. to Bakersfield, Calif.), is added to read: "From the Paso Robles, Calif. omnirng stn to the Bakersfiled, Calif. omnirng stn."

CONTROL AREAS: (1) VOR civil airway No. 20 (Laredo, Tex. to Richmond, Va.), is amended to read: "All of VOR civil arwy No. 20, including N and S alternate, but excluding the airspace between the main arwy and its N alternate arwy from the Atlanta, Ga. omnirng stn to the Spartanburg, S.C. omnirng stn."

(2) VOR civil airway No. 54 (Quitman, Tex. to Charlotte, N.C.), is amended to read: "All of VOR civil arwy No. 54 including N alternates."

(3) VOR civil airway No. 61 (Fort Worth, Tex. to Lawton, Okla.), is amended to read: "All of VOR civil arwy No. 61."

(4) VOR civil airway No. 63 (Waco, Tex. to Milwaukee, Wis.), is amended to read: "All of VOR civil arwy No. 63 including W alternates."

(5) VOR civil airway No. 66 (San Diego, Calif. to Sulphur Springs, Tex.), is amended to read: "All of VOR civil arwy No. 66 including N alternates."

(6) VOR civil airway No. 73 (Wichita Kans. to Salina, Kans.), is amended to read: "All of VOR civil arwy No. 73."

(7) VOR civil airway No. 91 (New York, N.Y. to Montreal, Que.), is amended to read: "All of VOR civil arwy No. 91 including an E alternate and a W alternate."

(8) VOR civil airway No. 94 (Salt Flat, Tex. to Gregg County, Tex.), is amended to read "All of VOR civil arwy No. 94."

(9) VOR civil airway No. 131 (Emporia, Kans. to Topeka, Kans.), is amended to read: "All of VOR civil arwy No. 131."

(10) VOR civil airway No. 161 (Fort Worth, Tex. to Minneapolis, Minn.), is amended to read: "All of VOR civil airway No. 161."

(11) VOR civil airway No. 163 (Brownsville, Tex. to Oklahoma City, Okla.), is amended to read: "All of VOR civil arwy No. 163 including an E and a W alternate."

(12) VOR civil airway No. 186 (St. Louis, Mo. to Vandalia, Ill.), is amended to read: "All of VOR civil arwy No. 186."

(13) VOR civil airway No. 229 (Wilmington, N.C. to Cofield, N.C.), is added to read: "All of VOR civil arwy No. 229."

(14) VOR civil airway No. 231 (Missoula, Mont. to Ronan, Mont.), is added to read: "All of VOR civil arwy No. 231."

(15) VOR civil airway No. 241 (Kinston, N.C. to Cofield, N.C.), is revoked.

(21 Aug 1956)

(16) VOR civil airway No. 247 (Douglas, Wyo. to Crazy Woman, Wyo.), is added to read: "All of VOR civil arwy No. 247"

(17) VOR civil airway No. 248 (Paso Robles, Calif. to Bakersfield, Calif.), is added to read: "All of VOR civil arwy No. 248".

CONTROL AREA EXTENSIONS: (1) (Pasco, Wash.), is amended by changing the words "VOR civil airway No. 103" to read: "VOR civil airway No. 112."

(2) (Campbellton, Ga.), is revoked.

(3) (Columbia S. C.), is amended by adding the following portion to present control area extension: "and the airspace S of Columbia bounded on the NE by Blue Civil arwy No. 28, on the SW by Red civil arwy No. 10 and on the NW by Red civil arwy No. 16, and the airspace SE of Columbia bounded on the N by Red civil arwy No. 16, on the E by Amber civil arwy No. 7, and on the SW by Blue civil arwy No. 28, excluding the portion which overlaps restricted area (R-384)."

(4) (Miami, Fla.), is amended to read: "That airspace within tangent lines drawn from the circumference of a circle 5 mi in radius centered on the Tamiami, Fla., nondirectional rdo bcn to a circle 10 miles in radius centered on the intsxn of a line bearing 276°T from the Tamiami nondirectional rdo bcn and the eastern boundary of the New Orleans Oceanic Control Area, excluding the portion which lies within Sarasota Warning Area (W-168) and excluding the portion below 2000 ft. MSL which lies outside the continental limits of the United States."

(5) (Miramar, Calif.), is amended by changing last portion to read: "excluding the airspace below 15,000 ft. MSL, which lies within restricted area. (R-297)."

(6) (Wichita, Kans.), is amended by adding the following portion to present control area extension: "and the airspace lying within 5 miles either side of a direct line extending from the Wichita, Kans. omnirng stn to the Tulsa, Okla. omnirng stn."

(7) (Fort Smith, Ark.), is amended to read: "That airspace NE of Fort Smith within a 25 mile radius of the Fort Smith omnirng stn extending clockwise from the eastern boundary of VOR civil arwy No. 13 to the northern boundary of VOR civil arwy No. 74."

(8) (Tampa, Fla.), is amended by adding the following portion to present control area extension: "including the airspace NW of Tampa bounded on the NE by VOR civil arwy No. 97, on the SW by Tampa control area extension 601.1226, and on the NW by a line 5 miles W of a and parallel to the 207°T radial of the Cross City, Fla. omnirng, excluding the airspace below 2000 ft MSL which lies outside the continental limits of the United States."

CONTROL ZONES: (1) Three-mile radius zones is amended by adding the following airport: Jacksonville, N. C., New River MCAF.

(2) (Rockford, Ill.), is amended by adding the following portion to present control zone: "and within 2 miles either side of a line extending from the Greater Rockford Arpt through the Rockford nondirectional rdo bcn to a point 12 miles S of the nondirectional rdo bcn."

(3) (Pensacola, Fla.), is amended by adding the following portion to present control zone: "and within 2 miles either side of the ILS lclzr NW course extending from the lclzr to a point 15 miles NW."

(4) (Aguadilla, P. R.), is amended to read: "Within a 10 mile radius of Ramey AFB, Aguadilla, P. R., and within 2-1/2 miles either side of the extended centerline of the Ramey AFB E/W rnwy extending to points 12 miles E and W of the rnwy ends."

(5) (Anchorage, Alaska), is amended to read: "That airspace within a 5 mile radius of Elmendorf AFB, within 5 miles either side of a direct line from the Elmendorf AFB to and including a 5 mile radius of Anchorage Intnl Arpt, and within 2 miles either side of the ILS lclzr course extending from the Anchorage Intnl Arpt to a point 10 miles beyond the outer marker, excluding the portion which overlaps restricted area (R-348)."

(6) (New Bern, N. C.), is amended to read: "Within a 6 mile radius of Simmons-Nott Arpt and within 2 miles either side of a line bearing 265°T extending from the New Bern nondirectional rdo bcn to a point 10 miles W of the rdo bcn, excluding the portion which overlaps Cherry Point restricted area (R-123), and excluding the airspace above 5500 ft. above mean sea level daily from sunset to sunrise."

(7) (North, S. C.), is added to read: "Within an 8 mile radius of North AF (AUX) Fld, North, S. C., and within 2 miles either side of a line bearing 233°T extending from the airfld to a point 10 miles SW."

VOR REPORTING POINTS: (1) Domestic VOR reporting points is amended by adding the following reporting points to read: (a) Britton, Tex. omnirng stn; (b) Huntsville, Ala., omnirngstn; (c) Maxwell Intsxn - the intsxn of the Lafayette, Ind. omnirng 122°T and the Indianapolis, Ind omnirng 084°T radials; (d) Whitehurst Intsxn - the intsxn of the N course of the Norfolk, Va. VAR and of the NE course of the Norfolk, Va. ILS lclzr.

(2) Domestic VOR reporting points is amended by changing the following reporting points to read: (a) Richmond Intsxn - the intsxn of the Oakland, Calif. omnirng 330°T and the Sacramento, Calif. omnirng 233°T radials.

(3) Domestic VOR reporting points is amended by revoking the following reporting point: (a) Ringling Intsxn - the intsxn of the Ardmore, Okla. omnirng 274°T and the Oklahoma City, Okla. omnirng 175°T radials.

MINIMUM EN ROUTE ALTITUDES: The following minimum en route IFR altitudes are amended as follows, effective September 20, 1956:

Section 610.12 Green Civil Airway 2 is amended to read in part:

FROM	TO	MEA
North Scituate INT, R.I.	Boston, Mass. LFR	1800

Section 610.13 Green Civil Airway 3 is amended to read in part:

FROM	TO	MEA
Allentown, Pa. LFR	Belle Mead INT, N. J.	2500
Youngstown, Ohio LFR	Pardoe INT, Pa.	2600
Pardoe INT, Pa.	Philipsburg, Pa. LFR	4000

Section 610.16 Green Civil Airway 6 is amended to read in part:

✓ OAKLAND OCEANIC FLIGHT INFORMATION REGION: Effective September 1, 1956, the Oakland Oceanic Flight Information Region will become the Oakland Oceanic Control Area. The Oakland Oceanic Control Area will be bounded by coordinates: 40-00N, 127-00W direct to 30-45N, 120-50W direct to 22-00N, 138-00W direct to 35-50N, 138-00W direct to 40-00N, 130-00W direct to the point of origin. Within the Oakland Oceanic Control Area a standard altimeter setting of 29.92 will be used. Lower limit of control area will be 5000'. The minimum assignable alt will be 6000'. 1000' vertical separation up to 29,000' will be applied. 2000' vertical separation above 29,000' will be applied. 20 minutes longirudinal separation will be applied. 140 nautical miles lateral separation will be applied between center lines of ATC approved tracks. The air traffic control approved track assigned will include that area 50 n miles each side of the specified track and will be available for the pilot's use without reclearance from ATC. At any time a flight determines that it is outside of this approved track area corrective action should immediately be taken by the pilot to return to the approved track area. Flight plans should be filed in sufficient detail to delineate turning points, altitude change points, and point of entry at destination. Flight plans between Honolulu and the mainland will indicate at least one latitude and longitude point.

✓ ON-REQUEST REPORTING POINTS: The following on-request reporting points are designated, redesignated or cancelled and shall become effective September 20, 1956:

DESIGNATE:

(1) BRAY, OKLA. INTSXN - the intsxn of the Lawton, Okla.059° mag and the Oklahoma City, Okla. 170° mag radials.

(2) BRECKENRIDGE VHF INTSXN - the intsxn of the Abilene, Tex. VOR 055° mag and the Mineral Wells, Tex. VOR 267° mag radials.

(3) BURTON VHF INTSXN - the intsxn of the Savannah, Ga. VOR 047° mag and the Columbia, S. C. VOR 173° mag radials.

(4) CAMPBELL (LF) INTSXN - the intsxn of the SE course of the Moffett, Field, Calif. LFR and a 031°M bearing to the Evergreen, Calif. "H" facility.

(5) CAMPBELLTON LF INTSXN - the intsxn of the W course of the Atlanta, Ga. ILS lclzr and a 185° mag bearing from the Lost Mountain, Ga. rdo bcn.

(6) CANYON VHF INTSXN - the intsxn of the Amarillo, Tex. VOR 176° mag radial and a 130° mag bearing from the Amarillo, Tex. ILS LOM.

(7) CHAPEL VHF INTSXN - the intsxn of the Mineral Wells, Tex. VOR 330° mag and the Fort Worth, Tex. VOR 239° mag radials.

(8) CISCO VHF INTSXN - the intsxn of the Abilene, Tex. VOR 085° mag and the Mineral Wells, Tex. VOR 237° mag radials.

(9) CITRONELLE VHF INTSXN - the intsxn of the Mobile, Ala. VOR 010° mag and the Evergreen, Ala. VOR 240° mag radials.

(10) COLE VHF INTSXN - the intsxn of the Fort Worth, Tex. VOR 351° mag and the Ardmore, Okla. VOR 260° mag radials.

(11) CONYERS LF INTSXN - the intsxn of the E course of the Atlanta, Ga. ILS lclzr and a 125° mag bearing from the Lost Mountain, Ga. rdo bcn.

(12) COPELAND VHF INTSXN - the intsxn of the Miami, Fla. VOR 275° mag and the Fort Myers, Fla. VOR 140° mag radials.

(13) COURTNEY VHF INTSXN - the intsxn of the Houston, Tex. VOR 306° mag, College Station, Tex. VOR 125° mag and the Eagle Lake, Tex. VOR 024° mag radials.

(14) COWARD L/MF INTSXN - the intsxn of the S course of the Florence, S. C. LF rng and the E course of the Columbia, S. C. LF rng.

(15) DACUS VHF INTSXN - the intsxn of the Houston, Tex. VOR 330° mag, the College Station, Tex. VOR 090° mag and the Eagle Lake, Tex. VOR 024° mag radials.

(16) DENTON VHF INTSXN - the intsxn of the Fort Worth, Tex. VOR 082° mag and the Dallas, Tex. VOR 296° mag radials.

(17) DE SOTO VHF INTSXN - the intsxn of the Dallas, Tex. VOR 193° mag and the Britton, Tex. VOR 063° mag radials.

(18) ECHELON, N. J. VHF INTSXN - the intsxn of the Westchester, Pa VOR direct radial to Coyle, N. J. VOR and Woodstown, N. J. VOR 054° mag radial.

(19) FOX (VHF) INTSXN - the intsxn of the Ardmore, Okla. VOR 183° mag radial and the NW course of the Fort Worth (Carter Fld), Tex. ILS lclzr.

(20) GRAYS VHF INTSXN - the intsxn of the Savannah, Ga. 002° mag and the Charleston, S. C. VOR 243° mag radials.

(21) GUADALUPE VHF INTSXN - the intsxn of the San Antonio, Tex. VOR 324° mag and the Austin, Tex. VOR 228° mag radials.

(22) HARRIS NECK VHF INTSXN - the intsxn of the Savannah, Ga. VOR 195° mag and the Alma, Ga. VOR 082° mag radials.

(23) HIGHTSTOWN, N. J. (VHF) INTSXN - the intsxn of the Woodstown, N. J. VOR 054° mag radial and the Coyle, N. J. VOR 004° mag radial.

(24) ISLE OF PALMS (Integrated) INTSXN - the intsxn of the SE course of the Charleston, S. C. LF rng and the Myrtle Beach, S. C. VOR 222° mag radial.

(25) ISLE OF PALMS VHF INTSXN - the intsxn of the Charleston, S. C. VOR 125° mag and the Myrtle Beach, S. C. VOR 222° mag radials.

(26) JOSHUA VHF INTSXN - the intsxn of the Britton, Tex. VOR 255° mag and the Waco, Tex. VOR 343° mag radials.

(27) KEENAN VHF INTSXN - the intsxn of the Houston, Tex. VOR 330° mag and the College Station, Tex. VOR 103° mag radials.

(28) KEMP VHF INTSXN - the intsxn of the Dallas, Tex. VOR 126° mag and the Britton, Tex. VOR 082° mag radials.

(29) KILDARE VHF INTSXN - the intsxn of the Savannah, Ga. VOR 320° mag and the Charleston, S.C. VOR 243° mag radials.

(30) LAKE WORTH VHF INTSXN - the intsxn of the Fort Worth, Tex. VOR 149° mag and the Mineral Wells, Tex. VOR 071° mag radials.

(31) LANGSTON VHF INTSXN - the intsxn of the Oklahoma City, Okla. VOR 030° mag and the Enid, Okla. VOR 120° mag radials.

(32) LEESBURG VHF INTSXN - the intsxn of the Orlando, Fla. VOR 305° mag and the Lakeland, Fla. VOR 010° mag radials.

(33) (This number is void.)

(34) LOST MOUNTAIN, GA. NON-DIRECTIONAL RADIOBEACON.

(35) McKINNEY, TEX. INTSXN - the intsxn of the Sulphur Springs, Tex. VOR 264° mag and the Mineral Wells, Tex. VOR 056° mag radials. (21 Aug 1956)

(36) MILL VHF INTSXN - the intsxn of the Mineral Wells, Tex. VOR 188° mag and the Britton, Tex. VOR 255° mag radials.

(37) PRINCETON VHF INTSXN - the intsxn of the Dallas, Tex. VOR 018° mag and the Sulphur Springs, Tex. VOR 264° mag radials.

(38) PROSPER VHF INTSXN - the intsxn of the Dallas, Tex. VOR 336° mag and the Fort Worth, Tex. VOR 082° mag radials.

(39) REX LF INTSXN - the intsxn of the E course of the Atlanta, Ga. ILS lclzr and a 133° mag bearing from the Lost Mountain, Ga rdo bcn.

(40) ROANOKE VHF INTSXN - the intsxn of the NW course of the Fort Worth (Carter Fld), Tex. ILS lclzr and the Mineral Wells, Tex. VOR 056° mag radial.

(41) RUSSELL VHF INTSXN - the intsxn of the Mineral Wells, Tex. VOR 086° mag radial and the S course of the Fort Worth (Meacham Fld), Tex. ILS lclzr.

(42) SABINE VHF INTSXN - the intsxn of the Dallas, Tex. VOR 081° mag and the Sulphur Springs, Tex. VOR 226° mag radials.

(43) SAGINAW VHF INTSXN - the intsxn of the N course of the Fort Worth, Tex. (Meacham Fld), ILS lclzr and the Mineral Wells, Tex. VOR 066° mag radial.

(44) SCAPPOOSE (VHF) INTSXN - the intsxn of the NW Portland ILS lclzr course and the 338° mag radial of the Newburg VOR.

(45) (This number is void.)

(46) STILSON L/MF INTSXN - the intsxn of the NW course of the Savannah, Ga. LF rng and the NE course of the Alma, Ga. LF rng.

(47) STONE MOUNTAIN LF INTSXN - the intsxn of the NE course of the Atlanta, Ga. LF rdo rng and a 114° mag bearing from the Lost Mountain, Ga. rdo bcn

(48) TEMPLE LF INTSXN - the intsxn of the W course of the Atlanta, Ga. ILS lclzr and a 222° mag bearing from the Lost Mountain, Ga rdo bcn.

(49) TRINITY FORK VHF INTSXN - the intsxn of the SE course of the Dallas, Tex. ILS lclzr and Britton, Tex. VOR 063° mag radial.

(50) VAIL LAKE (VHF) INTSXN - the intsxn of the 047° mag radial of the Oceanside, Calif. VOR, the 128° mag radial of the March AFB VOR and the 242° mag radial of the Thermal, Calif. VOR.

(51) WALLING, N. J. (VHF) INTSXN - the intsxn of the Idlewild, N. Y. VOR radial to Hightstown Intsxn, N. J. and SW course of the LaGuardia ILS lclzr.

(52) WEEKSTOWN (LF) INTSXN - the intsxn of the NE Millville LFrng and the NW Atlantic City (Navy) LF rng.

REDESIGNATE:

(1) ALVORD VHF INTSXN - the intsxn of the Wichita Falls, Tex. VOR 114° mag and the Fort Worth, Tex. VOR 018° mag radials.

(2) BEDFORD VHF INTSXN - the intsxn of the Fort Worth (Carter Fld), Tex. ILS lclzr NW course and the Mineral Wells, Tex. VOR 067° mag radials.

(3) BLANCHARD, OKLA. INTSXN - the intsxn of the Oklahoma City VOR 170° mag and the Ardmore, Okla. VOR 322° mag radials.

(4) BOLD SPRING LF INTSXN - the intsxn of the NE course of the Atlanta, Ga. LF rdo rng and a 094° mag bearing from the Lost Mountain, Ga. rdo bcn.

(5) CALLAHAN VHF INTSXN - the intsxn of the Jacksonville, Fla. VOR 303° mag and the Brunswick, Ga. VOR 215° mag radials.

(6) CONVERSE (VHF) INTSXN - the intsxn of the Shreveport VOR 168° mag and the Alexandria VOR 293° mag radials.

(7) DERBY, OHIO (LF) INTSXN - the intsxn of the N course of Akron-Canton, Ohio ILS and the E course of Akron, Ohio LFrng. (Formerly Wingfoot Intsxn)

(8) ELMENDORF, TEX. INTSXN - the intsxn of the San Antonio, Tex. VOR 158° mag and the Cotulla, Tex. VOR 030° mag radials.

(9) EMMETT VHF INTSXN - the intsxn of the Tri-City, Tenn., ILS lclzr E course and the Tri-City, Tenn. VOR 352° mag radial.

(10) HASLET VHF INTSXN - the intsxn of the Mineral Wells, Tex. VOR 056° mag radial and the Fort Worth, (Meacham Fld), Tex. NW ILS lclzr course.

(11) HENSLEY (VHF) INTSXN - the intsxn of the SE course of Carter Fld ILS lclzr and the 237° mag radial of Dallas VOR.

(12) KENNESAW LF INTSXN - the intsxn of the NW course of the Atlanta, Ga. LF rdo rng and a 020° mag bearing from the Lost Mountain, Ga. rdo bcn.

(13) LEWISVILLE VHF INTSXN - the intsxn of the NW course of the Dallas, Tex. ILS lclzr and the Mineral Wells, Tex. VOR 056° mag radial.

(14) LITTLE ELM VHF INTSXN - the intsxn of the Dallas, Tex. VOR 315° mag and the Mineral Wells, Tex. VOR 056° mag radials.

(15) MADRAS LF INTSXN - the intsxn of the SW course of the Atlanta, Ga. LF rdo rng and a 185° mag bearing from the Lost Mountain, Ga. rdo bcn.

(16) RIOVISTA VHF INTSXN - the intsxn of the Waco, Tex. VOR 343° mag and the 216° mag radial of the Britton, Tex. VOR.

(17) TALLAPOOSA LF INTSXN - the intsxn of a line bearing 265° mag from the Atlanta, Ga. LF rdo rng and the S course of the Rome, Ga. LF rdo rng.

(18) TAMIAMI VHF INTSXN - the intsxn of the Miami, Fla. VOR 275° mag and the West Palm Beach, Fla. VOR 218° mag radials.

(19) TIOGA VHF INTSXN - the intsxn of the Dallas, Tex. VOR 336° mag and the Fort Worth, Tex. VOR 064° mag radials.

(20) VICTORY, CALIF. INTSXN - the intsxn of the Palmdale VOR 276° mag and the Fillmore VOR 034° mag radials.

(21) WAXAHACHIE L/MF INTSXN - the intsxn of the S course of the Dallas, Tex. LF rdo rng and 124° mag bearing from Fort Worth, Tex. LF rdo rng.

(22) WAXAHACHIE VHF INTSXN - the intsxn of the Dallas Tex. VOR 193° mag and the Britton, Tex. VOR 082° mag radials.

CANCEL:

(1) BOONESVILLE INTSXN - the intsxn of the Mineral Wells, Tex. VOR 015° mag and the Fort Worth, Tex. VOR 298° mag radials.

(2) BRADLEY (VHF) INTSXN - the intsxn of the Lawton, Okla. VOR 055° mag radial and Victor Arwy 17 (Oklahoma City 165° mag radial.)

(3) BRIDGEPORT INTSXN - the intsxn of the Mineral Wells, Tex. VOR 015° mag and the Fort Worth, Tex. VOR 313° mag radials.

(4) COPPELL INTSXN - the intsxn of the NW course of the Dallas, Tex. ILS lclzr, Fort Worth, Tex VOR 069° mag and the Dallas, Tex. VOR 271° mag radials.

(5) CAMBRIDGE INTSXN - the intsxn of the 128° mag radial of the Wichita omnirng and the 18° mag radial of the Ponca City omnirng.

(6) CRANDALL, TEX (VHF) INTSXN - the intsxn of the Dallas, Tex. VOR 126° mag and the Gregg County, Tex. VOR 270° mag radials.

(7) DECATUR VHF INTSXN - the intsxn of the Fort Worth, Tex. VOR 002° mag and the Dallas, Tex. VOR 296° mag radials.

(8) EDGEWOOD (VOR) INTSXN - the intsxn of the Dallas 097° mag radial and the NW course of the Tyler ILS lclzr course (306° mag)

(9) EMORY VHF INTSXN - the intsxn of the Sulphur Springs, Tex. 200° mag and the Quitman, Tex. 262° mag radials.

(10) FORESTBURG VHF INTSXN - the intsxn of the Fort Worth 346° mag and the Ardmore, Okla. 196° mag radials.

(11) FORREST LF INTSXN - the intsxn of the NE course of the Atlanta, Ga. LF rdo rng and the E course of the Atlanta, Ga. ILS lclzr.

(12) FRISCO VHF INTSXN - the intsxn of the Dallas Tex. VOR 336° mag and the Fort Worth, Tex. VOR 050° mag radials.

(13) HASLETT (INTEGRATED) INTSXN - the intsxn of the N course of the Fort Worth, Tex. LF rdo rng and the Fort Worth, Tex. VOR 032° mag radial.

(14) LANCASTER VHF INTSXN - the intsxn of the Dallas, Tex. VOR 193° mag radial and the SE course of the Fort Worth, Tex. (Carter Fld) ILS lclzr

(15) MESQUITE (VHF) INTSXN - the intsxn of the Dallas, Tex. VOR 126° mag and the Fort Worth, Tex. 084° mag radials.

(16) MORGAN VHF INTSXN - the intsxn of the Waco, Tex. VOR 321° mag and the Fort Worth, Tex. VOR 178° mag radials.

(17) MOTBRIDGE L/MF INTSXN - the intsxn of the E course of the Columbia, S. C. LF rng and the SW course of the Florence, S. C. LF rng.

(18) PLANO (VHF) INTSXN - the intsxn of the Dallas, Tex. VOR 336° mag and the Fort Worth, Tex. VOR 069° mag radials.

(19) SMYRNA LF INTSXN - the intsxn of the NW course of the Atlanta, Ga. LF rdo rng and the E course of the Atlanta, Ga. ILS lclzr.

(20) STADIUM (VHF) INTSXN - the intsxn of the S course of the Fort Worth, Tex. (Meacham) ILS lclzr and the Fort Worth, Tex. VOR 123° mag radial.

✓ NON-STANDARD HOLDING PATTERNS: The following non-standard holding patterns are established and shall become effective September 20, 1956:

(1) BEDFORD VHF INTSXN - direction of holding - NW on Fort Worth (Carter Fld), Tex. NW ILS lclzr course (inbound course 129° mag); direction of turn - LEFT; time - 1 minute; minimum altitude - 2000'

(2) BRITTON VOR INTSXN - direction of holding - SW on 216° mag radial (inbound course 036° mag); direction of turns - LEFT; time - 1 minute; minimum altitude - 2000'.

(3) CALLAHAN VHF INTSXN - direction of holding - W on Jacksonville, Fla. VOR 303° mag radial (inbound course 123° mag); direction of turns - RIGHT; time - 1 minute; minimum altitude - 1200'.

(4) CAMPBELLTON LF INTSXN - direction of holding - W on W course of the Atlanta, Ga. ILS lclzr (inbound course 088° mag); direction of turns - RIGHT; time - 1 minute; minimum altitude - 2700'.

(5) CONYERS LF INTSXN - direction of holding - E on E course of the Atlanta, Ga. ILS lclzr (inbound course 268° mag); direction of turns - LEFT; time - 1 minute; minimum altitude - 2200'.

(6) DE SOTO VHF INTSXN - direction of holding - SW on Dallas, Tex. VOR 193° mag radial (inbound course 013° mag); direction of turns - RIGHT; time - 1 minute; minimum altitude - 2600'.

(21 Aug 1956)

(7) HASLET VHF INTSXN - direction of holding - N on Fort Worth (Meacham Fld), Tex. ILS N course (inbound course 174° mag); direction of turns - LEFT; time - 1 minute; minimum altitude - 2000 .

(8) JOSHUA VHF INTSXN - direction of holding - W on Britton, Tex. VOR 255° mag radial (inbound course 075° mag); direction of turns - RIGHT; time - 1 minute; minimum altitude - 2000 .

(9) KENNESAW LF INTSXN - direction of holding - NW on NW course of the Atlanta, Ga. LF rdo rng (inbound course 154° mag); direction of turns - LEFT; time - 2 minutes; minimum altitude - 3000 .

(10) LANGSTON VHF INTSXN - direction of holding - NE on Oklahoma City, Okla. VOR 030° mag radial (inbound course 210° mag); direction of turns - LEFT; time - 1 minute; minimum altitude - 3000'.

(11) LITTLE ELM VHF INTSXN - direction of holding - NW on Dallas, Tex. VOR 315° mag radial (inbound course 135° mag); direction of turns - RIGHT; time - 1 minute; minimum altitude - 3800'.

(12) LOST MOUNTAIN, GA. RADIO BEACON - direction of holding - W on a bearing of 284° mag from the rdo bcn (inbound course 104° mag); direction of turns: LEFT; time - two minutes; minimum altitude - 2800'.

(13) PRINCETON VHF INTSXN - direction of holding - NE on Dallas, Tex. VOR 018° mag radial (inbound course 198° mag); direction of turns - LEFT; time - 2 minutes; minimum altitude - 2000'.

(14) REX LF INTSXN - direction of holding - E on E course of the Atlanta, Ga. ILS lclzr (inbound course 268° mag); direction of turns - LEFT; time - 1 minute; minimum altitude - 2200'

(15) RUSSELL VHF INTSXN - direction of holding - S on S course of Fort Worth (Meacham Fld), Tex ILS lclzr (inbound course 354° mag); direction of turns - RIGHT; time - 1 minute; minimum altitude - 2000'.

(16) SAGINAW VHF INTSXN - direction of holding - W on Mineral Wells, Tex. VOR 066° mag radial (inbound course 066° mag); direction of turns - RIGHT; time - 1 minute.

The following non-standard holding pattern is redescribed and shall become effective September 20, 1956:

(1) ATLANTA, GA. LF RANGE - direction of holding - SE on SE course (inbound course 324° mag); direction of turns - RIGHT; time - 1 minute; minimum altitude - 2200'.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 13 - Radio Facility Identification Index - Correct GTF Great Falls, Montana LF rng frequency to read: 371 kc.

(2) Page 24 - Emporia, Kansas - Add CAA telephone number to read: 3512.

(3) Page 25 - Lewistown, Montana - Correct CAA telephone number to read: Keystone 8-3639.

(4) Page 26 - Millville, New Jersey - Correct CAA telephone number to read: Taylor 5-1173.

(5) Page 26 - Grants, New Mexico - Correct CAA telephone number to read: Atwater 7-3011.

(6) Page 27 - Nashville, Tennessee - Correct CAA telephone number to read: Alpine 6-2237.

(7) Page 29 - Nashville, Tennessee - Correct ASDO - General Safety telephone number to read: Alpine 5-7791.

(8) Page 29 - Memphis, Tennessee - Delete ASDO (General Safety).

(9) Page 29 - Nashville, Tennessee - Add (Air Carrier Safety) telephone number Alpine 5-7791.

(10) Page 75 - Airport Name Index - Correct coordinates for Butte, Montana to read: Lat 45-57-15, long. 112-29-45 and Butte Valley, Dorris, California to read: Lat 41-53-15, long. 112-58-45.

(11) Page 102 (Airborne) Wichita Falls, (Sheppard AFB)- Correct rcvr check point to read: 094°; over LFR; 2000'.

(12) Page 103 - (Airborne) - Wink, Texas (Site 18, ELP-FTW) - Add rcvr check point to read: 151°; over LF rng - 1000' above terrain.

(13) Page 104 - (Ground) Fort Myers, Florida (Page Fld) - Correct rcvr check point to read: 042°.

(14) Page 105 - (Ground) - Las Vegas, New Mexico - Correct rcvr check point to read: 021°.

(15) Page 105 - (Ground) - Lawton, Oklahoma - Correct rcvr check point to read: 169°; on terminal apron at point intersecting the S taxi strip.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31)	-	Month and day item was reported.
**	-	New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★	-	New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE	-	Such items usually are cited only once, because of space limitations. Examples; erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.

BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd.

BIRMINGHAM-RADIO: About August 10, VOR will be shut down - relctn. (7-18)

★BIRMINGHAM ARPT-TOWER: Aug 7, trans & rcvr 305.4 & 385.6 mc cmsnd. FLD: Caution -tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm closed to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr.

DOTHAN -NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

HUNTSVILLE-RADIO: VOR radials 005°-030° unusable due to roughness and bends. (5-11)

HUNTSVILLE MUN ARPT: Caution - rnwy 18-36 under const.

MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft lndg and taking-off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E W parallel taxi strip W of a point adj to Air National Guard hangar. E W rnwy clsd to all military acft-const. Easternmost 5000' avail days, easternmost 6000' avail sunset to sunrise to civil acft. Western end mrkd by flags-days, lgts-ngts. (5-15)

MT. MANNING BEACON SITE 28, MEM-TPA: Effective Aug 31, bcn will be discontinued.

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends. (4-22)

**OZARK ARPT: New fld. Type L. Lat. 31-27-30, long. 85-37-15. Lctn: 2.0 SE. Elev: 358'. No. of rnwys: 1 - 2000' x 200' - sod. Lngst rnwy & facs: 20. Remarks: Drive-in-theatre S.

RED BAY MUN ARPT: Closed-const. (7-26)

ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)

**CHANDLER-RIGGS ARPT: ABANDONED. (6-11)

COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.

HASSAYAMPA-RADIO: VOR/DME usable to 30 n mi from 30°-70°, 240°-255°, 320°-345° and 40 n mi from 70°-85° at MEA. (3-30)

★PHOENIX-SKY HARBOR ARPT-TOWER: Aug 15, freq 348.6 mc cmsnd. FLD: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, except prior permission airport manager. Construction in progress South of taxiway 1 from runway 8L to trans ramp and South to arpt entrance road.

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185°, 39 n mi at 10,000'.

SALOME, SITE #27B, LAX-PHX: Caution-puncture vines. (6-18)

SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)

**SEDONA-OAK CREEK ARPT: New fld. Type: P. Lat 34-50, long 111-47. Lctn: 2 mi SE. Elev: 4800'. No. of rnwys: 1. Lngst rnwy & facs: 38. Fuel: F2. (5-7)

**TES NOS PAS ARPT: Elev: 5450'. (7-16)

TUCSON-RADIO: VOR/DME coverage: 360°-050° 35 n mi 11,000', 050°-060° 22 n mi 11,000'; 060°-075° 35 n mi 11,000, 075°-085° 21 n mi 11,000'; 090°-170° 40 n mi 12,000'; 225°-230° 40 n mi 7,000'; 330°-345° 35 n mi 11,000'; 345°-360° 25 n mi 11,000'. (7-17)

ARIZONA: TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF- steers unrel beyond 35 mi at or below the following alt: (a)NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. Radio contact with Yuma AF tower necessary until further notice. Tower trans civil acft 119.1mc, 344 kc. Rnwy 3-21 clsd const. Rnwy 17-35 clsd days.

ARKANSAS: ARKADELPHIA MUN ARPT: Unsafe - due to holes in lndg areas. (7-5)

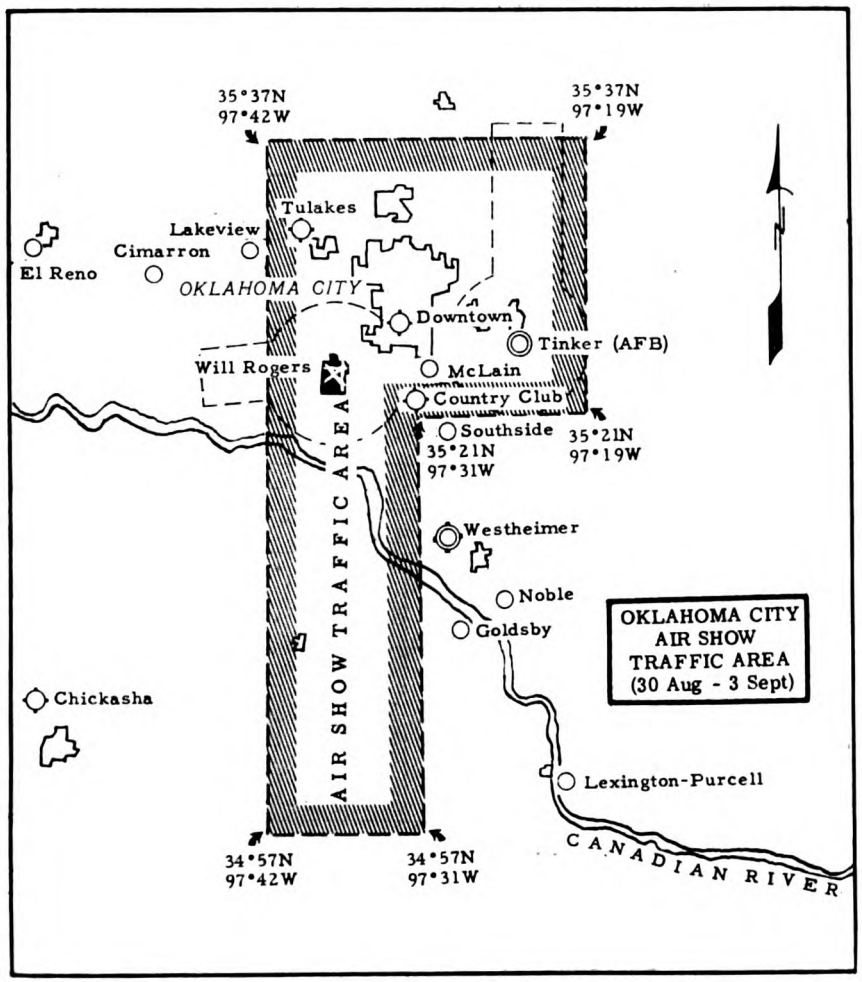
Use outside taxiway in front of large hangar near entrance. Equip on hangar ramp. Cranes 50' to 60' high operg intermittently approx 1000' off E end rnwy 9R-27L. From 1600-2100Z daily three-hour min ground delay on mil acft due priority airlift. (7-28)

SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from tower-caution. (6-7)



OKLAHOMA CITY AIR SHOW TRAFFIC AREA

The National Aircraft Show will be in progress at Will Rogers Municipal Airport, Oklahoma City, Oklahoma, from 1100CST to 1700CST on September 1, 2, and 3. On August 30 and 31, between 1100CST and 1700CST, air show rehearsal maneuvers will be conducted in this area.

The above will involve extensive high speed and acrobatic military activity operating in accordance with VFR in the air show corridor, (See below), from the surface to 45,000' MSL. Additionally, a stage and orbit area, (See below), will be occupied by high speed military aircraft operating from the surface up to and including 4,000' MSL.

It is suggested that all civil aircraft and military aircraft not participating in the air show avoid the air show corridor.

Tinker AFB will be closed to all aircraft other than aircraft participating in the air show from 1200 CST August 29 to 1200 CST September 4.

Will Rogers Field, Oklahoma City, Oklahoma, will be closed to all itinerant aircraft, except Scheduled Airlines, between the hours of 1100 CST to 1700 CST on August 30, 31, September 1, 2, and 3, 1956 while the National Aircraft Show is in progress.

We strongly urge that all those planning to attend the National Aircraft Show plan their departure time to arrive in Oklahoma City prior to 1100 CST.

During the Air Show hours, military aircraft participating in the show will be orbiting within the staging and orbiting area (See below). We urge acute surveillance be maintained at all times while in this area.

All aircraft landing in Oklahoma City prior to Air Show hours that do not have prior reservations at Will Rogers Field should land at Tulakes Airport and/or Cimmarron Field, Oklahoma City. Transportation from these airports to Will Rogers Field will be provided, as well as aircraft service.

Staging and Orbiting Area:

35-37N 97-19W, 35-32N 96-40W, 35-06N 96-22W, 34-00N 96-05W, 33-47N 97-00W, 33-55N 98-30W, 34-14N 99-20W, 35-12N 99-20W, 35-19N 97-42W, 35-37N 97-42W, 35-37N 97-19W.

Air Show Corridor:

35-37N 97-19W, 35-21N 97-19W, 35-21N 97-31W, 34-57N 97-31W, 34-57N 97-42W, 35-37N 97-42W, 35-37N 97-19W.

(21 Aug 1956)

Revisions to Instrument Approach Procedures

INSTRUMENT LANDING SYSTEM PROCEDURES

If an ILS instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

GROUND CONTROLLED APPROACH SYSTEM PROCEDURES

If a GCA instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with GCA to final authorized landing minimums the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a PAR approach or, for more than 30 seconds during an ASR approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

INSACS = Interstate Airway Communications Station/s (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSACS. (C) The station identification is monitored continuously by the communicator at the associated INSACS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSACS. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSACS, and located too distant from INSACS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)=Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
• = Automatic voice identification
[redacted] Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . .. Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-drectional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and voice.
T . . . . . Teletype
TASR . . . Terminal Area Surveillance Radar
TVOR. . . Low power VOR (no standby equipment) located on airport
TX. . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same INSACS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 23, 1956

For sale by Superintendent of Documents, U. S. Government Printing Office, Washington 25, D.C. - Prices: annual subscription $2.75, domestic; $1.00 additional for foreign mailing; individual copies vary; this issue 25 cents.

RADAR AVAILABLE : How and Where

(4 Sept 1956)

PAR - Precision Approach Radar. ASR = Airport Surveillance Radar. GCA - Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. TASR = Terminal Area Surveillance Radar RAPCON = Radar Approach Control Center

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency, from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR FLIGHT ADVISORY SERVICE: If radar advisory service is desired, the pilot of an aircraft will request such service through the appropriate Air Route Traffic Control Center, using normal en route communications facilities. ARTC will determine if service can be provided and will request pilot to change to appropriate frequency for direct communication with radar. Radar station will be identified by "THIS IS AIR FORCE RADAR ADVISORY". All suggested vectors to circumnavigate storm areas will be of advisory nature and do not relieve pilot of responsibility for safety of aircraft. If advisory service cannot be furnished for any reason, the procedure word "UNABLE" will be used. This will terminate radar advisory service to the aircraft without further explanation. This service will be available in the following ARTC Flight Advisory Areas; Chicago, St. Louis, Minneapolis, Kansas City, Albuquerque, San Antonio, Ft. Worth, Oakland, Denver, Great Falls, Los Angeles, and the area immediately around Knoxville, Tenn.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

NOTICES TO AIRMEN
SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .--.-.-.-.-... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON INSACS COMMUNICATIONS CHANNELS: If excessive interference is noted on INSACS VHF or UHF simplex frequencies, pilots should request the INSACS to reply on the VOR voice channel. This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, regardless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice

---

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight. (4 Sept 1956)

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200-5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights operating at an altitude of at least 1000 feet on top, either at pilot's request or because of an ATC clearance, shall conform to the following position reporting procedures:

1. Flights along airways, regardless of actual altitude, shall report only over those fixes that are compulsory reporting for flights at all altitudes unless additional reports are required by ATC.

2. Flights operating on a direct route, regardless of actual altitude, shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and also over each compulsory reporting point along the route for flights operating at all altitudes unless additional reports are required by ATC.

Pilots filing direct route flight plans requesting an altitude of at least 1000 feet on top should designate the route of flight by appropriate fixes approximately 200 miles apart over which they plan to report.

✓ DIRECTORY OF AIRPORTS: The Directory of Airports, scheduled to appear in today's issue of the Airman's Guide, will appear instead in Volume 11, No. 15, dated October 2, 1956.

OAKLAND OCEANIC FLIGHT INFORMATION REGION: Effective September 1, 1956 the Oakland Oceanic Flight Information Region will become the Oakland Oceanic Control Area. The Oakland Oceanic Control Area will be bounded by coordinates: 40-00N, 127-00W direct to 30-45N, 120-50W direct to 22-00N, 138-00W direct to 35-50N, 138-00W direct to 40-00N, 130-00W direct to the point of origin. Within the Oakland Oceanic Control Area a standard altimeter setting of 29.92 will be used Lower limit of control area will be 5000'. The minimum assignable alt will be 6000'. 1000' vertical separation up to 29,000' will be applied. 2000' vertical separation above 29,000' will be applied. 20 minutes longirudinal separation will be applied. 140 nautical miles lateral separation will be applied between center lines of ATC approved tracks. The air traffic control approved track assigned will include that area 50 n miles each side of the specified track and will be available for the pilot's use without reclearance from ATC. At any time a flight determines that it is outside of this approved track area corrective action should immediately be taken by the pilot to return to the approved track area. Flight plans should be filed in sufficient detail to delineate turning points, altitude change points, and point of entry at destination. Flight plans between Honolulu and the mainland will indicate at least one latitude and longitude point.

✓ SEATTLE OCEANIC FLIGHT INFORMATION REGION: Effective September 1, 1956, the Seattle Oceanic Flight Information Region will become the Seattle Oceanic Control Area. The Seattle Oceanic Control Area will be bounded by coordinates: 40-00N, 127-00W; direct to 45-00N, 126-30W direct to 48-20N, 128-00W direct to 48-20N, 160-00W direct to 40-00N, 160-00W direct to 40-00N, 142-00W direct to 35-50N, 138-00W direct to 40-00N, 130-00W direct to point of origin. Within the Seattle Oceanic Control Area a standard altimeter setting of 29.92 will be used. Lower limit of control area will be 5000 ft. The minimum assignable altitude will be 6000 ft. 1000 ft vertical separation up to 29,000 ft will be applied. 2000 ft vertical separation above 29,000 ft will be applied. 20 minutes longitudinal separation will be applied. 140 nautical miles lateral separation will be applied between center lines of ATC approved tracks. The air traffic control approved track assigned will include that area 50 nautical miles each side of the specified track and will be available for the pilot's use without reclearance from ATC. At any time a flight determines that it is outside of this approved track area corrective action should be immediately taken by the pilot to return to the approved track area. There is no change in present hourly position reporting requirements. Flight plans should be filed in sufficient detail to delineate turning points, altitude change points, and points of entry at destination. Flight plans between Honolulu and the mainland will indicate at least one latitude and longitude point.

✓ PITTSBURGH-WASHINGTON CENTER BOUNDARY: Concurrent with the redesignation of Victor 92 based upon the commissioning of Grantsville, Maryland, VOR, reestablish the boundary on Victor 92 at the N edge of Victor 44.

✓ COMPULSORY AND NON-COMPULSORY POINT: The following reporting point is renamed as follows, effective immediately:

(1) COLUMBIA, N. J. INTSXN - the intsxn of the NE course Allentown, Pa. LFR and the NW course of the Newark, N. J. LFR. (Formerly Stroudsburg, Pa. Intsxn.) (Non-compulsory above 15,200 ft.) This intersection is both compulsory and non-compulsory reporting point.

✓ ON-REQUEST REPORTING POINTS: The following on-request reporting points are designated, redesignated or cancelled and shall become effective as indicated:

DESIGNATE: Effective immediately.

(1) MUMFORD, N.Y. VHF INTSXN - the intsxn of the 090° mag radial of the Buffalo VOR and the 240° mag radial of the Rochester VOR.

REDESIGNATE: Effective September 20, 1956.

(1) LUCIEN VHF INTSXN - the intsxn of the 168° mag radial of the Shreveport VOR and the 084° mag radial of the Gregg County VOR.

CANCEL: Effective immediately.

(1) DELAWARE, OHIO INTSXN - the intsxn of the Mansfield, Ohio VOR 221° mag radial and the 320° mag radial of the Columbus, Ohio VOR.

(2) GLENFORD, OHIO INTSXN - the intsxn of the Mansfield, Ohio VOR 179° mag radial and the 120° mag radial of the Columbus, Ohio VOR. MRA 3000'.

(3) IRWIN, OHIO INTSXN - the intsxn of the Columbus, Ohio VOR 283° mag radial and the Springfield, Ohio MH fac 225° bearing. MRA 2700'.

(4) MARION, OHIO INTSXN - the intsxn of the Mansfield, Ohio VOR 243° mag radial and the Columbus, Ohio VOR 338° mag radial.

(5) MARYSVILLE, OHIO INTSXN - the intsxn of the Dayton, Ohio VOR 061 mag radial and the Columbus, Ohio VOR 305° mag radial.

(6) SIDNEY, OHIO INTSXN - the intsxn of the Columbus, Ohio VOR 283° mag radial and the Dayton, Ohio VOR 019° mag radial.

(7) SUNBURY, OHIO INTSXN - the intsxn of the Columbus, Ohio VOR 338° mag radial and the Mansfield, Ohio VOR 220° mag radial.

(8) URBANA, OHIO INTSXN - the intsxn of the Columbus, Ohio VOR 283° mag radial and the Dayton, Ohio VOR 061° mag radial.

✓ AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide, Volume 11, No. 12, dated August 21, 1956, as follows:

(1) Page 8 - On-Request Reporting Points, Under Designate: Correct Item 24 ISLE OF PALMS (Integrated) INTSXN by adding "MRA 2400 ft. "; and Item 25 ISLE OF PALMS VHF INTSXN by adding: "MRA 2400 ft.".

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 23 - Prescott, Ariz. - Correct WB telephone number to read: 1337.
(2) Page 23 - Little Rock, Ark. - Correct WB telephone number to read: FRanklin 4-0094*
(3) Page 24 - Jacksonville, Fla. - Correct CAA telephone number to read: ELgin 5-3601.
(4) Page 25 - Jackson, Miss. - Correct WB telephone number to read: 4-4454*
(5) Page 27 - Portland, Oreg. - Correct CAA telephone number to read: ATlantic 1-3013.
(6) Page 27 - Florence, S. C. - Correct WB telephone number to read: 6973*
(7) Page 27 - Kingsport, Tenn. (Tri-City) - Correct WB telephone number to read: 33-4310.
(8) Page 27 - Lubbock, Tex. - Correct WB telephone number to read: POrter 3-0750*.
(9) Page 29 - Bismarck, N. Dak. - Correct ASDO telephone number to read: CApital 3-3414.
(10) Page 29 - Portland, Oreg. - Correct ASDO telephone number to read: ATlantic 8-1192 and ATlantic 8-2216.
(11) Page 107 - (Ground) - Tampa, Fla. (Intnl Arpt.) - Delete rcvr check point.

TOWER FREQUENCIES ON C&GS AERO CHARTS: Control towers which guard 122.7 mc instead of 122.5 mc for VHF communication with private aircraft will be so indicated by note in the "Remarks" column of the aerodrome tabulations on the back of the appropriate Sectional and Local Aeronautical Charts of the Coast and Geodetic Survey. Such notes now appear on the Chicago Sectional dated June 15, 1956, and the New York Sectional dated June 28, 1956, and will be shown on the next scheduled printings of the other charts concerned.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31)	Month and day item was reported.
**	New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★	New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE	Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.
BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd.
BIRMINGHAM-RADIO: Aug 20, VOR shut down - relctn. (8-21)
BIRMINGHAM ARPT: Caution-traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm closed to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.
HUNTSVILLE-RADIO: VOR radials 005°-030° unusable due to roughness and bends. (5-11)
HUNTSVILLE MUN ARPT: Caution - rnwy 18-36 under const.
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft lndg and taking-off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. E/W rnwy clsd to all military acft-const. Easternmost 5000' avail days, easternmost 6000' avail sunset to sunrise to civil acft. Western end mrkd by flags-days, lgts-ngts. (5-15)
MT. MANNING BEACON SITE 28, MEM-TPA: Effective Aug 31, bcn will be discontd. (8-6)
MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise

ALABAMA: MUSCLE SHOALS-RADIO: from stn n ot usable beyond 15 n mi acct scalloping and bends. (4-22)
**OZARK ARPT: New fld. Type: L. Lat 31-27-30, long. 85-37-15. Lctn: 2.0SE. Elev: 358'. No. of rnwys 1 - 2000' x 200' -sod. Lngst rnwy & facs: 20. Remarks: Drive-in theater S.
RED BAY MUN ARPT: Clsd-const. (7-26)
ARIZONA: AJO ARPT: Beacon lights inoperative (6-18)
**CHANDLER-RIGGS ARPT: ABANDONED. (6-11)
**CHLORIDE-SHEP'S PLEASANT VALLEY: Delete from records.
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)
GILA BEND-SPECIAL NOTICE: Captive balloons anchored on 1500 ft cables will be flown 1100 Mon thru 1100 Fri on 24 hour basis at Dateland and Gila Bend Aux AFB. Lgtd by one red light ngts. Extreme caution advised at low alts near these locations. (8-23)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial. (8-23)
HASSAYAMPA-RADIO: VOR/DME usable to 30 n mi from 30°-70°, 240°-255°, 320°-345° and 40 n mi from 70°-85° at MEA. (3-30)
**KINGMAN-SEARCHLIGHT FERRY ARPT: Delete from records.
**PARKER ARPT: Delete from records.
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. Const in progress S of taxiway 1 from rnwy 8L to trans ramp and S to arpt entrance road.
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185°, 39 n mi at 10,000'.
SALOME, SITE #27B, LAX-PHX: Caution-puncture vines. (6-18)
SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)
**SEDONA-OAK CREEK ARPT: New fld - Type: P. Lat 34-50, long. 111-47. Lctn: 2 mi SE. Elev: 4800'. No. of rnwys: 1. Lngst rnwy & facs: 38. Fuel: F2. (5-7)
TUCSON-RADIO: VOR/DME coverage: 360°-050° 35 n mi 11,000'; 050°-060° 22 n mi 11,000' 060°-075° 35 n mi 11,000'; 075°-085° 21 n mi 11,000'; 090°-170° 40 n mi 12,000'; 225°-230° 40 n mi 7,000'; 330°-345° 35 n mi 11,000'; 345°-360° 25 n mi 11,000'. (7-17)
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.
YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)
YUMA-COUNTY ARPT: B-45 acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. (8-27)
ARKANSAS: **ARKADELPHIA, #24, DAL-LOU: Permanently discontinued. (8-15)
EL DORADO-RADIO: DME 2000' MSL coverage 43.5 mi 325° thru N to 225°; 2000' MSL coverage 35 mi 225° thru W to 325°. (3-30)
FT. SMITH-RADIO: About Sept 5, VOR will be shut down until approx Oct 5, modernization.
HARRISON ARPT: Fld clsd ngts.
NORTH LITTLE ROCK-CENTRAL ARPT: Fld closed to all operns- const. (3-1)
**PRESCOTT ARPT: Abandoned. (8-27)
TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends.
WALNUT RIDGE-RADIO: VOR radials 290°-320°, 120°-150° and 200°-210° unusable acct bends & course roughness. (10-14) About Sept 5, VOR will be shutdown until approx Oct 5. (8-2)
CALIFORNIA: **ADELANTO-GREY BUTTE ARPT: Abandoned. (5-28)
**ALTURAS ARPT #1: 50' TV antenna on top of bldg on NE apch of main rnwy. (8-21)
AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)
**BAGDAD ARPT: Delete from records.
BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)
CAMARILLO-RADIO: All courses have multiples. (6-17)
CHINO PACIFIC ARPT: Clsd to all acft xcpt on official business PAC Airmotive Co. Equip on or near rnwys-caution. Rnwy 3-21 under const both ends. Rnwy 8-26 clsd.
CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.
CRESCENT CITY-DEL NORTE COUNTY ARPT: Entire length of rnwy 11 usable and free of drifting sand. (6-15)
DAGGETT-RADIO: VOR flgt-checked on arwy radials only.
ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.
**EUREKA ARPT: 345' lgtd rdo twr erected 2.1 n mi SE(145°T) at lat 40-45, long 124-10. (8-21)

CALIFORNIA: FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000; 280°-320°, 26 n mi at 11,000'. About Sept 25, VOR will be shut down until approx Oct 10. During that period, the following arwys will not be usable: V-107 LAX-Maricopa Int; V-209 LAX -Int FIM 296°, SBA 013°; V-12 SBA-Saugus Int. (8-23)

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000';30°-120°, 35 n mi at 9000;120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRESNO AIR TERMINAL-TOWER: Aug 13, lclzr and glide slope shut down - relctn. (8-17) FLD: Exercise extreme caution in vcnty, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Extensive const and hvy equip both ends rnwy 11-29, apch areas and adj taxiways. First 250' rnwy 11 clsd-usable length 6750'. Extreme caution apch end rnwy 11 large equip working in rnwy extension area. (7-5)

**FURNACE CREEK ARPT: (formerly Furnace Creek, 17, RIV-DLS). Reinstated. Type: L. lat 36-28, long. 116-52. Lctn: 2.0 NW. Elev: 211'. No. of rnwys: 1. Lngst rnwy & facs: h57. (8-22)

GLENDALE-RADIO: About Sept 14, ident homing fac will be changed from GLN to GCE.

**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress.

KLAMATH-McBETH ARPT: Closed. (6-13)

**LAKE HUGHES-SKY CASTLE: Abandoned. (6-25)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340° 7000'; 340°-040°,12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (6-16) ILS and LF rng during VFR conditions heavy simulated instrument apch traffic. (10-25) July 23, VOR shut down until approx Sept 5 - modernization. (8-23)

LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during ** arpt const. (8-18) FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail. for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd - const. 6200' rnwy 30 avail lndgs and take-offs. Rnwy 12 clsd. (6-27) N 800' apch end rnwy 16L perm clsd.

LOS ANGELES-RADIO-SPECIAL NOTICE: July 3, transcribed weather bdcasts oper test basis. Hrs opern: 0800-1800. Manual bdcast continues on VOR and both VOR & LF combined. (7-16)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (7-16) About Sept 5, VOR will be shut down until approx Sept. 24. During this period the following arwys will not be usable: V-23 Long Beach - White Oaks Int;V-16 Ontario-LosAngeles; V-107,209 Fillmore-Los Angeles: V-201 Corbina Int-Berry Int; V-210 Daggett-Los Angeles.

LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx. 4000' W of Sepulveda Blvd open VFR tfc only. Equip. on and adj to const areas. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL approx the intersection of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu Intersection in VFR conditions making a track which approximtes the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LF rng and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10)

LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700.

**LUCERNE VALLEY-RABBIT DRY LAKE ARPT: Delete from records.

**MOJAVE-MYER ARPT: Abandoned. (5-28)

NATIONAL CITY ARPT: Extensive const around arpt. 75' obstns E end of rnwy. (7-19)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500 ft will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Effect. Sept 1, military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisoo Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only. (8-20)

OAKLAND INTN'L ARPT: Dredging and clam shell equip working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area.

OCEANSIDE-RADIO: VOR coverage 310°-020°, 35 n mi at min en route alt. (10-10)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTN'L ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as mrkd by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt NAG 196th fighter interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)

OXNARD AFB-RADIO USAF VHF/DF unreliable below 12,000' within 50 n mi. (4-20)

WEST VIRGINIA: CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000'; 270°-330°, 26 n mi at 2500'. Moderate roughness all azimuths.
CHARLESTON-KANAWHA COUNTY ARPT-TOWER: ILS glide slope 335.0 mc operg on test basis. (6-25) About October 15, lclzr and glide slope will be shut down until approximately October 22. (8-29)
ELKINS-RADIO: LF rng has multiples and fades all courses. (5-31) DME coverage 35°-95°, 43 n mi at 6000'; 95°-120°, 35 n mi at 6800', 120°-165°, 26 n mi at 6800'; 165°-195°, 35 n mi at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'. (7-1)
ELKINS MUNICIPAL ARPT: Rnwy lgts 4-22 inop. (7-25)
MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'.
MARTINSBURG ARPT: Serv fac avail 0800 until sunset. 28' hangar 500' E of centerline and 1100' from S end rnwy 35, lgts. (6-7) Factory bldg 40' high under const 1000' E of S end eng 35 in flood lgtd area. (9-13) Const under way end of rnwy 26 and along entire length of rnwy 8 and 26, men and equip. on fld. obstn mrkd. (5-3)

WEST VIRGINIA: MORGANTOWN-RADIO: LF rng has multiples and fades all courses.
PARKERSBURG-WOOD COUNTY ARPT: Caution - dip midway rnwy 16-34 covering full width of rnwy.
WISCONSIN: **BEAVER DAM SEAPLANE BASE: ABANDONED. (7-30)
EAU CLAIRE-RADIO: Aug 7, VOR shut down until approx Dept 30 - modernization. (8-8)
LA CROSSE-RADIO: VOR radials 320° to 335° unreliable 20 to 30 n mi from stn. (11-3)
LONE ROCK-RADIO: July 9, VOR shut down until approx Sept. 15 - modernization. (8-27)
MADISON-TRUAX FLD: Caution crossing hwy lndg rnwys 22, 26, 31. E taxiway N of Admin Bldg perm clsd to all acft over 10,000 lbs. Sod unsafe. Apch lgts rnwy 36 inop. Taxiway 6 lctd between S end of rnwy 18 and AF ramp clsd-const-marked with yellow barricades and flares ngts. (4-23)
MILWAUKEE-GENERAL MITCHELL FLD-TOWER: All acft apchg Milwaukee with intentions to land will, durg VFR conditions and if equip. with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and altitude. (5-10)
FLD: Rnwy 7L-25R open days only. Obstn lgts on apch end of rnwy 13 are obscured by trees. Parking facilities lmtd-itinerant military acft on unofficial business may find parking facilities unavailable. Avoid confusion of rnwy 1 with parallel taxiway to left. (8-15)
**MILWAUKEE-MAITLAND FLD: ABANDONED.
**STOUGHTON-NELSON ARPT: ABANDONED.
WYOMING: CASPER-NATRONA CO. ARPT-TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs.
FLD: Caution all acft entering tfc pat. occasional jet acft opern with pickup and dropping of tow targets. (4-29)
CHEYENNE ARPT: Overrun lgts rnwy 8-26 inop. (5-24) Apron adj term bldg clsd-const. Men, equip on fld-days. (7-14)
**GILLETTE ARPK: ABANDONED. (8-3)
GILLETE ARPT: 50-75' W shoulder 1500' from N end N/S strip soft - clsd to hvy acft.
JACKSON ARPT: E/W rnwy closed - fence const across rnwy just W of N/S rnwy. Small acft may use E end of E/W rnwy in case of emerg, but at own risk. N/S rnwy clsd-const. Use new auxiliary 150' x 5400' strip E of N/S rnwy. (3-15)
KEMMERER ARPT: Caution-reseeded and soft. (6-22)
LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.
RIVERTON ARPT: Men and equip. on fld. 5000' W end rnwy 28 surfaced and availabe. Remainder arpt closed. (4-12)
ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'.
ROCK SPRINGS-RADIO: ILS glide slope has lgt to moderate roughness between OM and LFR.
ROCK SPRINGS ARPT: Caution - first 500' NW end NW/SE rnwy clsd. - marked.
SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.
TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip. on fld. Use extreme caution.
PUERTO RICO: SAN JUAN-ISLA GRANDE ARPT: First 500' W end rnwy 9R-27 unusable. Daylgt operns proceed with caution-ngt operns observe threshold lgts. Use outside taxiway in front of large hangar near entrance. Equip. on hangar ramp. Cranes 50' to 60' high operg intermittently approx 1000' off E end rnwy 9R-27L. From 1600-2100Z daily three-hour min ground delay on mil acft due priority airlift. (7-28)
SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from twr - caution. (6-7)

POST - DEADLINE DATA

Because of the Labor Day holiday, the following Post-Deadline Data has been set up to provide the latest up-to-the minute NOTAMS, while still maintaining our publication schedule.

ALABAMA: MONTGOMERY-DANNELLY FLD-TOWER: About Oct 16, ILS glide slope, MM and LMM will be shut down until approx Jan 1-relctn. Lclzr, OM and LOM will remain in operation. (8-29)
CALIFORNIA: OCEANSIDE-RADIO: About Sept 10, VOR will be shut down until approx Sept. 25. (8-30)
SANTA PAULA ARPT: Work in progress S side of fld. Caution-trucks imdtly S of rnwy. Area S of rnwy soft, muddy. (9-1)
FLORIDA: **PENSACOLA-SPECIAL NOTICE: 163'(163'MSL) lgtd derrick erected 6.5 n mi SE Pensacola NAS at lat 30-24-48, long 87-04-23. (3-27) 248'(256'MSL) lgtd rdo twr erected 3.3 n mi E of NAAS Corry Fld at lat 30-24-18, long 87-12-56.
IOWA: DES MOINES-RADIO: About Sept 17, the lclzr and glide slope facility will be shut down until approx October 17.
KANSAS: WICHITA ARPT-TOWER: About Sept 15, apch control fac will be moved to McConnell AFB. Wichita apch control will trans following freq: 332kc;113.8, 120.1, 121.5 124.5, 125.7, 134.1, 136.8, 137.88, 142.02, 225.4, 263.0, 270.6, 289.4, 335.8, 348.6, 379.4, 243.0mc; rcvs on 3023.5kc, 120.1, 121.5, 122.5, 124.5, 125.7, 134.1, 136.8, 137.88, 142.02, 225.4, 263.0, 270.6, 289.4, 335.8, 348.6, 379.4, 243.0 mc. Wichita RAPCON ASR radar will be cmsnd at the same time on a test basis only and will be used for trng purposes.
MASSACHUSETTS: HOPEDALE-DRAPER ARPT: 155' lgtd rdo twr erected 1.6 n mi N at lat 40-08-11, long 71-30-49. (9-2)
MICHIGAN: **BATTLE CREEK-KELLOGG ARPT: 241'(1241'MSL) lgtd microwave antenna erected approx 11 n mi NNE at lat 42-29-27, long 85-11-28. (8-30)
RAPID RIVER-DEL'S AIRSTRIP: Closed. (8-29)
MISSISSIPPI: **CORINTH, 7-MEM-TPA ARPT: 323' (863'MSL) lgtd rdo twr erected 3.5 n mi NE at lat 34-56-10, long 88-32-02. (9-3)
NEW JERSEY: **WOODBINE ARPT: Two 311' twrs lctd approx 6 mi SE now lgtd with red bcns 30 FPM.
OKLAHOMA: **ANADARKO ARPT: 377'(1557'MSL) lgtd rdo twr erected 2.6 n mi NE at lat 35-05-05, long 98-13-50. (8-28)
SOUTH DAKOTA: RAPID CITY ARPT: About Sept 8, NW/SE rnwy will be closed-resurfacing.
TEXAS: **MIDLAND-AIR TERMINAL: 500'(3356'MSL) lgtd rdo twr erected 6.5 n mi ENE (80°T) at lat 31-57-43, long 102-04-00.

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

AGW	Agnew, Calif., VOR (Assignment)
DFI	Defiance, Ohio, Bryan-Defiance Meml Arpt (Assignment)
FCK	Furnace Creek, Calif., Intermediate Field (Deletion)
GUY	Guymon, Okla., Guymon Airport (Assignment)
LAF	Lafayette, Ind., Purdue University Arpt (Name change)
LBL	Liberal, Kans., Liberal Arpt (Assignment)
PFC	Pacific City, Oreg., Pacific City Arpt (Assignment)
AA	Alice, Ont. (Assignment)
FZ	Fitzroy Harbour, Ont. (Assignment)
GC	South Gloucester, Ont. (Assignment)
HN	Haley, Ont. (Assignment)
OA	Opemiska, Que. (Assignment)
RJ	Roberval, Que. (Assignment)

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS: IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions (television towers, smoke stacks, etc) which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. When the list does not appear in the Guide, all new obstructions will be carried as two-starred items in the NOTAMS. The list will be brought up to date each time it is issued;newly added or changed material will be indicated by arrows.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position, height and top elevation above MSL of these new obstructions can be taken from the list given below. New obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

NOTICES TO AIRMEN Page 2

VOL. 11 ,NO. 14 . . . SEPTEMBER 18, 1956

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e. g. Long Beach omnirange (Voice) .-..- -.-.. (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON INSACS COMMUNICATIONS CHANNELS: If excessive interference is noted on INSACS VHF or UHF simplex frequencies, pilots should request the INSACS to reply on the VOR voice channel. This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, regardless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 23, 1956

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

✓ POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.

2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of at least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

✓ IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

TOWER FREQUENCIES ON C&GS AERO CHARTS: Control towers which guard 122.7 mc instead of 122.5 mc for VHF communication with private aircraft will be so indicated by note in the "Remarks" column of the aerodrome tabulations on the back of the appropriate Sectional and Local Aeronautical Charts of the Coast and Geodetic Survey. Such notes now appear on the Chicago Sectional dated June 15, 1956, and the New York Sectional dated June 28, 1956, and will be shown on the next scheduled printings of the other charts concerned.

✓ CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective October 18, 1956, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) VOR civil airway No. 1 (Charleston, S. C. to New York, N. Y.), is amended by changing the portion which reads: "to the Idlewild, N.Y. omnirng stn." to read: "Idlewild, N. Y. omnirng stn; intsxn of the Idlewild omnirng 359° T and the Wilton omnirng 214° T radials; to the Wilton, Conn. omnirng stn."

(2) VOR civil airway No. 3 (Key West, Fla. to Presque Isle, Me.), is amended by changing the portion which reads: "Brunswick, Ga omnirng stn, including a W alternate via the intsxn of the Jacksonville omnirng 304° T and the Brunswick omnirng 203° T radials;" to read: "Brunswick, Ga. omnirng stn, including a W alternate via the intsxn of the Jacksonville omnirng 304° T and the Brunswick omnirng 216° T radials;"

(3) VOR civil airway No. 6 (Oakland, Calif. to New York, N. Y.), is amended by changing all between the Rock River, Wyo. omnirng stn and North Platte, Nebr. omnirng stn to read: "Rock River, Wyo. omnirng stn, including a N alternate; intsxn of the Rock River omnirng 108° T and the Sidney omnirng 292° T radials; Sidney, Nebr. omnirng stn; North Platte, Nebr. omnirng stn, including a N alternate;" and by changing all after the Selinsgrove, Pa. omnirng stn to read: "Selinsgrove, Pa. omnirng stn; point of intsxn of the Selinsgrove omnirng 077° T and the Williamsport, Pa. omnirng 146° T radials; Allentown, Pa. omnirng stn; to the point of intsxn of the Allentown omnirng 103° T and the Newark, N. J. ILS lclzr SW course."

(4) VOR civil airway No. 8 (Long Beach, Calif. to Washington, D. C.), is amended by changing the portion which reads: "Akron, Colo. omnirng stn, including a N alternate and also a S alternate via the intsxn of the Denver omnirng 101° T and the Akron omnirng 242° T radials; Imperial, Nebr. omnirng stn, including a S alternate via the intsxn of the Akron omnirng 090° T and the Imperial omnirng 237° T radials;" to read: " Akron, Colo. omnirng stn, including a S alternate via the intsxn of the Denver omnirng 101° T and the Akron omnirng 242° T radials; Imperial, Nebr. omnirng stn, including a N alternate from the Denver omnirng stn to the Imperial omnirng stn via the intsxn of the Denver omnirng 061° T and the Imperial omnirng 271° T radials and also a S alternate via the intsxn of the Akron omnirng 090° T and the Imperial omnirng 236° T radials;"

(5) VOR civil airway No. 11 (Memphis, Tenn. to Detroit, Mich.), is amended by changing the portion which reads: "Paducah, Ky. omnirng stn; Evansville, Ind., omnirng stn;" to read: "Paducah, Ky. omnirng stn; intsxn of the Paducah omnirng 039° T and the Evansville omnirng 227° T radials; Evansville, Ind. omnirng stn;"

(6) VOR civil airway No. 17 (Laredo, Tex. to Goodland, Kans.), is amended by changing the portion which reads: "Fort Worth, Tex. omnirng stn;" to read: "Fort Worth, Tex. omnirng stn, including a W alternate from the Waco omnirng stn to the Fort Worth omnirng stn via the point of intsxn of the Waco omnirng 315° T with the Mineral Wells omnirng 198° T radials, and the Mineral Wells, Tex. omnirng stn;"

(7) VOR civil airway No. 30 (Milwaukee, Wis. to Nantucket, Mass.), is amended by changing the portion which reads: "Selinsgrove, Pa. omnirng stn; to the Allentown, Pa. omnirng stn." to read: "Selinsgrove, Pa. omnirng stn; point of intsxn of the Selinsgrove omnirng 104° T and the Allentown, Pa. omnirng 211° T radials; Colts Neck, N. J. omnirng stn; to the point of intsxn of the Colts Neck omnirng 078° T and the Idlewind, N. Y. omnirng 212° T radials."

(8) VOR civil airway No. 123 (Woodstown, N. J. to New York, N. Y.), is added to read: "From the Woodstown, N. J. omnirng stn via the point of intsxn of the Woodstown omnirng 045° T and the Coyle, N. J. omnirng 354° T radials; point of intsxn of the Idlewild, N. Y. omnirng 236° T radial and the La Guardia Arpt, N. Y. ILS lclzr S course; La Guardia Arpt, N. Y. ILS lclzr; to the Wilton, Conn. omnirng stn."

(9) VOR civil airway No. 138 (Rock River, Wyo. to Sidney, Nebr.), is amended to read: "From the Rock River, Wyo. omnirng stn via the Cheyenne, Wyo. omnirng stn, including a N Alternate via the Rock River omnirng 108° T and the Cheyenne omnirng 320° T radials; to the Sidney, Nebr. omnirng stn, including a S alternate."

(10) VOR civil airway No. 168 (Selinsgrove, Pa. to Colts Neck, N. J.), is added to read: "From the Selinsgrove, Pa. omnirng stn via the Allentown, Pa. omnirng stn; to the Colts Neck, N. J. omnirng stn."

(11) VOR civil airway No. 194 (Royston, Ga. to Norfolk, Va.), is amended by changing all before the Charolltte, N. C. omnirng stn to read: "From the point of intsxn of the Royston omnirng 270° T and the Norcross, Ga. omnirng 054° T radials via the Royston, Ga. omnirng stn; point of intsxn of the Royston omnirng 074° T and the Spartanburg, S. C. omnirng 148° T radials; Charlotte, N. C. omnirng stn;"

CONTROL AREAS: (1) VOR civil airway No. 123 (Woodstown, N. J. to New York, N. Y.), is added to read: "All of VOR civil arwy No. 123."

(2) VOR civil airway No. 138 (Rock River, Wyo. to Sidney, Nebr.), is amended to read: "All of VOR civil arwy No. 138, including a N alternate and a S alternate."

(3) VOR civil airway No. 148 (Thurman, Colo. to North Platte, Nebr.), is amended to read: "All of VOR civil arwy No. 148."

(4) VOR civil airway No. 150 (Sacramento, Calif. to Reno, Nev.), is amended to read: "All of VOR civil arwy No. 150."

(5) VOR civil airway No. 168 (Selinsgrove, Pa. to Colts Neck, N. J.), is added to read: "All of VOR civil arwy No. 168."

CONTROL AREA EXTENSIONS: (1) (Burbank, Calif.), is amended by changing the name of facility "Canoga Park, Calif. nondirectional radio bcn" to read: "Burbank, Calif. outer marker".

(2) (Owensboro, Ky.), is added to read: "That airspace bounded on the N by VOR civil arwy No. 4, on the SW by VOR civil arwy No. 7 and on the SE by a line extending through points at lat 38-04-20, long. 86-41-20 and lat 37-22-00, long. 87-09-40."

(3) (Fairbanks, Alaska), is amended to read: "That airspace within a 25 mile radius of Ladd Air Force Base, Fairbanks, Alaska, and within 5 miles either side of the E course of the Fairbanks rdo rng extending to a point 25 miles E of the Chena, Alaska, nondirectional rdo bcn, excluding the portion which overlaps restricted area (R-345)."

(4) (Oscoda, Mich.), is amended to read: "That airspace within a 30 mile radius of Wurtsmith AFB, Oscoda, Mich., excluding the portions which overlap Restricted areas (R-91) and (R-491)."

(5) (Midway Island), is amended to read: "All of the airspace from 700' upward within a radius of 100 nautical miles of the Midway Naval Station centered at lat 28-12-00N, long. 177-22-00W."

(6) (Johnston Island), is revoked.

(7) (Iwo Jima, Volcano, Islands), is added to read: "All of the airspace from 700' upwards within a radius of 100 nautical miles of the Iwo Kima nondirectional rdo bcn located at lat 24-47-00N, long. 141-18-00E."

(8) (Little Rock, Ark.), is amended to read: "That airspace within a 50 mile radius of the Little Rock rdo rng stn, excluding the portion below 9000' between sunrise and sunset Saturdays, Sundays only which lies within Little Rock restricted area R-134, and excluding the portion below 15,000' between sunrise and sunset daily which lies within Pine Bluff restricted area R-135."

CONTROL ZONES: (1) Three-mile radius zones is amended by deleting the following airports: Niagara Falls, N.Y., Municipal Arpt. and Santa Rosa, Calif, Santa Rosa ALF.

(2) Five-mile radius zones is amended by deleting the following airports: Elmira, N.Y. Chemung County Arpt and Watertown, N.Y., Watertown Municipal Arpt.

(3) (Buffalo, N.Y.), is amended to read: "Within a 5 mile radius of the Buffalo Mun. Arpt, within 2 miles either side of the NE course of the Buffalo rdo rng extending to the Wolcottsville FM, within 2 miles either side of the SW course of the Buffalo rdo rng extending to the Angola FM, and within 2 miles either side of the 99° T and 279° T radials of the Buffalo omnirng stn extending to a point 10 miles E of the omnirng stn."

(4) (Rochester, N.Y.), is amended to read: "Within a 5 mi radius of Rochester-Monroe County Arpt, within 2 miles either side of the E course of the Rochester rdo rng extending from the rdo rng stn to a point 10 miles E, within 2 miles either side of the ILS lclzr front course extending from the lclzr to a point 10 miles beyond the outer mrkr, and within 2 miles either side of the 171° T and 278° T radials of the omnirng extending from the omnirng stn to points 10 miles S and W of the omnirng stn."

(5) (El Toro, Calif.), is amended to read: "Within a 5 mile radius of the El Toro Marine Corps Air Stn, within a 3 mile radius of Orange County Arpt, Santa Ana, Calif. and within 5 miles either side of a line bearing 355° T extending from the El Toro rdo rng stn to Amber civil arwy No. 2 and Green civil arwy No. 5."

(6) (Pensacola, Fla.), is amended to read: "Within a 5 mile radius of the NAAS Saufley Field, Pensacola, Fla., excluding the portion which overlaps Pensacola Municipal Airport control zone (601.2163)."

(7) (Geneva, N.Y.), is revoked.

(8) (Elmira, N.Y.), is added to read: "Within a 5 mile radius of Chemung County Arpt, within 2 miles either side of the 55° T and 235° T radials of the Elmira omnirng extending from the five mile radius zone to a point 10 miles SW of the omnirng stn, and within 2 miles either side of the SW course of the Elmira rdo rng extending from the rdo rng stn to a point 10 miles SW."

(9) (Watertown, N.Y.), is added to read: "Within a 5 mile radius of Watertown Arpt and within 2 miles either side of the 215° T radial of the Watertown omnirng extending from the omnirng stn to a point 10 miles SW."

(10) (Niagara Falls, N.Y.), is added to read: "Within a 5 mile radius of the Niagara Falls Mun Arpt and within 2 miles either side of the ILS lclzr E course extending from the lclzr to a point 10 miles E of the outer marker."

REPORTING POINT: (1) Amber civil airway No. 7, Key West, Fla., to United States-Canadian Border), is amended between Florence, S. C., and Raleigh, N.C., by adding the following reporting point: "the intsxn of the N course of the Florence, S. C., rdo rng and the SW course of the Raleigh, N.C., rdo rng;" Note: To be known as Pinehurst intsxn and depicted for acft operating below 15,200'.

VOR REPORTING POINTS: (1) Domestic VOR reporting points is amended by changing the following reporting points to read: (a) Honea Intsxn - the intsxn of the Royston, Ga., omnirng 074° T radial and the Greenville, S.C., ILS lclzr S course. (b) Campbell Intsxn - the intsxn of the San Francisco, Calif. omnirng 141° T radial and a line bearing 048° T toward the Evergreen, Calif. nondirectional rdo bcn. (c) White Oaks Intsxn - the intsxn of the Bakersfield, Calif. omnirng 149° T and the Palmdale, Calif. omnirng 291° T radials.

(2) Domestic VOR reporting points is amended by revoking the following reporting point: (a) Golden Gate Intsxn - the intsxn of the Oakland, Calif. omnirng 274° T and the San Francisco, Calif. omnirng 304° T radials.

ON-REQUEST REPORTING POINTS: The following on-request reporting points are renamed, designated, redesignated or cancelled and shall become effective October 18, 1956:

NAME CHANGE:

(1) SEARCHLIGHT (VHF) INTSXN - the intsxn of the Las Vegas VOR 141° mag, Needles VOR 322° mag and the Daggett VOR 053° mag radials. (Formerly named Lake Mohave Intsxn).

NAME CHANGE AND DESIGNATION:

(1) TARPON (LAKE MICHIGAN) LFR INTSXN - the intsxn of the NE leg of the Chicago, Ill. LFR and the 292° mag bearing from the South Bend LFR. ((Formerly named Mid-Lake (Lake Michigan) Intsxn)).

NAME CHANGE AND REDESIGNATION:

(1) TARPON (LAKE MICHIGAN) VHF INTSXN - the intsxn of the South Bend, Ind. VOR 287° mag radial (V-10N) and the Naperville, Ill. VOR 062° mag radial (V-116). ((Formerly named Mid-Lake (Lake Michigan) Intsxn)).

DESIGNATE:

(1) ADAMS RUN, S.C. VHF INTSXN - the intsxn of the Charleston, S.C. VOR 228° mag and the Columbia, S.C. VOR 154° mag radials.

(2) BICKLETON (VHF) INTSXN - the intsxn of the 162° mag radial of Yakima, Wash VOR and the 011° mag radial of The Dalles, Oregon VOR.

(3) BRIDAL VEIL (VHF) INTSXN - the intsxn of the 048° mag radial of the Newberg, Oreg VOR and the 109° mag radial of the Portland, Oreg. VOR.

(4), CEDARVILLE, N.Y. INTSXN - the intsxn of the SE course of the Utica, N.Y. ILS lclzr and the Syracuse, N.Y. VOR 113° mag radial.

(5) CLARK, N.J. INTSXN - the intsxn of the 253° mag radial of the Colts Neck, N.J. VOR and the 010° mag radial of the Coyle, N.J. VOR.

(6) DAWN, OHIO INTSXN - the intsnx of the Findlay, Ohio VOR 228° mag and the Dayton, Ohio VOR 310° mag radials.

(7) EAST TEXAS, PA. INTSXN - the intsxn of the Selinsgrove, Pa. VOR 112° mag and the Allentown, Pa. VOR 220° mag radials.

(8) GRAHAM (VHF) INTSXN - the intsxn of the 062° mag radial of the Olympia, Wash. VOR and the front course of the Seattle-Tacoma ILS.

(9) GRESHAM (VHF) INTSXN - the intsxn of the 048° mag radial of the Newberg, Oreg VOR and the SE course of the Portland, Oreg. ILS.

(10) HARBOR ISLAND (L/MF) INTSXN - the intsxn of the NW course of the Seattle, Wash. LFR and a 008° mag bearing to the NAS Seattle Rdo bcn. (Ident: "WN")

(11) HOOD RIVER (VHF) INTSXN - the intsxn of the 048° mag radial of the Newberg, Oreg VOR and the 074° mag radial of the Portland, Oreg. VOR.

(12) LAURENS, S.C. (VHF) INTSXN - the intsxn of the Royston, Ga. VOR 074° mag and the Spartanburg, S.C. VOR 188° mag radials.

(13) LOFALL (VHF) INTSXN - the intsxn of the 351° mag radial of the Olympia, Wash. VOR and the NW course of the Seattle, Wash. LFR.

(14) McCHORD (VHF) INTSXN - the intsxn of the 056° mag radial of the Olympia, Wash. VOR and the 175° mag radial of the Seattle, Wash. VOR

(15) MARLIN (L/MF) INTSXN - the intsxn of the E course of the Ephrata, Wash. LFR and a bearing of 184° mag radial of the Moses Lake, Wash. rdo bcn.

(16) MONCURE, N.C. (L/MF) INTSXN - the intsxn of the SW course of the Raleigh, N.C. rdo rng and the SE course of the Greensboro, N.C. rdo rng. (Formerly Compulsory Reporting Point)

(17) NEW ROCHELLE, N.J. INTSXN - the intsxn of the Idlewild, N.Y. VOR radial to New Rochelle, N.Y. rdo bcn and Wilton, Conn. VOR radial direct to LaGuardia, N.Y. lclzr.

(18) NUMIDIA, PA. INTSXN - the intsxn of the Selinsgrove, Pa. VOR radial to Hazelton, Pa. Intsxn and the Williamsport, Pa. VOR 155° mag radial.

(19) OLYMPIA (L/MF) INTSXN - the intsxn of the 198° mag radial of the Seattle, Wash. VOR and a 320° mag bearing toward the Shelton, Wash. rdo bcn.

(20) OSWEGO (VHF) INTSXN - the intsxn of the 048° mag radial of the Newberg, Oreg. VOR and the 175° mag radial of the Portland, Oreg. VOR.

(21) RAINER (L/MF) INTSXN - the intsxn of the S course of the Seattle, Wash. LFR and a 315° T bearing toward the Shelton, Wash. rdo bcn.

(22) RED BANK, N.J. INTSXN - the intsxn of the Idlewild, N.Y. VOR radial direct to the Coyle, N.J. VOR and the Colts Neck, N.J. VOR radial to present Red Bank, N.J. LF Intsxn.

(23) RINGOES, N.J. INTSXN - the intsxn of the Colts Neck, N.J. VOR direct radial to the East, Texas Intsxn and West Chester, Pa. VOR 060° mag radial.

(24) ST. HELENA (VHF) INTSXN - the intsxn of the 301° T radial of the Portland, Oreg. VOR and the 009° T radial of the Newberg, Oreg. VOR.

(25) SILVERDALE (VHF) INTSXN - the intsxn of the 351° mag radial of the Olympia, Wash. VOR and the 281° mag radial of the Seattle, Wash. VOR.

(26) SUTTER BUTTES (VHF) INTSXN - the intsxn of the 043° mag radial of the Williams, Calif. VOR and the 329° mag radial of the Sacramento, Calif. VOR.

(18 Sept 1956)

(27) TILLER (VHF) INTSXN - the intsxn of the 333° mag radial of the Medford, Oreg. VOR and the 098° mag radial of the North Bend, Oreg. VOR.

(28) UNION, S.C. (VHF) INTSXN - the intsxn of the Spartanburg, S.C. VOR 149° mag and the Charlotte, N.C. VOR 243° mag radials.

(29) WELLPINIT (VHF) INTSXN - the intsxn of the 067° T radial of the Ephrata, Wash. VOR and the 322° T radial of the Spokane, Wash. VOR.

(30) WILSON CREEK (VHF) INTSXN - the intsxn of the 059° mag radial of the Ephrata, Wash. VOR and a bearing of 184° mag to the Moses Lake, Wash rdo bcn.

REDESIGNATE:

(1) ALBIN (VHF) INTSXN - the intsxn of the 093° mag radial of the Rock River, Wyo VOR and the 040° mag radial of the Cheyenne, Wyo. VOR.

(2) AMBOY, N.J. INTSXN - the intsxn of the Allentown, Pa. VOR direct radial to the Scotland, N.J. rdo bcn and SW course of the Newark, N.J. ILS.

(3) AUBURN VHF INTSXN - the intsxn of the 023° mag radial of the Sacramento, Calif VOR and the 086° mag radial of the Williams VOR.

(4) BEAR CREEK (VHF) INTSXN - the intsxn of the 093° mag radial of the Rock River, Wyo. VOR and the 333° mag radial of the Cheyenne, Wyo. VOR.

(5) BUSHNELL (VHF) INTSXN - the intsxn of the 279° mag radial of the Sidney, Nebr. VOR and the 066° mag radial of the Cheyenne, Wyo. VOR.

(6) COLOMA (VHF) INTSXN - the intsxn of the 038° mag radial of the Sacramento, Calif. VOR and the 086° mag radial of the Williams, Calif. VOR.

(7) COVINA (VHF) INTSXN - the intsxn of the 009° mag radial of the Long Beach VOR and the 285° mag radial of Ontario.

(8) FOLSOM (VHF) INTSXN - the intsxn of the 038° mag radial of the Sacramento, Calif. VOR and the 100° mag radial of the Williams, Calif. VOR.

(9) KUNA (VHF) INTSXN - the intsxn of the 200° mag radial of the Boise, Idaho VOR and the 300° mag radial of the Mountain Home AFB TVOR.

(10) MANOR (LF) INTSXN - the intsxn of the N course of the Portland, Oreg. LFR and a 247° T bearing to the Sauvies Island, Oreg. rdo bcn.

(11) MORTON PASS (VHF) INTSXN - the intsxn of the 093° mag radial of the Rock River, Wyo. VOR and the 306° mag radial of the Cheyenne, Wyo. VOR.

(12) PUYALLUP (VHF) INTSXN - the intsxn of the front course of the Seattle-Tacoma ILS and the 043° mag radial of the Olympia, Wash. VOR.

CANCEL:

(1) BUFFALO (VHF) INTSXN - the intsxn of the Spartanburg, S.C., VOR 149° mag and the Charlotte, N.C. VOR 250° mag radials.

(2) CLINTON (VHF) INTSXN - the intsxn of the Spartanburg, S.C. VOR 187° mag and the Royston, Ga. VOR 078° mag radials.

(3) COWAN (VHF) INTSXN - the intsxn of the Lubbock, Tex. VOR 357° mag and the Childress, Tex. VOR 265° mag radials.

(4) CURTIS INTSXN - the intsxn of the 078° T radial of the Imperial VOR and the 165° T radial of the North Platte VOR.

(5) DIAMOND INTSXN - the intsxn of the 047° mag radial of the Laramie VOR and the 333° mag radial of the Cheyenne VOR.

(6) FLOYDADA (VHF) INTSXN - the intsxn of the Childress, Tex. VOR 233° mag radial and the Guthrie, Okla. VOR 282 mag radial.

(7) FOSTER (VHF) INTSXN - the intsxn of the Lubbock, Tex. VOR 012° mag and the Childress, Tex. VOR 265° mag radials.

(8) GRUNER (VHF) INTSXN - the intsxn of the 070° mag radial of the Dalhart VOR and the 360° mag radial of the Sayre VOR.

(9) HARBAUGH (VHF) INTSXN - the intsxn of the Gage, Okla. VOR 238° mag and the Amarillo, Tex. VOR 026° mag radials.

(10) HONEA, S.C. INTEGRATED INTSXN - the intsxn of the Royston, Ga. VOR 074° mag radial and the S course of the Greenville, S.C. LF rdo rng.

(11) LAURENS, S.C INTEGRATED INTSXN - the intsxn of the Royston, Ga VOR 078° mag radial and a 140° mag bearing from the Greenville, S.C. LF rng.

(12) LOS GATOS (VHF) INTSXN - the intsxn of the 319° mag radial of the Salinas, Calif. VOR and a 030° mag bearing to the Evergreen, Calif. rdo bcn.

(13) MAXWELL (L/MF) INTSXN - the intsxn of the NE course of the Las Vegas LFR and the S course of the Trinidad LFR.

(14) RANCH (VHF) INTSXN - the intsxn of the Gage, Okla. VOR 223° and the Sayre, Okla VOR 290° mag radials.

(15) SEDALIA, S.C. (VHF) INTSXN - the intsxn of the 078° mag radial of the Royston, Ga. VOR and the 242° mag radial of the Charlotte, N.C. VOR.

(16) TORREON (VHF) INTSXN - the intsxn of the 298° mag radial of the Corona VOR and the 205° mag radial of the Otto VOR.

(17) VAUGHN (VHF) INTSXN - the intsxn of the 180° mag radial of the Anton Chico, VOR and the 051° mag radial of the Corona, N.Mex. VOR.

(18) WAGGONER (VHF) INTSXN - the intsxn of the 247° mag radial of the Dalhart, Tex. VOR and the 310° mag radial of the Tucumcari, N. Mex. VOR.

(19) WILLARD (L/MF) INTSXN - the intsxn of the NW course of the Roswell LFR and the S course of the Otto LFR.

NON-STANDARD HOLDING PATTERNS: The following non-standard holding patterns are established or cancelled and shall become effective as indicated:

ESTABLISH - Effective immediately

(1) KITSAP LF INTSXN - direction of holding - SE (inbound 297° mag); direction of turns LEFT; time - 1 minute; minimum altitude - 2000'.

(2) NAS SEATTLE MHW - direction of holding - N (inbound 156° mag); direction of turns LEFT; time - 1 minute; minimum altitude - 2500'.

(3) PAINE AFB MHW - direction of holding - SW (inbound 030° mag); direction of turns - LEFT; time - 1 minute; minimum altitude - 2000'.

CANCEL - Effective immediately

(1) MONROE, WASH. MHW - direction of holding - SW (inbound 006° mag); direction of turns - RIGHT; time - 1 minute; minimum altitude - 3000'.

(2) PAINE AFB MH - direction of holding - S (inbound 340° mag); direction of turns - RIGHT; time - 1 minute; minimum altitude - 2000'.

(3) KITSAP L/F INTSXN - direction of holding - NW (inbound 117° mag); direction of turns - LEFT; time - 2 minutes; minimum altitude - 3000';

ESTABLISH - Effective October 18, 1956:

(1) CEDARVILLE, N.Y. INTSXN - direction of holding - E on Syracuse VOR 113° mag radial; direction of turns - RIGHT; time - 1 minute; minimum altitude - 3000'.

(2) MONCURE, N.C. L/MF INTSXN - direction of holding - SW on SW course of Raleigh, N.C. LF rdo rng (inbound course 048° mag); direction of turns - RIGHT; time - 1 minute; minimum altitude - 1600'.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Mt. Whitney	San Francisco	3094
San Antonio	Montgomery Local	

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 24 - Waterloo, Iowa - Add CAA telephone number ADams 3-5528.

(2) Page 25 - Detroit (Wayne Major Arpt), Mich. - Correct WB telephone number to read: LOgan 3-4410*

(3) Page 25 - Minneapolis, Minn. - Correct CAA telephone number to read: PArkway 9-9386.

(4) Page 25 - Chadron, Nebr. - Correct CAA telephone number to read: 4453.

(5) Page 29 - Minneapolis, Minn. - Correct ASDO telephone number to read: PArkway 9-7301.

(6) Page 31 - FCC HF/DF Stations. Correct Livermore, Calif. to read: *Livermore, Calif.

(7) Page 101 - (Airborne) Minneapolis, Minn. - Correct VOR rcvr check point to read: 164°; EDGY Commercial Broadcast Station located 6 mi SW of Wold-Chamberlain Fld.

(8) Page 102 - (Airborne) - Sacramento, Calif. - Add VOR rcvr check point: 015°; at approach end of runway 02; 100'.

(9) Page 102 - (Airborne) - Wichita Falls, Tex. (Sheppard AFB) - Correct to read: 011°; at the bridge over Red River, 8 miles N of Sheppard AFB; 1500'.

(10) Page 104 - (Ground) - Gila Bend, Ariz. - Correct VOR rcvr check point to read: 167°.

(11) Page 102 - (Airborne) - Ukiah, Calif. - Correct VOR rcvr check point to read: 107°.

(12) Page 104 - (Ground) - Jackson, Miss. - Correct VOR rcvr check point to read: 155°.

(13) Page 107 - (Ground) - Tallahassee (Dale Mabry), Fla. - Correct VOR rcvr check point to read: 159°.

(14) Page 71 - SECTION IV - Correct date to read: December 1, 1955.

✓ AIRMAN'S GUIDE CORRECTION: Correct Airman's Guide, Volume 11, No. 12, dated August 21, 1956, as follows:

(1) Page 9 - On-Request Reporting Points, Under Cancel: SMYRNA LF INTSXN - Correct to read: the intsxn of the NW course Atlanta Ga LF rdo rng and the W course of the Atlanta, Ga. Navy LF rdo rng.

DIRECTORY OF AIRPORTS: The Directory of Airports, scheduled to appear in September 4, 1956 issue of the Airman's Guide, will appear instead in Volume 11, No. 15, dated October 2, 1956.

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

CSN	Casanova, Va. VOR (Name correction)
JAS	Jasper, Texas, Jasper County Arpt (Assignment)
*WUM	Taguac, Guam (Assignment)

*KWUM will be used as international indicator

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) Month and day item was reported.

** New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.

★ New or revised radio data. Pilots should inscribe this information on charts and records.

NOTE - Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.

BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd.

BIRMINGHAM-RADIO: Aug 20, VOR shut down - relctn. Will be recmsnd about Dec 13 at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun arpt. (8-30)

BIRMINGHAM ARPT: Caution-traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm closed to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

★HUNTSVILLE-RADIO: Sept 13, scheduled wea bdcasts inaugurated. Class:BVOR.

HUNTSVILLE MUN ARPT: Caution - rnwy 18-36 under const.

MONTGOMERY-DANNELLY FLD-TOWER: About Oct 16, ILS glide slope, MM and LMM will be shut down until approx Jan 1 - relctn. Lclzr, OM and LOM will remain in opern. FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft lndg and taking-off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. E/W rnwy clsd to all military acft-const. Easternmost 5000' avail days, easternmost 6000' avail sunset to sunrise to civil acft. Western end mrkd by flags-days, lgts-ngts. (5-15)

ALABAMA: MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends. (4-22)

**OZARK ARPT: New fld. Type: L. Lat 31-27-30, long. 85-37-15. Lctn: 2.0SE. Elev: 358'. No. of rnwys 1 - 2000' x 200' - sod. Lngst rnwy & facs: 20. Remarks: Drive-in theater S.

RED BAY MUN ARPT: Closed -const. (7-26)

ARIZONA: AJO ARPT: Beacon and lgts inop. (6-18)

**BOWIE ARPT: Delete from records. (9-10)

**CACTUS-NORTH PHOENIX ARPT: Delete from records. (9-10)

**CHANDLER-RIGGS ARPT: Abandoned. (6-11)

COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)

**DEWEY-HUMBOLDT ARPT: Abandoned. (8-20)

**FLORENCE JUNCTION ARPT: Delete from records.(9-10)

FT. HUACHUCA-SPECIAL NOTICE: Restricted Area (R-181) in use daily until Dec 15, artillery firing and drone flying. (9-10)

GILA BEND-SPECIAL NOTICE: Captive balloons anchored on 1500 ft cables will be flown 1100 Mon thru 1100 Fri on 24 hr basis at Dateland and Gila Bend Aux AFB. Lgtd by one red lgt ngts. Extreme caution advised at low alts near these locations. (8-23)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial. (8-23)

**GILA BEND-C.L. STEPHENS RANCH ARPT: Delete from records. (9-10)

**GLOBE-CUTTER ARPT: Delete from records. (9-10)

HASSAYAMPA-RADIO: VOR/DME usable to 30 n mi from 30°-70°, 240°-255°, 320°-345° and 40 n mi from 70°-85° at MEA. (3-30) About Sept 25, VOR/DME will be shut down.(9-17)

**MANY FARMS ARPT: Delete from records. (9-10)

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. Const in progress S of taxiway 1 from rnwy 8L to trans ramp and S to arpt entrance road.

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185°, 39 n mi at 10,000'.

**RAINBOW LODGE-NAVAJO MOUNTAIN ARPT: Delete from records. (9-10)

**ROUND ROCK ARPT: Delete from records. (9-10)

SALOME, SITE #27B, LAX-PHX: Caution-puncture vines. (6-18)

SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)

**SEDONA-OAK CREEK ARPT: New fld - Type: P. Lat 34-50, long. 111-47. Lctn: 2 mi SE Elev: 4800'. No. of rnwys: 1. Lngst rnwy & facs: 38. Fuel: F2. (5-7)

**THEBA-GILLISPIE ARPT: Delete from records. (9-10)

**TOLTEC ARPT: Delete from records. (9-10)

**TONTO BASIN-PUMPKIN CENTER ARPT: Delete from records. (9-10)

TUCSON-RADIO: VOR/DME coverage: 360°-050° 35 n mi 11,000'; 050°-060°,22 n mi 11,000'; 060°-075° 35 n mi 11,000'; 075°-085° 21 n mi 11,000'; 090°-170° 40 n mi 12,000'; 225°-230° 40 n mi 7,000'; 330°-345° 35 n mi 11,000'; 345°-360° 25 n mi 11,000'. (7-17) Effect 0001Z Sept 28, Gilpin FM on 302° radial VOR rng ident will be changed to "A". (9-7)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.

**WHITE RIVER-FORT APACHE ARPT: Delete from records. (9-10)

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. (8-27)

ARKANSAS: **ARKADELPHIA, #24, DAL-LOU: Permanently discontinued. (8-15)

EL DORADO-RADIO: DME 2000' MSL coverage 43.5 mi 325° thru N to 225°; 2000' MSL coverage 35 mi 225° thru W to 325°. (3-30)

FT. SMITH-RADIO: About Sept 5, VOR shut down until approx Oct 5 - modernization.(9-5)

HARRISON ARPT: Fld clsd ngts.

LITTLE ROCK-ADAMS FLD: Sept 10, ILS lclzr and glide slope cmsnd. Lclzr freq: 110.3 mc, with voice. Ident: LIT. Lclzr lctd 770' from NE end of NE/SW rnwy on extended centerline. Lat 34-44-15, long. 92-13-07. Glide slope freq: 335 mc. Glide slope lctd 1000' from SW end of NE/SW rnwy 500' from centerline. Lat 34-43-32, long. 92-14-10. Glide angle 3.04°. Apch bear : 40°. Alt over MM 500'; OM 1800' MSL. BC-restricted acct of bends. (9-10)

**MAGNOLIA ARPT: 289'(639'MSL) lgtd rdo twr erected 2.1 n mi NE at lat 33-15-50, long. 93-10-45. (9-1)

NORTH LITTLE ROCK-CENTRAL ARPT: Fld closed to all operns-const. (3-1)

**PRESCOTT ARPT: Abandoned. (8-27)

TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness - bends.

ARKANSAS: WALNUT RIDGE-RADIO: Sept 14, VOR shut down until approx Oct 11. During this period the MEA will be affected as follows: V-140 is 4500' on segments over Walnut Ridge; MEA on V 69 Walnut Ridge to Farmington, Mo. is 6000'. (9-11)

CALIFORNIA: **ADELANTO-GREY BUTTE ARPT: Abandoned. (5-28)

**ALTURAS ARPT #1: 50' TV antenna on top of bldg on NE apch of main rnwy. (8-21)

AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)

BAKERSFIELD-KERN COUNTY ARPT-TOWER: Effect. Sept 30, twr hrs opern will be: 0600-2200. (9-7)

BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)

BURBANK-LOCKHEED ARPT-TOWER: Sept 15, TASR cmsnd. Trans: 260 kc; 109.5, 118.7, 120.9, 121.5, 126.18, 243.0, 257.8, and 360.6 mc. (9-14)

CAMARILLO-RADIO: All courses have multiples. (6-17)

CHINO PACIFIC ARPT: Clsd to all acft xcpt on official business PAC Airmotive Co. Equip on or near rnwys-caution. Rnwy 3-21 under const both ends. Rnwy 8-26 clsd.

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

CRESCENT CITY-DEL NORTE COUNTY ARPT: Entire length of rnwy 11 usable and free of drifting sand. (6-15)

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

DIXON ARPT: Closed. (8-30)

ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.

**EUREKA ARPT: 345' lgtd rdo twr erected 2.1 n mi SE(145°T) at lat 40-45, long 124-10.

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. About Sept 25, VOR will be shut down until approx Oct 10. During that period, the following arwys will not be usable: V-107 LAX-Maricopa Int; V-209 LAX-Int FIM 296° SBA 013°; V-12 SBA-Saugus Int. (8-230

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRESNO AIR TERMINAL-TOWER: Aug 13, lclzr and glide slope shut down - relctn. (8-17) FLD: Exercise extreme caution in vcnty, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Extensive const and hvy equip both ends rnwy 11-29, apch areas and adj taxiways. First 250' rnwy 11 clsd-usable length 6750'. Extreme caution apch end rnwy 11, large equip working in rnwy extension area. (7-5)

**FURNACE CREEK ARPT: (formerly Furnace Creek, 17, RIV-DLS). Reinstated: Type: L. Lat 36-28, long. 116-52. Lctn: 2.0 NW. Elev: 211'. No. of rnwy: 1. Lngst rnwy & facs: h57. (8-22)

GLENDALE-RADIO: Sept 14, ident homing fac changed from GLN to GCE.

**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress.

KLAMATH-McBETH ARPT: Closed. (6-13)

**LAKE HUGHES-SKY CASTLE: Abandoned. (6-25)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340° 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)

LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during arpt ** const. (8-18) FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail. for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd-const. 6200' rnwy 30 avail lndgs and take-offs. Rnwy 12 clsd. (6-27) N 800' apch end rnwy 16L perm clsd.

LOS ANGELES-RADIO-SPECIAL NOTICE: July 3, transcribed weather bdcasts oper test basis. Hrs opern: 0800-1800. Manual bdcast continues on VOR and both VOR and LF combined. (7-16)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (7-16) About October 1, VOR will be shut down until approx Oct 15. During this period the following arwys will not be usable: V-23 Long Beach - White Oaks Int; V-16 Ontario - Los Angeles: V-107, 209 Fillmore - Los Angeles; V 201 Corbina Int - Berry Int; V-210 Daggett-Los Angeles. (9-12)

CALIFORNIA: LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd open VFR tfc only. Equip. on and adj to const areas. Pilots are urged to use extreme caution when operg off-shore just W of arpt; All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL,approx the intersection of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu Intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descent below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat. down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LF rng and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10)

LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700.

MARYSVILLE-RADIO: Sept 4, VOR shut down until approx Sept 26 - modernization. (8-5)

**MOJAVE-MYER ARPT: Abandoned. (5-28)

NATIONAL CITY ARPT: Extensive const around arpt. 75' obstns E end of rnwy. (7-19)

OAKALND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500 ft will usually pertain to the middle marker location. TFC operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc. pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Effect. Sept 1, military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only.

OAKLAND INTN'L ARPT: Dredging and clam shell equip working S of lndg area. All booms and equipment lgtd and mrkd. Use extreme caution when flying over or within this area.

OCEANSIDE-RADIO: VOR coverage 310°-020°, 35 n mi at min en route alt. (10-10) About Sept 10, VOR will be shut down until approx Sept 25. (8-30)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTN'L ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as mrkd by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th flghter interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)

OXNARD AFB-RADIO: USAF VHF/DF unreliable below 12,000' within 50 n mi. (4-20)

WEST VIRGINIA: CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000'; 270°-330° 26 n mi at 2500'. Moderate roughness all azimuths. (6-18)
CHARLESTON-KANAWHA COUNTY ARPT-TOWER: ILS glide slope 335 mc operg on test basis. (6-25) About October 15, lclzr and glide slope will be shut down until approx Oct. 22.

WEST VIRGINIA: ELKINS-RADIO: LF rng has multiples and fades all courses. (5-31) DME coverage 35°-95°, 43 n mi at 6000'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°-195°, 35 n mi at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'. (7-1)

ELKINS MUNICIPAL ARPT: Rnwy lgts 4-22 inop. (7-25)

MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'.

MARTINSBURG ARPT: Serv fac avail 0800 until sunset. 28' hangar 500' E of centerline and 1100' from S end rnwy 35, lgtd. (6-7) Factory bldg 40' high under const 1000' E of S end rnwy 35 in flood lgtd area. (9-13) Const under way end of rnwy 26 and along entire length of rnwy 8 and 26, men and equip. on fld, obstn mrkd. (5-3) Rnwy 17-35 closed 0700 to 1800 EST xcpt Suns. Men and equip. on rnwy. (9-5)

MORGANTOWN-RADIO: LF rng has multiples and fades all courses.

PARKERSBURG-WOOD COUNTY ARPT: Caution - dip midway rnwy 16-34 covering full width of rnwy.

WISCONSIN: EAU CLAIRE-RADIO: Aug 7, VOR shut down until approx Sept 30 - modernization. (8-8)

GRANTSBURG-RADIO: About Oct 8, VOR will be shut down until approx Dec 8-modernization. (9-4)

LA CROSSE-RADIO: VOR radials 320° to 335° unreliable 20 to 30 n mi from stn. (11-3)

LONE ROCK-RADIO: July 9, VOR shut down until approx Oct 1 - modernization. (9-10)

MADISON-TRUAX FLD: Caution crossing hwy lndg rnwys 22, 26, 31. E taxiway N of Administration Bldg perm clsd to all acft over 10,000 lbs. Sod unsafe. Apch lgts rnwy 36 inop. Taxiway 6 lctd between S end of rnwy 18 and AF ramp clsd-const-marked with yellow barricades and flares ngts. (4-23)

MILWAUKEE-GENERAL MITCHELL FLD-TOWER: All acft apchg Milwaukee with intentions to land will, durg VFR conditions and if equip. with multiple rdo freq. make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and altitude. (5-10) FLD: Rnwy 7L-25R open days only. Obstn lgts on apch end of rnwy 13 are obscured by trees. Parking facilities lmtd-itinerant military acft on unofficial business may find parking facilities unavailable. Avoid confusion of rnwy 1 with parallel taxiway to left. (8-15)

**MILWAUKEE-MAITLAND FLD: Abandoned. (8-2)

**STOUGHTON-NELSON ARPT: Abandoned. (

WAUSAU-RADIO: About Oct 1, VOR will be shut down until approx Nov 30. (9-4)

WYOMING: CASPER-NATRONA CO. ARPT-TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs. FLD: Caution all acft entering tfc pat. occasional jet acft opern with pickup and dropping of tow targets. (4-29)

CHEYENNE ARPT: Overrun lgts rnwy 8-26 inop. (5-24) Apron adj term bldg clsd-const. Men, equip. on fld - days. (7-14)

**GILLETTE ARPK: Abandoned. (8-3)

GILLETTE ARPT: 50-75'W shoulder 1500' from N end N/S strip soft-clsd to hvy acft.

JACKSON ARPT: E/W rnwy closed - fence const across rnwy just W of N/S rnwy. Small acft may use E end of E/W rnwy in case of emerg, but at own risk. N/S rnwy clsd - const. Use new auxiliary 150' x 5400' strip E of N/S rnwy. (3-15)

KEMMERER ARPT: Caution - reseeded and soft. (6-22)

LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.

RIVERTON ARPT: Men and equip. on fld. 5000' W end rnwy 28 surfaced and available. Remainder arpt closed. (4-12)

ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'.

ROCK SPRINGS-RADIO: ILS glide slope has lgt to moderate roughness between OM and LFR.

ROCK SPRINGS ARPT: Caution - first 500' NW end NW/SE rnwy clsd - marked.

SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.

TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip. on fld. Use extreme caution.

WHEATLAND ARPT: Closed - const. (9-17)

PUERTO RICO: ★SAN JUAN-RADIO: Freq 255.4 and 243.0 mc cmsnd. (9-11)

PUERTO RICO: SAN JUAN-ISLA GRANDE ARPT: First 500' W end rnwy 9R-27 unusable. Daylgt operns proceed with caution - ngt operns observe threshold lgts. Use outside taxiway in front of large hangar near entrance. Equip. on hangar ramp. Cranes 50' to 60' high operg intermittently approx 1000' off E end rnwy 9R-27L. From 1600-2100Z daily three-hour min ground delay on mil acft due priority airlift. (7-28)

SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible twr - caution. (6-7)

VIRGIN ISLANDS: ★ST. CROIX-ALEXANDER HAMILTON ARPT-TOWER: Trans and rcvr 243.0, 255.4 mc cmsnd. (9-10)

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS: IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions (television towers, smoke stacks, etc) which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. When the list does not appear in the Guide, all new obstructions will be carried as two-starred items in the NOTAMS. The list will be brought up to date each time it is issued;newly added or changed material will be indicated by arrows.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position, height and top elevation above MSL of these new obstructions can be taken from the list given below. New obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

LEGEND: (MSL) - Mean sea level. (AGL) - Above ground level. B - Antenna structure on a building. DISTANCE is given in nautical miles. BEARINGS are true.

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods: (a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator(FPDI) centered, the omnibearing selector should read 0° with the to-from indication being "From"; or the omnibearing selector should read 180° with the to-from indication reading "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an indivisual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that thould be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of +4° be indicated through use of the ground check or ± 6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of this date check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 112.0 mc)
*Chicago (Midway 111.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)
**Wichita (Municipal 111.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

Revisions to Instrument Approach Procedures

INSTRUMENT LANDING SYSTEM PROCEDURES

If an ILS instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

INSACS = Interstate Airway Communications Station/s (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSACS. (C) The station identification is monitored continuously by the communicator at the associated INSACS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSACS. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSACS, and located too distant from INSACS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)=Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
* = Automatic voice identification
▒▒▒ Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-drectional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and voice.
T. . . . . Teletype
TASR . . . Terminal Area Surveillance Radar
TVOR. . . Low power VOR (no standby equipment) located on airport
TX. . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same INSACS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

RADAR AVAILABLE : How and Where

(2 Oct 1956)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. TASR = Terminal Area Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion.
After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible
Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR FLIGHT ADVISORY SERVICE: If radar advisory service is desired, the pilot of an aircraft will request such service through the appropriate Air Route Traffic Control Center, using normal en route communications facilities. ARTC will determine if service can be provided and will request pilot to change to appropriate frequency for direct communication with radar. Radar station will be identified by "THIS IS AIR FORCE RADAR ADVISORY". All suggested vectors to circumnavigate storm areas will be of advisory nature and do not relieve pilot of responsibility for safety of aircraft. If advisory service cannot be furnished for any reason, the procedure word "UNABLE" will be used. This will terminate radar advisory service to the aircraft without further explanation. This service will be available in the following ARTC Flight Advisory Areas; Chicago, St. Louis, Minneapolis, Kansas City, Albuquerque, San Antonio, Ft. Worth, Oakland, Denver, Great Falls, Los Angeles, and the area immediately around Knoxville, Tenn.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

DIRECTORY OF AIRPORTS – LEGEND

CITY AND AIRPORT NAME

(AF) City and Airport Name (with L or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of above citation of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields, respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

NOTES:

1. Where lights are owned or maintained by CAA the site number and airway abbreviation are included in the city and airport name column ie: Chadron, 15, CYS-HON.
2. USAF aircraft are permitted to use only those fields prefixed with an AF, A, N, NG, CG, P, PC.
3. When city and airport names are identical, the airport name is omitted to conserve space.
4. When city is part of airport name, a dash will appear between city and airport, such as Venice-State.

TYPE

P - Public Use L - Limited

NOTES

PUBLIC USE - Intended for general use by the public at large, this category consists of:

(1) Operationally active airports (those attended during normal working hours of each day, and provide, as a minimum of service, aircraft fuel for sale at the airport).
(2) All airports serving scheduled and large irregular air carriers as regular, alternate and provisional stops.
(3) All CAA intermediate landing fields.
(4) All airports having a true light certificate to indicate a lighted airport.

Data on these airports are obtained from physical inspections made by CAA personnel.

LIMITED - All airports not qualifying as "Public Use" (See definition above)

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is from the center of referenced city to airport and carried in statute miles.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

LOCATION (Continued)

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Elevation is given in feet above mean sea level and is based on highest usable portion of landing area.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY AND FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, weather reports, and unicom available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet, using 70 as division point. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h -runway is paved (concrete, asphalt or similar type of paving)
aw -allway field
(26) -runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon) (Green and white, split-beam and other types) Omission of B indicates rotating light is either not available or not operating standard hours (sunset-sunrise)

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Portable lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway or Strip
5 - Instrument approach (neon)
6 - High intensity runway
7 - High intensity instrument approach

✱ An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or CAA communications station on field.

UNICOM

U: Unicom (Aero Advisory Station transmitting and receiving on 122.8 mc). Operates during airport hours only.

FUEL OCTANE

F1: 80 oct., at least
F2: 80/87 oct., and lower
F3: 91/96 oct., and lower
F4: 100/130 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.
(b) "CLOSED" indicates closed to all traffic except in emergency.
(c) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.
(d) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.
(e) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.
(f) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.
(g) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

NOTES

1. ← New or revised data.
2. SCHEDULED AIRLINE STOP: Airport names are capitalized.
3. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
4. NEW AIRPORTS: At the end of each state, under this listing will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NOTICES TO AIRMEN
SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .--.. - -.-.. (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON INSACS COMMUNICATIONS CHANNELS: If excessive interference is noted on INSACS VHF or UHF simplex frequencies, pilots should request the INSACS to reply on the VOR voice channel. This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, regardless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.
2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of at least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.
2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

TOWER FREQUENCIES ON C&GS AERO CHARTS: Control towers which guard 122.7 mc instead of 122.5 mc for VHF communication with private aircraft will be so indicated by note in the "Remarks" column of the aerodrome tabulations on the back of the appropriate Sectional and Local Aeronautical Charts of the Coast and Geodetic Survey. Such notes now appear on the Chicago Sectional dated June 15, 1956, and the New York Sectional dated June 28, 1956, and will be shown on the next scheduled printings of the other charts concerned.

DISCONTINUANCE OF AIRWAYS BEACONS: Effective October 31, 1956, the following beacons in Region Two are discontinued:

NOTE: Name of beacon is followed by site number and mileage to beacon site.

✓ AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Austin	New Orleans	WAC 407
Del Rio	Oklahoma City	WAC 408
		WAC 467

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

✓ AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide, Volume 11, No. 14, dated September 18, 1956, as follows:

(1) Page 4 - On Request Reporting Points: Under Designate: Cancel the following intsxns effective October 18, 1956:

Item 13 - LOFALL (VHF) INTSXN - the intsxn of the 351° mag (013°T) radial of the Olympia, Wash. VOR and the NW course of the Seattle, Wash. VOR.

Item 25 - SILVERDALE (VHF) INTSXN - the intsxn of the 351° mag (013°T) radial of the Olympia, Wash. VOR and the 281° mag (303°T) radial of the Seattle, Wash. VOR.

(2) Page 7 - Minimum En Route Altitudes; effective October 18, 1956:

(a) Add the following item: V-35 (amended to read in part)

*Shrimp INT, Fla.	Scallop INT, Fla.	**4000

*6000 - MRA
**1000 - MOCA

Scallop INT, Fla.	Lobster INT, Fla.	*6000

*1000 - MOCA
(This removes conflict in altitudes between same segment of V-97)

(b) V-73 -- Disregard this item.

(c) Delete data on V-97 between Cross City and Tallahassee via E alternate.

(d) V-107, Coalinga to Oakland should read:

Coalinga, Calif. VOR	*Oakland, Calif. VOR	7000

*2500 - MCA Oakland VOR, SE-bound

Larry INT, Calif.	Mt Hamilton INT, Calif N-bound only	6500
Mt. Hamilton INT, Calif.	Mt. Day INT. Calif. N-bound only	6000
Mt. Day INT, Calif.	Mission INT, Calif. N-bound only	5000
Mission INT, Calif.	Oakland, Calif. VOR N-bound only	3500

(e) V-163 -- Disregard this item.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE - Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.

BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd. Racing is done on Sundays only. (9-28)

BIRMINGHAM-RADIO: Aug 20, VOR shut down - relctn. Will be recmsnd about Dec 13 at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun arpt. (8-30)

BIRMINGHAM ARPT: Caution-traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm closed to high performance single engine ALABAMA: conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

HUNTSVILLE-RADIO: VOR radials 005°-030° unusable due to roughness and bends.(5-11)

** HUNTSVILLE MUN ARPT: N/S rnwy now 5200'. (10-1) Rcvd too late for arpt directory.

MONTGOMERY-DANNELLY FLD-TOWER: About Oct 16, ILS glide slope, MM and LMM will be shut down until approx Jan 1 - relctn. Lclzr, OM and LOM will remain in opern. FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft lndg and taking-off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. E/W rnwy clsd to all military acft-const. Easternmost 5000' avail days, easternmost 6000' avail sunset to sunrise to civil acft. Western end mrkd by flags -days, lgts-ngts. (5-15)

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends. (4-22)

ARIZONA: AJO ARPT: Beacon and lights inoperative (6-18)

COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)

FORT HUACHUCA-SPECIAL NOTICE: Restricted Area (R-181) in use daily until December 15, 1956 - artillery firing and drone flying. (9-10)

GILA BEND-SPECIAL NOTICE: Captive balloons anchored on 1500 ft cables will be flown 1100 Mon thru 1100 Fri on 24 hour basis at Dateland and Gila Bend Aux AFB. Lgtd by one red light ngts. Extreme caution advised at low alts near these locations. (8-23)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.(8-23)

HASSAYAMPA-RADIO: September 25, VOR/DME shut down until approximately October 3. (10-1)

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. Const in progress S of taxiway 1 from rnwy 8L to trans ramp and S to arpt entrance road.

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185°, 39 n mi at 10,000'.

SALOME, SITE #27B, LAX-PHX: Caution-puncture vines. (6-18)

SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)

★TUCSON-RADIO: VOR/DME coverage:360°-050°, 35 n mi 11,000';050°-060°, 22 n mi 11,000'; 060°-075°, 35 n mi 11,000' 075°-085°, 21 n mi 11,000';090°-170°, 40 n mi 12,000';225°-230° 40 n mi 7,000';330°-345°, 35 n mi 11,000';345°-360°, 25 n mi 11,000'.(7-17) Effect 0001Z Sept 28, Gilpin FM on 302° radial VOR rng ident changed to "A". (9-7)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000';(b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. (8-27)

ARKANSAS: EL DORADO-RADIO: DME 2000' MSL coverage 43.5 mi 325° thru N to 225°; 2000'MSL coverage 35 mi 225° thru W to 325°. (3-30)

FT.SMITH-RADIO: VOR flgt-checked Sept 22, opern normal.

HARRISON ARPT: Fld clsd ngts.

**MAGNOLIA ARPT: 289'(639'MSL) lgtd rdo twr erected 2.1 n mi NE at lat 33-15-50, long 93-10-45. (9-1)

NORTH LITTLE ROCK-CENTRAL ARPT: Fld closed to all operns-const.(3-1)

TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends.

WALNUT RIDGE-RADIO: Sept 27, VOR/DME flgt-checked, opern normal.

CALIFORNIA: AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys.

**BURBANK-LOCKHEED AIR TERMINAL ARPT: Five 80' lgtd highline poles lctd 1 mi W.

BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)

CAMARILLO-RADIO: All courses have multiples. (6-17)

CHINO PACIFIC ARPT: Clsd to all acft xcpt on official business PAC Airmotive Co. Equip on or near rnwys-caution. Rnwy 3-21 under const both ends. Rnwy 8-26 clsd.

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

CALIFORNIA: DAGGETT-RADIO· VOR flgt-checked on arwy radials only.
DIXON ARPT: Closed. (8-30)
ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area
FAIRFIELD-SUISUN ARPT: Unattended - no fuel available. (8-30)
FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. About Dec 15, VOR will be shut down until approx Jan. 15. During that period, the following arwys will not be usable: V-107 LAX-Maricopa Int; V-209 LAX-Int FIM 296°, SBA 013°; V-12 SBA-Saugus Int. (9-26)
FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checkd.
FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000' 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.
FRESNO AIR TERMINAL-TOWER: Aug 13, lclzr and glide slope shut down - relctn. (8-17) FLD: Exercise extreme caution in vcnty, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Extensive const and hvy equip both ends rnwy 11-29, apch areas and adj taxiways. First 250' rnwy 11 clsd-usable length 6750'. Extreme caution apch end rnwy 11, large equip working in rnwy extension area. (7-5)
**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress.
KLAMATH-McBETH ARPT: Closed. (6-13)
LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340° 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'.(9-13)
LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during arpt const. (8-18) FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail. for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd-const. 6200' rnwy 30 avail lndgs and take-offs. Rnwy 12 clsd. (6-27) About Oct 12, 3 SE neon lgts rnwy 30 will be discontd. (9-27)
LOS ANGELES-RADIO-SPECIAL NOTICE: July 3, transcribed weather bdcasts oper test basis. Hrs opern: 0800-1800. Manual bdcast continues on VOR and both VOR and LF combined. (7-16)
LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (7-16) About Oct 15, VOR will be shut down until approx Novl5. During this period the following arwys will not be usable: V-23 Long Beach-White Oaks Int; V-16 Ontario-Los Angeles; V-107,209 Fillmore-Los Angeles; V-201 Corbina Int-Berry Int; V-210 Daggett-Los Angeles. (9-26)
LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd open VFR tfc only. Equip on and adj to const area. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL, approx the intersection of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu Intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise at ATC. Jet acft pat. down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LFR and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10)
LOS ANGELES-SAN FERNANCO VALLEY ARPT: Tfc direction indicator inop 2300-0700.
MARYSVILLE-RADIO: Sept 4, VOR shut down.
NATIONAL CITY ARPT: Extensive const around arpt. 75' obstns E end of rnwy.(7-19)
OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500 ft will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.
OAKLAND-RADIO-SPECIAL NOTICE: Effect. Sept 1, military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contac: Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco

CALIFORNIA: should contact San Francisco Approach Control on 118.5 mc Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)
OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt.(1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.
OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE· Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only.
OAKLAND INTN'L ARPT: Dredging and clam shell equip working S of lndgs area All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area.
OCEANSIDE-RADIO:Sept 25, VOR shut down until approx Oct 16. (9-25)
ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°,26 n mi at 13,000'350°-360°,35 n mi at 13,000'
ONTARIO INTERNATIONAL ARPT-TOWER: About Oct 8, ILS will be shut down until approx Oct 13 - freq change. FLD: Make turns on or off taxiway S side rnwy 7-25 at intsxns only Eng run ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as mrkd by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th fighter interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)
OXNARD AFB-RADIO: USAF VHF/DF unreliable below 12,000' within 50 n mi.(4-20)
PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)
PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000';235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'
QUINCY-GANSNER FLD: E 700' E/W rnwy and taxi strip unusable.
RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30)
RIVERSIDE ARPT: Clsd to all itinerant tfc-const. (5-5)
SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)
**SACRAMENTO-BRANSTETTER ARPT: 574'(MSL) antenna twr erected 3.9 n mi SE (152°T) at lat 38-35-16, 121-29-22.(7-6)
**SACRAMENTO-CAPITOL SKY PARK ARPT: Two 180' lgtd rdo twrs erected 10 n mi N (11°T) at lat 38-36-24, long. 121-32-06. (9-11)
SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000', 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20° 43 n mi at 7000'.
SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads xcpt 20 mi MEA from 310° to 330°
SAN DIEGO-LINDBERGH FLD: 500' W end rnwy 9-27 clsd-jet barrier. (2-29)
SAN FRANCISCO: See Oakland Control Zone Notam.
SAN FRANCISCO-RADIO SPECIAL NOTICE: Acft not on IFR flight plan and not desiring IFR approach, requested to make initial call to San Francisco Tower, freq 119.1 mc. (7-25)
SAN FRANCISCO INT'L ARPT-TOWER: Soon freq 257.8 mc will be decmsnd. (9-14)
SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)
SANTA BARBARA-RADIO: About Oct 29, ILS will be shut down for lclzr freq change until approx Nov 10. Freq will be changed from 108.3 to 110.3 mc. (9-26) DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. About Nov 15 VOR will be shut down until approx Nov 30. During this period the following arwys are not usable for IFR; V-12 Santa Barbara-Fillmore; V-25,27 Paso Robles-Camarillo; V-27W Paso Robles-Santa Barbara; V-183 Santa Barbara-Maricopa Int (9-26)
SANTA BARBARA ARPT: 30' mobile boom optg between apch ends rnwys 3L and 7 daylgt hrs. Boom lgtd and lowered nights. (9-24)
SANTA MONICA-RADIO: TVOR radials 030°,075°,210°,260° and 323° usable. (1-20)
SANTA MONICA ARPT: Service avail only between 0700 and 2100 daily. Extreme caution advised during ngt use of fld due to unlgtd open storm drain dtich 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)

CALIFORNIA: SANTA PAULA ARPT. Work in progress S side of fld. Caution - trucks S of rnwy. Area S of rnwy soft, muddy (9-1)

STOCKTON FLD: Rnwy 16-34 clsd All taxiways xcpt taxiway A clsd Excavation with hvy equip. in progress in all clsd areas mrkd. Intensive helicopter trng conducted in vcnty of fld between 0800-1700 daily xcpt Sat and Sun Acft utilizing Stockton rdo rng for simulated rng apchs exercise extreme caution. Minimum altitude for low apchs is 528' MSL. (8-3)

THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°, 40 n mi, 145°-175°, 40 n mi; 175° thru 180° to 250°. 20 n mi, 250°-280°, 40 n mi at min en route alt. (3-14)

TULARE ARPT: Clsd - reconstruction (5-18)

UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500' MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100°-150° at 6000'. 105° thru S and W to 305° over water not checked. (10-11)

VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360°-045°, below 15,000'.

WARNER SPRINGS ARPT Rnwy hazardous. Soft spots due rodent activity and grading.

WILLIAMS-RADIO: Sept 4, VOR shut down. During this period the following arwys will not be usable: V-195 Red Bluff - Sacramento; V-195W William - Rio Int; V-212 Fort Ross Int - Coloma Int, V-200 Lakeport Int - Mt. Lola Int. (9-24)

COLORADO: AKRON-RADIO: About Oct 8, VOR will be shut down until approx Nov 1. During shut down the following arwys are not usable for IFR opern: V-8S Akron - Bennett Int; V-220 Akron-Longmont. Temp minimum en route alt on following arwys will be: V-8 Denver VOR to Akron Int. MEA 9000'; Akron Int to Imperial VOR MEA 7000'. V-132 Cheyenne VOR to Akron Int. MEA 11,000'; Akron Int to Goodland VOR MEA 9000'. (Akron Int is being estab as the Int of the Denver VOR 062°M radial and the Thurman VOR 348° M radial.

COLORADO SPRINGS-PETERSON FLD: Caution-lndg acft-due to rise in terrain at apch end rnwy 21. Const on ramp SE of twr. (5-1)

(3-15) FLD: S 800' of rnwy 16-34 and taxiway between rnwy 29 and rnwy 34 clsd. Rnwy 11-29 closed. Radiosonde balloon being released at approx 0300Z, 0900Z, 1500Z and 2100Z daily - actual release time will be broadcast by Seattle rdo. (8-14) North three rows of hi-intensity apch lgt sys shut down - const. Threshold lgts S end of N/S rnwy temp. relocated 750' N of S end of rnwy. (8-31)

SPOKANE-RADIO: DME and VOR coverage 36°-152°, 43 n mi at 7000'; 153°-224°, 43 n mi at 5000'; 225°-264°, 43 n mi at 6000'; 265°-35°, 43 n mi at 8000'. (6-17)

SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat. and mrkd area S of rnwy. Equip. on fld.

SPOKANE-GEIGER FLD-TOWER: UHF/DF coverage 110°-260°, 50 n mi at 5000'; 261°-280°, unreliable; 281°-330°, 40 n mi at 9000'; 331°-110°, 50 n mi at 9000'. FLD; Perm crash barriers 40 inches high lctd 150' off end rnwy 3-21.

TACOMA-BARRY'S SKYHARBOR ARPT: Closed. (6-14)

YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123°, 161°, 191°, 298°, 321° and 336° radials at min terrain clearance alts.

WEST VIRGINIA: CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000'; 270°-330°, 26 n mi at 2500'. Moderate roughness all azimuths. (6-18)

CHARLESTON-KANAWHA COUNTY ARPT-TOWER: ILS glide slope 335.0 mc operg on test basis. (6-25) About October 15, lclzr and glide slope will be shut down until approx October 22.

ELKINS-RADIO: LF rng has multiples and fades all courses. (5-31) DME coverage 35°-95°, 43 n mi at 6000'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°-195°, 35 n mi at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'. (7-1)

ELKINS MUNICIPAL ARPT: Rnwy lgts 4-22 inop.

MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'.

MARTINSBURG ARPT: Serv fac available 0800 until sunset. 28' hangar 500' E of centerline and 1100' from S end rnwy 35, lgtd. (6-7) Factory bldg 40' high under const 1000' E of S end rnwy 35 in flood lgtd area. (9-13) Const under way end of rnwy 26 and along entire length of rnwy 8 and 26, men and equip. on fld, obstn marked. (5-3) Rnwy 17-35 closed 0700 to 1800 EST except Sundays. Men and equip. on rnwy. (9-5)

WEST VIRGINIA: MORGANTOWN-RADIO: LF rng has multiples and fades all courses.
PARKERSBURG-WOOD COUNTY ARPT: Caution-dip midway rnwy 16-34 covering full width of rnwy.
WISCONSIN: EAU CLAIRE-RADIO: Aug 7, VOR shut down until approx Oct 15-modernization.
GRANTSBURG-RADIO: About Oct 8, VOR will be shut down until approx Dec 8- modernization.
**GRANTSBURG BCN SITE 7 - MSP-OT: Effect. October 12, bcn will be discontinued.
**JOHNSON CREEK BCN SITE 4, MKE-LSE: Effect. October 12, bcn will be discontinued.
LA CROSSE-RADIO: VOR radials 320° to 335° unreliable 20 to 30 n mi from stn.
LONE ROCK-ROCK-RADIO: July 9, VOR shut down until approx Oct 8 - modernization.
**LONE ROCK BEACON SITE 15, CHI-TWIN CITIES: Effective Oct 12 bcn will be discontd.
MADISON-TRUAX FLD: Caution crossing hwy lndg rnwys 22, 26, 31. E taxiway N of Admin Bldg perm clsd to all acft over 10,000 lbs. Sod unsafe. Apch lgts rnwy 36 inop. Taxiway 6 lctd between S end of rnwy 18 and AF ramp clsd-const-marked with yellow barricades and flares ngts.
MILWAUKEE-GENERAL MITCHELL FLD-TOWER: All acft apchg Milwaukee with intentions to land will, durg VFR conditions and if equip. with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and altitude. FLD: Rnwy 7L-25R open days only. Obstn lgts on apch end of rnwy 13 are obscured by trees. Parking facilities lmtd-itinerant military acft on unofficial business may find parking facilities unavailable. Avoid confusion of rnwy 1 with parallel taxiway to left.
**SYLVAN BEACON SITE 18, CHI-TWIN CITIES: Effective Oct 12, bcn will be discontd.
WAUSAU-RADIO: About Oct 1, VOR will be shut down until approx Nov. 30.
**WAUSAU-ALEXANDER ARPT: 200' lgtd twr erected 4.5 n mi E(53°T) at lat 44-58-30, long 89-32-20.
WYOMING: CASPER-NATRONA CO. ARPT-TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs.

WYOMING: FLD: Caution all acft entering tfc pat. occasional jet acft opern with pickup and dropping of tow targets.
CHEYENNE ARPT: Overrun lgts rnwy 8-26 inop.
GILLETTE ARPT: 50-75' W shoulder 1500' from N end N/S strip soft-clsd to hvy acft.
JACKSON ARPT: E/W rnwy closed - fence const across rnwy just W of N/S rnwy. Small acft may use E end of E/W rnwy in case of emerg, but at own risk. N/S rnwy clsd. - construction. Use new auxiliary 150' x 5400' strip E of N/S rnwy.
KEMMERER ARPT: Caution-reseeded and soft.
LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.
RIVERTON ARPT: Men and equip on fld 5000' W end rnwy 28 surfaced and available. Remainder arpt closed.
ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'.
ROCK SPRINGS-RADIO: ILS glide slope has lgt to moderate roughness between OM & LFR.
ROCK SPRINGS ARPT: Caution-first 500' NW end NW/SE rnwy clsd- marked.
SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.
TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip. on fld. Use extreme caution.
WHEATLAND ARPT: Closed - construction.
PUERTO RICO: SAN JUAN-ISLA GRANDE ARPT: First 500' W end rnwy 9R-27L unusable. Daylgt operns proceed with caution-ngt operns observe threshold lgts. Use outside taxi - way in front of large hangar near entrance. Equip. on hangar ramp. Cranes 50' to 60' high operg intermittently approx 1000' off E end rnwy 9R-27L. From 1600-2100Z daily three hour min ground delay on mil acft due priority airlift.
SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from tower-caution.

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS: IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions (television towers, smoke stacks, etc) which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. When the list does not appear in the Guide, all new obstructions will be carried as two-starred items in the NOTAMS. The list will be brought up to date each time it is issued; newly added or changed material will be indicated by arrows.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position, height and top elevation above MSL of these new obstructions can be taken from the list given below. New obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

LEGEND: (MSL) - Mean sea level. (AGL) - Above ground level. B - Antenna structure on a building. DISTANCE is given in nautical miles. BEARINGS are true.

(2 Oct 1956)

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods: (a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator(FPDI) centered, the omnibearing selector should read 0° with the to-from indication being "From"; or the omnibearing selector should read 180° with the to-from indication reading "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of +4° be indicated through use of the ground check or ± 6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of this date check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 112.0 mc)
*Chicago (Midway 111.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)
**Wichita (Municipal 111.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

Revisions to Instrument Approach Procedures

INSTRUMENT LANDING SYSTEM PROCEDURES

If an ILS instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below

NOTE: Bearings, headings, courses are magnetic. Distances are in nautical miles. Elevations and altitudes are in feet MSL. Ceilings are in feet above airport elevation. (2 Oct 1956)

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with GCA to final authorized landing minimums the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 sec during a precision approach or, for more than 30 sec during a surveillance apch; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing, minimums; or (D) if landing is not accomplished.

VOL. 11, NO. 16 .... OCTOBER 16, 1956

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
GENERAL SERVICES OFFICE

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

✓The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-..-.-.-... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON INSACS COMMUNICATIONS CHANNELS: If excessive interference is noted on INSACS VHF or UHF simplex frequencies, pilots should request the INSACS to reply on the VOR voice channel. This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, regardless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

(16 Oct 1956)

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.

2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of at least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

TOWER FREQUENCIES ON C&GS AERO CHARTS: Control towers which guard 122.7 mc instead of 122.5 mc for VHF communication with private aircraft will be so indicated by note in the "Remarks" column of the aerodrome tabulations on the back of the appropriate Sectional and Local Aeronautical Charts of the Coast and Geodetic Survey. Such notes now appear on the Chicago Sectional dated June 15, 1956, and the New York Sectional dated June 28, 1956, and will be shown on the next scheduled printings of the other charts concerned.

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective November 15, 1956, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Green civil airway No. 2 (Seattle, Wash. to Boston, Mass.), is amended by changing the portion between Albany, N.Y. and Boston, Mass. to read: "Albany N.Y. rdo rng stn; Hartford, Conn., rdo rng stn; the intsxn of the W course of the Providence, R. I. rdo rng and the SW course of the Boston, Mass. rdo rng to the Boston, Mass. rdo rng stn." (Note: Due to relctn of Westfield, Mass. rdo rng stn) (See Note following the next paragraph).

(2) Red civil airway No. 112 (Albany, N.Y. to Westfield, Mass.), is added to read: "From the intsxn of the W course of the Westfield, Mass. rdo rng with a straight line between Albany, N.Y. rdo rng stn and the Hartford, Conn. rdo rng stn to the Westfield, Mass. rdo rng stn." (Note: Lee intsxn: intsxn W course Westfield with direct line Albany to Hartford rdo rng stns...to be on-request reporting point. Westfield rng stn to be lctd at lat 42-14-54, long. 72-41-49, 5-1/2 miles N and 500 ft W of extended centerline of rnwy 20 Westfield Arpt. To be commissioned concurrently with arwy designation with proposed courses: 23°, 113°, 203° and 302° mag and toward the stn. True courses to be 9°, 99°, 189°, 288°.) (Blue 41 to remain in relatively same location, no redesignation necessary)

(3) VOR civil airway No. 2 (Seattle, Wash. to Boston, Mass.), is amended by changing the portion which reads: "Muskegon, Mich. omnirng stn, including a S alternate via the intsxn of the Milwaukee omnirng 126°T and the Muskegon omnirng 251°T radials;" to read: "Muskegon, Mich. omnirng stn, including a S alternate via the intsxn of the Milwaukee omnirng 111°T and the Muskegon omnirng 255° T radials;" (Note: Redesignated V2S between Milwaukee VOR and Muskegon VOR.)

(4) VOR civil airway No. 6 (Oakland, Calif. to New York, N.Y.), is amended by changing the portion which reads: "Sacramento, Calif. omnirng stn;" to read: "Sacramento, Calif. omnirng stn, including a S alternate via the intsxn of the Oakland omnirng 078°T and the Sacramento omnirng 192°T radials;" (Note: Added V6S between Oakland VOR and Sacramento VOR.)

(5) VOR civil airway No. 10 (Pueblo, Colo. to New York, N.Y.), is amended by changing the portion which reads: "South Bend, Ind. omnirng stn, including a N alternate from the Naperville omnirng stn to the South Bend omnirng stn via the intsxn of the Naperville omnirng 064°T and the South Bend omnirng 287°T radials; Litchfield, Mich. omnirng stn, including a N alternate;" to read: "South Bend, Ind. omnirng stn, including a N alternate from the Naperville omnirng stn to the South Bend omnirng stn via the intsxn of the Naperville omnirng 075°T and the South Bend omnirng 290°T radials; Litchfield, Mich. omnirng stn;" (Note: Changed Naperville VOR 064°T and South Bend VOR 287°T to Naperville VOR 075°T and South Bend VOR 290°T in V10N between Naperville VOR and South Bend VOR. Revoked V10N between South Bend VOR and Litchfield VOR.)

(6) VOR civil airway No. 22 (New Orleans, La. to Jacksonville, Fla.), is amended by changing the portion which reads: "Tallahassee, Fla. omnirng stn, including a N alternate via the intsxn of the Marianna omnirng 094°T and the Tallahassee omnirng 005°T radials; to the Jacksonville, Fla. omnirng stn." to read: "Tallahassee, Fla. omnirng stn; to the Jacksonville, Fla. omnirng stn, including a N alternate from the Marianna omnirng stn to the Jacksonville omnirng stn via the point of intsxn of the Marianna omnirng 094°T with the Albany, Ga. omnirng 152°T radials and the point of intsxn of the Tallahassee omnirng 091°T with the Valdosta, Ga., omnirng 234°T radials." (Note: Redesignated V22N between Marianna and Tallahassee to be between Marianna and Jacksonville via the Greenville Intsxn.)

(7) VOR civil airway No. 23 (San Diego, Calif. to Bellingham, Wash.), is amended by changing the portion which reads: "Fresno, Calif. omnirng stn;" to read: "Fresno, Calif. omnirng stn, including an E alternate;" and by changing the portion which reads: "the intsxn Sacramento omnirng 346°T and the Red Bluff omnirng 159°T radials;" to read: "intsxn of the Sacramento omnirng 346°T and the Red Bluff omnirng 158°T radials;" (Note: Added V23E between Bakersfield VOR and Fresno VOR. Changed Red Bluff VOR 159°T radial to 158°T between Sacramento VOR and Red Bluff VOR.)

(8) VOR civil airway No. 26 (Cherokee, Wyo. to Cleveland, Ohio), is amended by changing the portion which reads: "Minneapolis, Minn. omnirng stn, including a S alternate;" to read: "Minneapolis, Minn. omnirng stn, including a S alternate via the intsxn of the Redwood Falls omnirng 075°T and the Minneapolis omnirng 194°T radials;" (Note: Redesignated V26S between Redwood Falls VOR and Minneapolis VOR.)

(9) VOR civil airway No. 29 (Salisbury, Md to United States-Canadian Border), is amended by changing the portion which reads: "West Chester, Pa. omnirng stn; Allentown, Pa. omnirng stn;" to read: "West Chester, Pa omnirng stn; Pottstown, Pa. omnirng stn; Allentown, Pa. omnirng stn;" (Note: Redesignated V29 between West Chester VOR and Allentown VOR to include Pottstown, Pa. VOR.)

(10) VOR civil airway No. 30 (Milwaukee, Wis. to Nantucket, Mass.), is amended by changing the portion which reads: "From the Milwaukee, Wis. omnirng stn via the Pullman, Mich. omnirng stn, including a S alternate via the intsxn of the Milwaukee omnirng 126°T and the Pullman omnirng 278°T radials;" to read: "From the Milwaukee, Wis. omnirng stn via the Pullman, Mich. omnirng stn, including a S alternate via the point of intsxn of the Milwaukee omnirng 135°T and the Chicago Heights omnirng 358°T radials;"

(Note: Redesignated V30S between Milwaukee VOR and Pullman VOR.)

(11) VOR civil airway No. 37 (Savannah, Ga. to Erie, Pa.), is amended to read: "From the Savannah, Ga. omnirng stn via the Columbia, S. C. omnirng stn to the Charlotte, N. C. omnirng stn. From the Pulaski, Va. omnirng stn to the point of intsxn of the Charleston, W. Va. omnirng 129°T and the Montebello, Va. omnirng 256°T radials. From the Elkins, W. Va. omnirng stn via the Morgantown, W. Va. Omnirng stn; Pittsburgh, Pa. omnirng stn; to the Erie, Pa. omnirng stn." (Note: Added a new middle portion to V37 from Pulaski VOR to the Marie Intsxn.)

(12) VOR civil airway No. 55 (Dayton, Ohio to Green Bay, Wis.), is amended by changing the portion which reads: "South Bend, Ind. omnirng stn; Pullman, Mich. omnirng stn;" to read: "South Bend, Ind. omnirng stn; Keeler, Mich. omnirng stn; Pullman, Mich. omnirng stn;" (Note: V55 redesignated to add Keeler VOR between South Bend VOR and Pullman VOR.)

(13) VOR civil airway No. 68 (Albuquerque, N. Mex. to Brownsville, Tex.), is amended by changing the portion which reads: "San Antonio, Tex. omnirng stn;" to read: "San Antonio, Tex. omnirng stn, including a N alternate via the point of intsxn of the San Antonio omnirng 334°T and the Lometa, Tex., omnirng 192°T radials;" (Note: Added V68N between Junction VOR and San Antonio VOR.)

(14) VOR civil airway No. 84 (Bradford, Ill. to Buffalo, N. Y.), is amended by changing the last portion to read: "From the Wheeling, Ill. omnim g stn via the Pullman, Mich. omnirng stn; Lansing, Mich. omnirng stn; Selfridge, Mich. omnirng stn; London, Ont. omnirng stn; to the Buffalo, N. Y. omnirng stn." (Note: Added new portion from Wheeling VOR to Pullman VOR.)

(15) VOR civil airway No. 85 (Rock River, Wyo. to Casper, Wyo.), is amended to read: "From the Rock River, Wyo. omnirng stn to the Casper, Wyo. omnirng stn, including a W alternate via the intsxn of the Rock River omnirng 336°T and the Casper omnirng 216° T radials." (Note: Revoked V85E and added V85W.)

(16) VOR civil airway No. 97 (Miami, Fla. to Alexandria, Minn.), is amended by changing the portion which reads: "Tallahassee, Fla. omnirng stn, including an E alternate from the Tampa omnirng stn to the Tallahassee omnirng stn via the intsxn of the Tampa omnirng 331°T and the Cross City omnirng 182°T radials and the Cross City, Fla. omnirng stn;" to read: "Tallahassee, Fla. omnirng stn, including an E alternate from the Tampa omnirng stn to the Tallahassee omnirng stn via the Cross City, Fla. omnirng stn;" (Note: Redesignated V97E between Tampa VOR and Tallahassee VOR.)

(17) VOR civil airway No. 100 (North Platte, Nebr. to Detroit, Mich.), is added to read: "From the North Platte, Nebr. omnirng stn via the Sioux City, Iowa omnirng stn; Waterloo, Iowa omnirng stn; to the Polo, Ill. omnirng stn. From the Wheeling, Ill. omnirng stn via the intsxn of the Wheeling omnirng 093°T and the Keeler omnirng 271°T radials; Keeler, Mich. omnirng stn; point of intsxn of the Litchfield, Mich. omnirng 050°T and the Salem omnirng 257°T radials; to the Salem, Mich. omnirng stn." (Note: This is a new airway except for portion from AldenIntsxnto Waterloo VOR which was formerly V158.)

(18) VOR civil airway No. 116 (Kansas City, Mo. to New York, N. Y.), is amended by changing the portion which reads: "Naperville, Ill. omnirng stn; Pullman, Mich. omnirng stn; Salem, Mich. omnirng stn;" to read: "Naperville, Ill. omnirng stn; Keeler, Mich. omnirng stn; point of intsxn of the Litchfield, Mich. 050°T and the Salem omnirng 257°T radials; Salem, Mich. omnirng stn;" (Note: Redesignated V116 between Naperville VOR and Salem VOR. The portion of V116 between Naperville VOR and Pullman VOR is revoked. The portion of V116 between Pullman VOR and Salem VOR is redesignated as a part of V170.)

(19) VOR civil airway No. 126 (Chicago, Ill. to New York, N. Y.), is amended by changing the portion which reads: "Wilkes-Barre-Scranton, Pa. omnirng stn; to the point of intsxn of the Wilkes-Barre-Scranton, Pa. omnirng 117° T and the Wilton, Conn. omnirng 240°T radials." to read: "Wilkes-Barre-Scranton, Pa omnirng stn; Huguenot, N. Y. omnirng stn; to the Wilton, Conn. omnirng stn, excluding daily from sunrise to sunset, annually during the period from March 1 to November 1, the portion of this arwy below 6000' above mean sea level which overlaps the West Point Restricted Area (R-93)." (Note: Revoked portion of V126 from Wilkes-Barre-Scranton, Pa. VOR to Patterson, N. J. Intsxn and added new portion Wilkes-Barre-Scranton VOR via Huguenot VOR to Wilton VOR.)

(20) VOR civil airway No. 146 (Wilkes-Barre, Pa. to Woodstock, Conn.), is amended to read: "From the Wilkes-Barre-Scranton, Pa omnirng stn via the Huguenot N. Y. omnirng stn; point of intsxn of the Wilton, Conn. omnirng 295°T and the Poughkeepsie omnirng 236°T radials; Poughkeepsie, N. Y. omnirng stn; to the point of intsxn of the Poughkeepsie omnirng 079°T and the Norwich, Conn. omnirng 347°T radials." (Note: Added new portion to V146 from Wilkes-Barre-Scranton VOR to Poughkeepsie VOR.)

(21) VOR civil airway No. 147 (Philadelphia, Pa. to Rochester, N. Y.), is amended by changing the portion which reads: "From the West Chester, Pa. omnirng stn via the Allentown, Pa. omnirng stn;" to read: "From the Philadelphia, Pa. Intnl Arpt ILS lclzr via the Pottstown, Pa. omnirng stn; Allentown, Pa. omnirng stn;" (Note: Redesignated portion of V147 which was from West Chester VOR direct to Allentown VOR, to be from Philadelphia Intnl Arpt ILS lclzr via Pottstown VOR to Allentown VOR.)

(22) VOR civil airway No. 148 (Denver, Colo. to North Platte, Nebr.), is amended to read: "From the Denver, Colo. omnirng stn via the intsxn of the Denver omnirng 186°T and the Kiowa omnirng 278°T radials; Kiowa, Colo. omnirng stn; Thurman, Colo. omnirng stn; Imperial, Nebr. omnirng stn; to the North Platte, Nebr. omnirng stn." (Note: Added new portion to V148 from Denver VOR via Parker Intsxn, Kiowa VOR to Thurman VOR.)

(23) VOR civil airway No. 150 (San Francisco, Calif. to Reno, Nev.), is amended to read: "From the San Francisco, Calif. terminal omnirng stn via the intsxn of the San Francisco terminal omnirng 304°T and the Sacramento omnirng 233°T radials; Sacramento, Calif. omnirng stn; intsxn of the Sacramento 097°T and the Reno 208°T radials; to the Reno, Nev. omnirng stn." (Note: Added new portion to V150 from San Francisco TVOR to Sacramento VOR.)

(24) VOR civil airway No. 158 (Iowa Falls, Iowa to Waterloo, Iowa), is revoked. (Note: V158 revoked as such and made a part of V100.)

(25) VOR civil airway No. 163 (Brownsville, Tex. to Oklahoma City, Okla.), is amended to read: "That airspace over U. S. territory from the Brownsville, Tex. omnirng stn via the intsxn of the Brownsville omnirng 339°T and the Alice omnirng 171°T radials; Alice, Tex. omnirng stn; San Antonio, Tex. omnirng stn; intsxn of the San Antonio omnirng 002°T and the Lometa omnirng 173°T radials; Lometa, Tex. omnirng stn, including a W alternate via the intsxn of the San Antonio omnirng 334°T and the Lometa omnirng 192°T radials; Mineral Wells, Tex. omnirng stn; Fort Worth, Tex. omnirng stn; Ardmore, Okla. omnirng stn; intsxn of the Ardmore omnirng 350°T and the Oklahoma City omnirng 137°T radials; to the Oklahoma City omnirng stn, including a W alternate from the Ardmore omnirng stn to the Oklahoma City omnirng stn via the intsxn of the Ardmore omnirng 331° T and the Oklahoma City omnirng 180°T radials and also an E alternate from the Ardmore omnirng stn to the Oklahoma City omnirng stn via the point of intsxn of the Oklahoma City omnirng 107°T and the Tulsa, Okla. omnirng 222°T radials. The portions of this arwy which conflict with the Corpus Christi Restricted Area (R-277) are excluded." (Note: Added new portion San Antonio VOR to Mineral Wells VOR via Lometa VOR. Added V163W San Antonio to Lometa. Redesignated portions of V163 Waco to Mineral Wells as V17W.)

(26) VOR civil airway No. 170 (Milwaukee, Wis. to Philadelphia, Pa.), caption changed and is amended by changing new first portion to read: "From the Milwaukee, Wis. omnirng stn via the Pullman, Mich. omnirng stn; to the Salem, Mich. omnirng stn." (Note: Added a new first portion Milwaukee VOR to Salem VOR via Pullman VOR. Portion Milwaukee to Pullman is also V30. Portion Pullman to Salem was formerly V116.)

(27) VOR civil airway No. 187 (Chicago, Ill. to Milwaukee, Wis.), is amended to read: "From the Chicago Heights, Ill. omnirng stn via the intsxn of the Chicago Heights omnirng 358°T and the Milwaukee omnirng 135° T radials; to the Milwaukee, Wis. omnirng stn, including an E alternate via the intsxn of the Chicago Heights omnirng 013°T and the Milwaukee omnirng 135°T radials." (Note: Redesignated V187 from Chicago Heights VOR to Milwaukee VOR and added V187E.)

(28) VOR civil airway No. 191 (Walnut Ridge, Ark. to Milwaukee, Wis.), caption changed and is amended by adding a new last portion to read: "From the Chicago, Ill. O'Hare Intnl Arpt terminal omnirng stn via the point of intsxn of the Chicago Heights omnirng 358°T and the Milwaukee omnirng 135°T radials; to the Milwaukee, Wis. omnirng stn." (Note: Added new portion from O'Hare TVOR to Milwaukee VOR.)

(29) VOR civil airway No. 214 (Muskegon, Mich. to Saginaw, Mich.), is revoked. (Note: V412 revoked as such and made a part of V216.)

(30) VOR civil airway No. 216 (Janesville, Wis. to Saginaw, Mich.), is amended to read: "From the Janesville, Wis. omnirng stn via the Muskegon, Mich. omnirng stn; to the Saginaw, Mich. nondirectional rdo bcn." (Note: Extended present V216 from Janesville VOR direct to Muskegon VOR and also added portion from Muskegon VOR to Saginaw H which was formerly V214.)

(31) VOR civil airway No. 218 (Chicago, Ill. to Flint, Mich.), is amended to read: "From the point of intsxn of the Naperville omnirng 296°T and the Polo, Ill omnirng 085° T radials via the Naperville, Ill. omnirng stn; Keeler, Mich. omnirng stn; Lansing, Mich. omnirng stn; to the point of intsxn of the Lansing omnirng 068°T and the Salem, Mich. omnirng 342°T radials." (Note: Redesignated V218 from Sycamore Intsxn to the Flint Intsxn. Portion from Sycamore Intsxn to Naperville VOR was formerly V228. Portion Naperville VOR to Lansing VOR is new airway.)

(32) VOR civil airway No. 228 (Naperville, Ill. to Sycamore, Ill.), is revoked. (Note: V228 redesignated as part of V218)

(33) VOR civil airway No. 228 (Wheeling, Ill. to South Bend, Ind.), is added to read: "From the Wheeling, Ill. omnirng stn to the South Bend, Ind. omnirng stn." (Note: This is a new airway. The airway between Naperville VOR and Sycamore Intsxn which was formerly numbered V228 was redesignated as part of V218.)

(34) VOR civil airway No. 249 (New York, N. Y. to Port Jervis, N. Y.), is added to read: "From the Caldwell, N. J. omnirng stn to the Huguenot, N. Y. omnirng stn." (Note: New airway.)

(35) VOR civil airway No. 251 (Philadelphia, Pa. to New York, N. Y.), is added to read: "From the West Chester, Pa. omnirng stn via the Pottstown, Pa. omnirng stn; point of intsxn of Pottstown 044°T and the Allentown, Pa 103°T radials; to the Caldwell, N. J. omnirng stn." (Note: New arwy from Pottstown VOR to Caldwell VOR. Portion from West Chester VOR to Pottstown VOR is also V29.)

(36) VOR civil airway No. 252 (Binghamton, N. Y. to New York, N. Y.), is added to read: "From the Binghamton, N. Y. omnirng stn via the point of intsxn of the Binghamton omnirng 130°T and the Wilkes-Barre-Scranton, Pa. omnirng 358°T radials; Huguenot, N. Y.

omnirng stn; to the point of intsxn of the Wilkes-Barre-Scranton, Pa. 117°T and the Wilton, Conn. omnirng 240°T radials." (Note: New arwy.)

(37) VOR civil airway No. 253 (Unassigned.)

(38) VOR civil airway No. 254 (Reinholds, Pa. to Columbus, N. J.), is added to read: "From the point of intsxn of the West Chester, Pa. omnirng 314°T and the Allentown, Pa. omnirng 228° T radials via the Pottstown, Pa. omnirng stn; to the point of intsxn of the Pottstown omnirng 104°T and the Colts Neck, N. J. omnirng 242°T radials." (Note: New airway.)

(39) VOR civil airway No. 255 (Unassigned.)

(40) VOR civil airway No. 256 (Reinholds, Pa. to Warrington, Pa.), is added to read: "From the point of intsxn of the West Chester, Pa. omnirng 314° T and the Allentown, Pa. omnirng 228°T radials via the Pottstown, Pa omnirng stn; to the point of intsxn of the West Chester, Pa. omnirng 051°T and the Pottstown omnirng 083°T radials." (Note: New arwy.)

(41) VOR civil airway No. 257 (Unassigned.)

(42) VOR civil airway No. 258 (Charleston, W. Va. to Roanoke, Va.), is added to read: "From the Charleston, W. Va. omnirng stn via the point of intsxn of the Charleston omnirng 129°T and the Montebello, Va. omnirng 256°T radials; to the Roanoke, Va. terminal omnirng stn." (Note: New airway.)

(43) VOR civil airway No. 259 (Unassigned.)

(44) VOR civil airway No. 260 (Charleston, W. Va. to Roanoke, Va.), is added to read: "From the Charleston, W. Va. omnirng stn via the intsxn of the Charleston omnirng 104°T and the Roanoke terminal omnirng 328° T radials; to the Roanoke, Va. terminal omnirng stn." (Note: New airway.)

CONTROL AREAS: (1) Red civil airway No. 112 (Albany, N.Y. to Westfield, Mass.), is added to read: "All of Red civil airway No. 112."

(2) VOR civil airway No. 23 (San Diego, Calif. to Bellingham, Wash.), is amended to read: "All of VOR civil arwy No. 23, including E and W alternates, but excluding the airspace between the main arwy and its W alternate between the Portland, Ore. omnirng stn and the Seattle, Wash. omnirng stn."

(3) VOR civil airway No. 85 (Rock River, Wyo. to Casper, Wyo.), is amended to read: "All of VOR civil arwy No. 85, including a W alternate."

(4) VOR civil airway No. 97 (Miami, Fla. to Alexandria, Minn.), is amended to read: "All of VOR civil arwy No. 97, including E and W alternates, but excluding all the airspace below 2000 ft above mean sea level which lies beyond the continental limits of the U. S. and also excluding the airspace between the main arwy and its E alternate between the Tampa, Fla. omnirng stn and the Tallashassee, Fla. omnirng stn."

(5) VOR civil airway No. 100 (North Platte, Nebr. to Detroit, Mich.), is added to read: "All of VOR civil airway No. 100."

(6) VOR civil airway No. 146 (Wilkes-Barre, Pa. to Woodstock, Conn.), is amended to read: "All of VOR civil arwy No. 146."

(7) VOR civil airway No. 148 (Denver, Colo. to North Platte, Nebr.), is amended to read: "All of VOR civil arwy No. 148."

(8) VOR civil airway No. 150 (San Francisco, Calif. to Reno, Nev.), is amended to read: "All of VOR civil arwy No. 150."

(9) VOR civil airway No. 158 (Iowa Falls, Iowa, to Waterloo, Iowa), is revoked.

(10) VOR civil airway No. 163 (Brownsville, Tex. to Oklahoma City, Okla.), is amended to read: "All of VOR civil arwy No. 163, including W alternates and an E alternate."

(11) VOR civil airway No. 170 (Milwaukee, Wis. to Philadelphia, Pa.), is amended to read: "All of VOR civil arwy No. 170, including a N alternate."

(12) VOR civil airway No. 191 (Walnut Ridge, Ark. to Milwaukee, Wis.), is amended to read: "All of VOR civil arwy No. 191."

(13) VOR civil airway No. 214 (Muskegon, Mich. to Saginaw, Mich.), is revoked.

(14) VOR civil airway No. 216 (Janesville, Wis. to Saginaw, Mich.), is amended to read: "All of VOR civil arwy No. 216."

(15) VOR civil airway No. 218 (Chicago, Ill. to Flint, Mich.), is amended to read: "All of VOR civil arwy No. 218."

(16) VOR civil airway No. 228 (Naperville, Ill. to Sycamore, Ill.), is revoked.

(17) VOR civil airway No. 228 (Wheeling, Ill. to South Bend, Ind.), is added to read: "All of VOR civil arwy No. 228."

(18) VOR civil airway No. 249 (New York, N.Y. to Port Jervis, N.Y.), is added to read: "All of VOR civil arwy No. 249."

(19) VOR civil airway No. 251 (Philadelphia, Pa. to New York, N.Y.), is added to read: "All of VOR civil arwy No. 251."

(20) VOR civil airway No. 252 (Binghamton, N.Y. to New York, N.Y.), is added to read: "All of VOR civil arwy No. 252."

(21) VOR civil airway No. 253 (Unassigned.)

(22) VOR civil airway No. 254 (Reinholds, Pa. to Columbus, N.J.), is added to read: "All of VOR civil arwy No. 254."

(23) VOR civil airway No. 255 (Unassigned.)

(24) VOR civil airway No. 256 (Reinholds, Pa. to Warrington, Pa.), is added to read: "All of VOR civil arwy No. 256."

(25) VOR civil airway No. 257 (Unassigned.)

(26) VOR civil airway No. 258 (Charleston, W. Va. to Roanoke, Va.), is added to read: "All of VOR civil arwy No. 258."

(27) VOR civil airway No. 259 (Unassigned.)

(28) VOR civil airway No. 260 (Charleston, W. Va. to Roanoke, Va.), is added to read: "All of VOR civil airway No. 260."

CONTROL AREA EXTENSIONS: (1) (Moses Lake, Wash.), is amended to read: "That airspace S of Green civil arwy No. 2 within a 30-mile radius of Larson AFB, excluding the portion which lies within the boundaries of Prohibited Area (P-246), and the airspace within 10 miles either side of a line extending from the Moses Lake nondirectional rdo bcn (MSK) to the Walla Walla, Wash., rdo rng stn."

(2) (Chicopee, Falls, Mass.), is amended to read: "That airspace NE of Chicopee Falls bounded on the NW by Red civil arwy No. 33, on the NE by VOR civil arwy No. 151 and the Worcester, Mass. control zone, on the SE by Amber civil arwy No. 7 and on the S by a line extending from a point at lat 42-08-50, long. 72-28-00 to a point at lat 42-04-30, long. 72-11-30, excluding the airspace below 2500 ft, MSL; that airspace N of Chicopee Falls bounded on the W by Blue civil arwy No. 41, on the N by VOR civil arwy No. 2 and on the SE by VOR civil arwy No. 39; that airspace NW of Chicopee Falls lying within an arc of 38 statute miles centered on the Westover, Mass. AFB bounded on the N by VOR civil arwy No. 2, on the E by Blue civil arwy No. 41 and on the S by Red civil arwy No. 112."

(3) (Phoenix, Ariz.), is amended to read: "That airspace SW of Phoenix bounded on the N and E by VOR civil arwy No. 16, on the S by VOR civil arwy No. 66N, and on the W by VOR civil arwy No. 87; that airspace NW and N of Phoenix bounded on the S by Green civil arwy No. 5, on the W by long. 112-50-00, on the N by lat 34-00-00, and on the E by VOR civil arwy No. 95; that airspace within 5 miles either side of the E course of the Phoenix rdo rng extending from the rdo rng stn to a point 25 miles E. (Note: Caution Area C-422 to be rescinded prior to or concurrently per ASP Meeting 469)

(4) (Windsor Locks, Conn.), is amended to read: "That airspace in the vcnty of Bradley Field, Windsor Locks, Conn. bounded on the SW and W by Blue civil arwy No. 41, on the NE by Red civil arwy No. 33, on the N by a line extending from a point at lat 42-08-50, long. 72-28-00 to a point at lat 42-04-30, long. 72-11-30, and on the SE by Amber 7; that airspace SW of Bradley Field bounded on the NW by Red civil arwy No. 33, on the NE by Blue civil arwy No. 41 and on the S by Red civil arwy No. 13."

(5) (Albuquerque, N. Mex.), is amended to read: "That airspace within a 40 nautical mile radius of the Albuquerque omnirng stn lying N of VOR civil arwy No. 12."

(6) (Olathe, Kans.), is amended to read: "That airspace not presently controlled bounded on the NW by a line extending from the St. Joseph, Mo. omnirng stn to a point at lat 39-17-00, long. 96-23-00, on the W by a line extending from that point to the Emporia, Kans. omnirng stn and by the eastern edge of the Wichita, Kans. Control area extension, on the S by the northern edge of Red civil arwy No. 105 to the eastern edge of Amber civil arwy No. 4, thence N along the eastern edge of Amber 4 to lat 38-12-00, thence E along lat 38-12-00 to the western edge of VOR civil airway No. 205, thence N along the western edge of VOR civil arwy No. 205 to the Kansas City, Mo. omnirng stn, thence N along the western edge of VOR civil arwy No. 15 to a point at lat 39-55-10, long. 95-00-45."

(7) (Kaneohe, Oahu, T.H.), is added to read: "That airspace from 700 ft upwards within the following area: From lat 21-35-00N, long. 157-42-00W, to lat 21-36-00N, long. 157-56-00W, to lat 21-38-00N, long. 158-01-00W, to lat 21-48-00N, long. 158-09-30W, thence clockwise along the arc of an 8 nautical mile radius circle centered at lat 21-49-30N, long. 158-01-00W, to lat 21-57-30N, long. 158-02-00W, to lat 21-54-30N, long. 157-36-00W, thence clockwise along the arc of an 8 nautical mile radius circle centered at lat 21-46-30N, long. 157-37-00W, to lat 21-41-00N, long. 157-30-30W, thence to point of beginning, excluding that airspace which overlaps Warning Area W-318 and excluding the airspace below 3000 ft MSL lying within Restricted Area R-323 and excluding the airspace below 5000 ft lying within Caution Area C-330. The portion of this control area extension which overlaps the Kahuku Restricted Area R-324 shall be used only after obtaining prior approval from Civil Aeronautics Administration Air Traffic Control."

(8) (Marysville, Calif.), is added to read: "That airspace E of Marysville bounded on W by VOR civil arwy No. 23, on the N by VOR civil arwy No. 200, on the S by VOR civil arwy No. 212 and on the E by Restricted Area R-265; that airspace NE of Marysville bounded on the S by VOR civil arwy No. 200, on the W by VOR civil arwy No. 23, on the N by the Red Bluff, Calif. control area extension, and on the E by a line extending from a point at lat 39-24-00, long. 121-33-00 via a point at lat 39-50-00, long. 121-43-00 to a point at lat 40-05-20, long. 121-53-00."

CONTROL ZONES: (1) Three-mile radius zones, is amended by deleting the following airport: Jacksonville, N.C.: New River MCAF. (Note: Added with next section.)

(2) (Jacksonville, N.C.), is added to read: "Within a 3 mile radius of the New River MCAF, Jacksonville, N. C., and within 2 miles either side of a 226°T bearing extending from the New River MCAF to a point 12 miles SW, excluding the airspace above 5500 ft. MSL daily from sunset to sunrise."

(3) (Long Beach, Calif.), is amended to read: "That airspace within a 5 mile radius of Long Beach Mun. Arpt. including the airspace within a 5 miles radius of NAS Los Alamitos, Calif., and the airspace within 2 miles either side of the SE course of the Long Beach rdo rng extending from the rdo rng stn to a point 14 miles SE. excluding the portion in conflict

with El Toro MCAF control zone which includes the Orange County Airport."

(4) (Charleston, W. Va.), is amended by changing the last portion to read: "and within 2 miles either side of the 061°T and 241°T radials of the Charleston omnirng extending from the five mile radius zone to a point 10 miles SW of the omnirng stn." (Note: Corrected to use VOR radials in lieu of the 245°T bearing from the arpt so that control zone will conform with AL Procedures)

(5) (El Toro, Calif.), is amended by adding the following to present control zone: "and within 5 miles either side of a line bearing 175° T extending from the El Toro rdo rng stn to Amber civil arwy No. 1°"

(6) (Kaneohe, Oahu, T.H.), is added to read: "That airspace from the surface to 5000 ft within a radius of 3 miles centered on the Marine Corps Air Stn, Kaneohe Bay, (lat 21-27-30, long. 157-46-30W), and within 2 miles either side of aline bearing 11°T extending from the MCAS to a point 16 miles N."

REPORTING POINTS: (1) Green civil airway No. 2 (Seattle, Wash. to Boston, Mass.), is amended by deleting the following reporting points: "Bozeman, Mont. rdo rng stn; Westfield, Mass. rdo rng stn; the intsxn of the NE course of the Hartford, Conn. rdo rng and the SE course of the Westfield, Mass. rdo rng." (Note: Westfield rng stn added to Red 112, and Woodstock intsxn added to Amber 7 as compulsory reporting points - due to relctn of Westfield rng stn.) (Make Bozeman, Mont. rdo rng stn "on-request")

(2) Amber civil airway No. 1 (United States-Mexican Border to Nome, Alaska), is amended after "Los Angeles, Calif., rdo rng stn;" by adding the following reporting point: "the intsxn of the NW course of the Palmdale, Calif., rdo rng and the S course of the Bakersfield, Calif. rdo rng;" (Note: Wheeler Ridge intsxn: changed from "on-request" to Compulsory reporting point. Depict as compulsory below 15, 200 ft.)

(3) Amber civil airway No. 2 (Long Beach, Calif. to Point Barrow, Alaska), is amended by deleting the following reporting point: "the intsxn of the N course of the Helena, Mont. rdo rng and the SW course of the Great Falls, Mont. rdo rng." (Note: Craig intsxn: intsxn N Helena and SW Great Falls deleted as compulsory - make "on-request" in lieu thereof)

(4) Amber civil airway No. 7 (Key West, Fla. to United States-Canadian Border), is amended after "Hartford, Conn. rdo rng stn;" by adding the following reporting point: "the intsxn of the NE course of the Hartford, Conn. rdo rng and the SE course of the Chicopee Falls, Mass. rdo rng;" (Note: Woodstock intsxn: depict as compulsory below 15, 200 ft.)

(5) Amber civil airway No. 8 (Los Angeles, Calif. to Ellensburg, Wash.), is amended by deleting the following reporting point: "the intsxn of the NW course of the Santa Barbara Calif., rdo rng and the SW course of the Fresno, Calif. rdo rng;" (Note: Bradley intsxn NW Santa Barbara and SW Fresno - make "on-request" per regional request)

(6) Red civil airway No. 112 (Albany, N.Y. to Westfield, Mass.), is added to read: "Westfield, Mass. rdo rng stn."

(7) Blue civil airway No. 35 (Oxnard, Calif. to Bakersfield, Calif.), is amended to read: "No reporting point designation." (Note: Above rewrite deletes "Lebec, Calif. fan marker" as compulsory reporting point. Change to "on-request" per regional request.)

VOR REPORTING POINTS: (1) Domestic VOR reporting points is amended by adding the following reporting points: (a) Lometa, Tex. omnirng stn; (b) Wheeling, Ill. omnirng stn; (c) Keeler, Mich. omnirng stn; (d) Huntsville, Ala., omnirng stn (For acft operg below 15, 200' AMSL) (See note below.) (e) Eagle Lake, Tex., omnirng (For acft operg below 15, 200' AMSL) (See note below.) (f) Alice, Tex. omnirng stn (For acft operg below 15, 200' AMSL). (See note below.) (g) Apple Intsxn: the intsxn of the Palmdale, Calif. omnirng 096°T and the Daggett, Calif. omnirng 235°T radials.

(2) Domestic VOR reporting points is amended by changing the following reporting point to read: (a) Sequin Intsxn - the intsxn of the San Antonio, Tex. omnirng 089°T and the Austin, Tex. omnirng 189°T radials. (For acft operg below 15, 200 ft AMSL) (See note below.)

(3) Domestic VOR reporting points is amended by revoking the following reporting points: (a) Bozeman, Mont. omnirng stn. (b) Perris Intsxn - the intsxn of the Long Beach, Calif. omnirng 095°T and the March (Riverside), Calif. omnirng 188°T radials. (c) El Monte Intsxn - the intsxn of the Ontario, Calif. omnirng 292°T and the Long Beach, Calif. omnirng 357°T radials. (d) Berry Intsxn - the Intsxn of the Ontario, Calif. omnirng 300°T, the Long Beach, Calif. omnirng 346°T and the Los Angeles, Calif. omnirng 035°T radials. (e) Catalina Intsxn - the intsxn of the Los Angeles, Calif. omnirng 185°T radial, the Long Beach, Calif. omnirng 220°T radial and a straight line bearing 099°T to the Oceanside, Calif. nondirectional rdo bcn.

NOTE: The chart depiction of the existing reporting points indicated below should be changed from, "all altitudes" to "below 15, 200 ft above mean sea level."

(VOR) Waterway, Tex. Intsxn (Beaumont 168°T - Lake Charles 244°T, Galveston, Tex., 064°T.

(LF) Port Arthur, Tex. Intsxn (Beaumont S course LFR and Galveston NE course LFR on Green 6.

SPECIAL MILITARY EXERCISE: Effective October 25 - November 14, 1956, SAC will conduct special low level missions with jet acft operating between 350-500 knots. Low level - 500 ft above terrain - route direct between Offutt AFB and Bemidji, Minn. Arpt. Acft will execute pull-up over Bemidji Arpt climbing to high altitude on direct course to Grand Island LFR. Additional low level operations will begin when crossing 39-45N on direct route Grand Island-Camp Phillips Bomb Range - adjacent to Smoky Hill AFB- thence to Camp Phillips Bomb Range, thence to a point near Clay Center, Kansas where direct route between Camp Phillips Bomb Range and Offutt AFB crosses the Republican River. Climb will be started to high altitude when crossing the river. All low level operations will be conducted in accordance with VFR. Aircraft will arrive over Bemidji Airport in elements of two at ten-minute intervals during period 0945-1315C on the following dates: Oct 25, 30; Nov. 2, 7 and 14. If unfavorable weather exists on any of the primary dates, mission for that day will be postponed in increments of 24 hours until flown. Aircraft will approach Bemidji Arpt. from S to N crossing intersection of runways at 500 ft. before starting pull-up. An observer team will be stationed at Bemidji Airport with UHF facilities for direct communication with participating aircraft and will notify them when approaching from S of any other aircraft in vicinity of airport during low-level pass. All aircraft are warned to avoid use of area within 5-mile radius of Bemidji Airport during scheduled dates of this mission. All aircraft also requested to be alert on all other segments of the subject mission.

ON-REQUEST REPORTING POINTS: The following on-request reporting points are changed, designated, redesignated or cancelled and shall become effective November 15, 1956:

SEE ALSO PAGE 26

CHANGE SPELLING:

(1) HULTON, WIS. INTSXN - Corrected to read: HOULTON, WIS. INTSXN.

DESIGNATE:

(1) ALTAMONT (VHF) INTSXN - the intsxn of the 078°T radial of the Oakland, Calif. VOR and the 192° T radial of the Sacramento, Calif. VOR.

(2) ANTELOPE (VHF) INTSXN - the intsxn of the 297°T radials of the Salt Lake City, Utah VOR and the 217°T radial of the Ogden, Utah VOR.

(3) BERRY (VHF) INTSXN - the intsxn of the 035°T radial of the Los Angeles, Calif. VOR and the 300°T radial of the Ontario, Calif. VOR.

(4) BOZEMAN, MONT. LFR

(5) BOZEMAN, MONT. VOR

(6) BRADLEY (LF) INTSXN - the intsxn of the SW course of the Fresno, Calif. LFR and the N course of the Santa Barbara, Calif. LFR.

(7) BRAINARD (LF) INTSXN - the intsxn of the 007°T radial of the Poughkeepsie, N.Y. VOR and a 321°T bearing toward Albany, N.Y. LFR.

(8) BULL HEAD (VHF) INTSXN - the intsxn of the 109°T radial of the Wheeling, Ill. VOR and the 358° T radial of the Chicago Heights, Ill. VOR.

(9) CAPTAIN (VHF) INTSXN - the intsxn of the 044°T radial of the Pottstown, Pa. VOR and the 104°T radial of the Allentown, Pa. VOR.

(10) CATALINA (VHF) INTSXN - the intsxn of the 185°T radial of the Los Angeles, Calif. VOR and the 220°T radial of the Long Beach, Calif. VOR.

(11) COLUMBUS (VHF) INTSXN - the intsxn of the 104°T radial of the Pottstown, Pa. VOR and the 242° T radial of the Colts Neck, N.J. VOR.

(12) CRAIG (LF) INTSXN - the intsxn of the SW course of the Great Falls, Mont. LFR and the N course of the Helena, Mont. LFR.

(13) EL MONTE (VHF) INTSXN - the intsxn of the 357° T radial of the Long Beach, Calif. VOR and the 292°T radial Ontario, Calif. VOR.

(14) FREDERICKSBURG (VHF) INTSXN - the intsxn of the 334°T radial of the San Antonio Tex. VOR and the 112°T radial of the Junction, Tex. VOR and the 192°T radial of the Lometa, Tex. VOR.

(15) GIANT ROCK (VHF) INTSXN - the intsxn of the 068°T radial, of the Ontario , Calif. VOR and the 160°T radial of the Daggett, Calif. VOR.

(16) GRAPEVINE (VHF) INTSXN - the intsxn of the 197°T radial of the Little Rock, Ark. VOR and the 248°T radial of the Pine Bluff, Ark. VOR.

(17) GREENBRIER (VHF) INTSXN - the intsxn of the 328°T radial of the Roanoke, Va. VOR and the 025°T radial of the Pulaski, Va. VOR.

(18) HERRICK (VHF) INTSXN - the intsxn of the 130°T radial of the Binghamton, N.Y. VOR and the 359°T radial of the Wilkes-Barre, Pa. VOR.

(19) HICKORY (VHF) INTSXN - the intsxn of the 091°T radial of the Pullman, Mich. VOR and the 061°T radial of the Keeler, Mich. VOR.

(20) HUDSON (VHF) INTSXN - the intsxn of the 349°T radial of the Tampa, Fla. VOR and the 287°T radial of the Lakeland, Fla. VOR.

(21) JACKSON (VHF) INTSXN - the intsxn of the 050°T radial of the Litchfield, Mich. VOR and the 257°T radial of the Salem, Mich. VOR.

(22) KALAMAZOO (VHF) INTSXN - the intsxn of the 061°T radial of the Keeler, Mich. VOR and the 112°T radial of the Pullman, Mich. VOR.

(23) LAKE SHORE (VHF) INTSXN - the intsxn of the 075°T radial of the Naperville, Ill. VOR and the 358°T radial of the Chicago Heights, Ill. VOR.

(24) LEBEC (LF) INTSXN - the intsxn of the N course of the Camarillo, Calif. LFR and the NW course of the Newhall, Calif. LFR.

(25) LEE (LF) INTSXN - the intsxn of the W course of the Westfield, Mass. LFR and a 321° T bearing toward Albany, N.Y. LFR.

(26) LEONARD (VHF) INTSXN - the intsxn of the 104°T radial of the Charleston, W. Va. VOR, the 328°T radial of the Roanoke, Va. VOR and the 201°T radial of the Elkins, W. Va. VOR.

(27) LEROY (VHF) INTSXN - the intsxn of the 085°T radial of the Keeler, Mich. VOR and the 293°T radial of the Litchfield, Mich. VOR.

(28) LLANO (VHF) INTSXN - the intsxn of the 293°T radial of the Austin, Tex. VOR and the 192° T radial of the Lometa, Tex. VOR.

(29) LONGVIEW (VHF) INTSXN - the intsxn of the 359°T radial of the Newberg, Oregon VOR and the 309°T radial of the Portland, Oregon VOR.

(30) MARIE (VHF) INTSXN - the intsxn of the 129°T radial of the Charleston, W. Va. VOR and the 256°T radial of the Montebello, Va. VOR.

(31) PARKER (VHF) INTSXN - the intsxn of the 186°T radial of the Denver, Colo. VOR and the 278°T radial of the Kiowa, Colo. VOR.

(32) PERRIS (VHF) INTSXN - the intsxn of the 188°T radial of the March AFB VOR and the 095°T radial of the Long Beach, Calif. VOR.

(33) PINOLE (VHF) INTSXN - the intsxn of the 233°T radial of the Sacramento, Calif.

VOR and the 004°T radial of the San Francisco, Calif. TVOR.

(34) PRINCETON (VHF) INTSXN - the intsxn of the 082°T radial of the Huntsville, Ala. VOR and the 174°T radial of the Nashville, Tenn. VOR.

(35) RIVER (VHF) INT SXN - the intsxn of the 105°T radial of the Peoria, Ill. VOR and the 316°T bearing toward Peoria, Ill. LFR,

(36) RIVER FALLS (VHF) INTSXN - the intsxn of the 115°T radial of the Minneapolis, Minn. VOR, and the 180°T radial of the Grantsburg, Wis. VOR. (Required on Minneapolis Terminal Area VOR Departure Chart. 2600' MSL)

(37) ROCK CAMP (VHF) INTSXN - the intsxn of the 025°T radial of the Pulaski, Va. VOR and the 295°T radial of the Roanoke, Va. VOR.

(38) SPRING HILL (VHF) INTSXN - the intsxn of the 099°T radial of the Graham, Tenn. VOR and the S course of the Nashville, Tenn. ILS lclzr.

(39) STANSBURY (VHF) INTSXN - the intsxn of the 329°T radial of the Utah Lake, Utah VOR and the 265°T radial of the Salt Lake City, Utah VOR.

(40) STURGEON (VHF) INTSXN - the intsxn of the 135°T radial of the Milwaukee, Wis. VOR and the 013°T radial of the Chicago Heights, Ill. VOR.

(41) SUNOL (VHF) INTSXN - the intsxn of the 032°T radial Agnew, Calif. VOR and the front course of the Oakland, Calif. ILS lclzr.

(42) TANNER (VHF) INTSXN - the intsxn of the 264°T radial of the Huntsville, Ala. VOR and the 158°T radial of the Graham, Tenn. VOR

(43) VALLEY CENTER (LF) INTSXN - the intsxn of the 100°T bearing from Oceanside, Calif. rdo bcn and a 305°T bearing from the Miramar, Calif. rdo bcn.

(44) VALLEY CENTER (VHF) INTSXN - the intsxn of the 101°T radial of the Oceanside, Calif. VOR and the 010°T radial of the San Diego, Calif. VOR.

(45) VERNALIS (VHF) INT SXN - the intsxn of the 160°T radial Sacramento, Calif. VOR and the 273°T radial of the Modesto, Calif. VOR.

(46) WHITE FISH (VHF) INTSXN - the intsxn of the 093°T radial of the Wheeling, Ill. VOR and the 013°T radial of the Chicago Heights, Ill. VOR.

(47) WINN RANCH (VHF) INTSXN - the intsxn of the 207°T radial of the Austin, Tex. VOR and the 058°T radial of the San Antonio, Tex. VOR.

(48) WOODSIDE (VHF) INTSXN - the intsxn of the 275°T radial of the Agnew, Calif. VOR, the 159°T radial of the San Francisco, Calif. TVOR and the 233°T bearing from the Fremont, Calif. rdo bcn.

REDESIGNATE:

(1) ACTON (VHF) INTSXN - the intsxn of the 122°T radial of the Indianapolis, Ind. VOR and the 047°T radial of the Scotland, Ind. VOR.

(2) BEACON (VHF) INTSXN - the intsxn of the 075°T radial of the Naperville, Ill. VOR and the 013°T radial of the Chicago Heights, Ill. VOR.

(3) CRIB (VHF) INTSXN - the intsxn of the 013°T radial of the Chicago Heights, Ill. VOR and the 090°T radial of the Naperville, Ill. VOR.

(4) ELMENDORF (VHF) INTSXN - the intsxn of the 168°T radial of the San Antonio, Tex. VOR and the 040°T radial of the Cotulla, Tex. VOR.

(5) KINGSLAND (VHF) INTSXN - the intsxn of the 293°T radial of the Austin, Tex. VOR and the 173°T radial of the Lometa, Tex. VOR.

(6) MERMAID (VHF) INTSXN - the intsxn of the 257°T radial of the Keeler, Mich. VOR and the 308°T radial of the South Bend, Ind. VOR.

(7) MESQUITE (LF) INTSXN - the intsxn of the E course of the Dallas, Tex. LFR and the 135°T radial of the Dallas, Tex. VOR.

(8) NEPTUNE (VHF) INTSXN - the intsxn of the 257°T radial of the Keeler, Mich. VOR and the 109°T radial of the Wheeling, Ill. VOR.

(9) NEW BERLIN (VHF) INTSXN - the intsxn of the 135°T radial of the Milwaukee, Wis. VOR and the 058°T radial of the Janesville, Ill. VOR.

(10) PAPI (VHF) INTSXN - the intsxn of the 078°T radial of the Wheeling, Ill. VOR and the 358°T radial of the Chicago Heights, Ill. VOR

(11) PRIOR (VHF) INTSXN- the intsxn of the 076°T radial of the Redwood, Falls, Minn. VOR and the 194°T radial of the Minneapolis, Minn. VOR.

(12) RACINE (VHF) INTSXN - the intsxn of the 135°T radial of the Milwaukee, Wis. VOR and the 250°T radial of the Muskegon, Mich. VOR and the 015°T radial of the Wheeling, Ill. VOR.

(13) SAN MARCOS (VHF) INTSXN - the intsxn of the 074°T radial of the San Antonio, Tex. VOR and the 189°T radial of the Austin, Tex. VOR.

(14) SHERRILL (VHF) INTSXN - the intsxn of the 102°T radial of the Syracuse, N.Y. VOR and the 023°T radial of the Binghamton, N.Y. VOR.

(15) SUN FISH (VHF) INTSXN - the intsxn of the 111°T radial of the Milwaukee, Wis. VOR and the 255°T radial of the Muskegon, Mich. VOR.

(16) TAYLOR (VHF) INTSXN - the intsxn of the 135°T radial of the Milwaukee, Wis. VOR and the 018°T radial of the O'Hare, Ill. TVOR and the 258°T radial of the Chicago Heights, Ill. VOR and the 278°T radial of the Pullman, Ill. VOR.

(17) WEATOGUE (LF) INTSXN - the intsxn of the SW course of the Windsor Locks, Conn. ILS lclzr and the NW course of the Hartford, Conn. LFR.

(18) WIND LAKE (VHF) INTSXN - the intsxn of the 074°T radial of the Janesville, Wis. VOR and the 161°T radial of the Milwaukee, Wis. VOR.

CANCEL:

(1) BROWN'S (VHF) INTSXN - the intsxn of the 201° mag radial of the Seattle, Wash. VOR and the N course of the Tacoma, Wash. LFR.

(2) CASE (VHF) INTSXN - the intsxn of the 351° mag radial of the Olympia, Wash. VOR and the 226° mag radial of the Seattle, Wash. VOR.

(3) FLYING M (LF) INTSXN - the intsxn of the N course of the Hobbs, N. Mex. LFR and the W course of the Lubbock, Tex. LFR.

(4) IMA (VHF) INTSXN - the intsxn of the 233° mag radial of the Tucumcari, N. Mex. VOR and the 096° mag radial Anton Chico, N. Mex. VOR.

(5) LONGMEADOW (LF) INTSXN - the intsxn of the NE course of the Windsor Locks, Conn. ILS lclzr and the SE course of the Westfield, Mass. LFR.

(6) MCLEAN (VHF) INTSXN - the intsxn of the 257° mag radial of the Sayre, Okla. VOR and the 333° mag radial of the Childress, Tex. VOR.

(7) MORTON PASS (VHF) INTSXN - the intsxn of the 094° mag radial of the Rock River, Wyo. VOR and the 306° mag radial of the Cheyenne, Wyo. VOR.

(8) PAWHUSKA (VHF) INTSXN - the intsxn of the 311° mag radial of the Tulsa, Okla. VOR and the 080° mag radial of the Ponca City, Okla. VOR.

(9) PUYALLUP (VHF) INTSXN - the intsxn of the 043° mag radial of the Olympia, Wash. VOR and the front course of the Seattle-Tacoma ILS lclzr.

(10) STEPHENTOWN (LF) INTSXN - the intsxn of the NW course of the Westfield, Mass. LFR and the 020° mag radial of the Poughkeepsie, N.Y. VOR.

(11) TARPON (VHF) INTSXN - the intsxn of the 062° mag radial of the Naperville, Ill. VOR and the 287° mag radial South Bend, Ind. VOR.

(12) WHEELER RIDGE (LF) INTSXN - the intsxn of the Bakersfield, Calif. LFR and the NW course of the Palmdale, Calif. LFR.

(13) WIGGENS (VHF) INTSXN - the intsxn of the 259° mag radial of the Akron, Colo. VOR and the 047° mag radial of the Denver, Colo. VOR.

SEE ALSO PAGE 26

✓ NON-STANDARD HOLDING PATTERNS: The following non-standard holding patterns are established and shall become effective November 15, 1956:

(1) MIDLAND, TEX. (VOR) INTSXN - direction of holding - N on 011°T radial (inbound 191°T); direction of turn - LEFT; time - one minute; minimum altitude - 4100' MSL.

(2) LAREDO, TEX. (LF) INTSXN - direction of holding - SE on SE course; direction of turn - RIGHT; time - one minute.

(3) LAREDO, TEX. (VOR) INTSXN - direction of holding - NW on 327°T radial (inbound 147°T); direction of turn - LEFT; time - one minute; minimum altitude - 1900' MSL.

✓ AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide, Volume 11, No. 14, dated September 18, 1956, as follows:

(1) Page 4 - On-Request Reporting Points. Under Designate: Item (17). Correct to read: New Rochelle, New York.

(2) Page 5 - On-Request Reporting Points. Under Cancel. Item (8). Correct to read: GRUVER (VHF) INTSXN

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 12 - Radio Facility Identification Index - Columbus, Ga., correct identification of Range and VOR to read: "CSG".

(2) Page 25 - Vicksburg, Miss. Correct CAA telephone number to read: 352.

(3) Page 99 - (Airborne) Bellingham, Wash. Correct VOR rcvr check point to read: 145°.

(4) Page 99 - (Airborne) Chicago, Ill. Correct by deleting VOR rcvr check point.

(5) Page 100 - (Airborne) Goshen, Ind. Correct VOR rcvr check point to read: 088°.

(6) Page 100 - (Airborne) Greensboro, N. C. Correct by deleting VOR rcvr check point.

(7) Page 103 - (Ground) Cheyenne, Wyo. Correct VOR rcvr check point to read: 199°; on yellow line on taxi strip immediately SE of approach end of runway 8.

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

IV	Vivian, Man. (Assignment)
LU	La Salle, Man. (Assignment)
RX	Riverside, Ont. (Deletion)
RX	Sacre Coeur, Que. (Assignment)
TE	Steinbach, Man. (Assignment)
MQT	Marquette, Mich., Sawyer AFB (Name change)

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Albuquerque	Roswell	WAC 405
Corpus Christi	San Diego	WAC 406
El Paso	Brownsville Local	WAC 468
Los Angeles	Dallas-Ft. Worth Local	WAC 469
		WAC 522

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

RESTRICTED AREA AMENDMENTS:

The following Restricted Area Amendments shall become effective as indicated:

(Part 608 - Restricted Areas - Amendment 179)
(November 15, 1956)

(1) In Section 608.14, the San Miguel Island, Calif., area (R-288 formerly D-288), amended on March 3, 1950 in 15 F.R. 1783 is further amended by changing the "Controlling Agency" column to read: "11th Naval District".

(2) In Section 608.21, the Glenview, Ill., area (R-76), amended on October 20, 1955, in 20 F.R. 7902 is rescinded.

(3) In Section 608.47, the Block Island Sound, Rhode Island, area (R-90), amended on May 4, 1956 in 21 F.R. 2977 is further amended by changing the "Controlling Agency" column to read: "NAVPORCO, Newport, Rhode Island."

(4) In Section 608.54, the Pendleton, Va., area (R-74), amended on May 4, 1956, in 21 F.R. 297 is further amended by changing the "Controlling Agency" column to read: "VACAPES OPAREACORD, NOB, Norfolk, Va."

(5) In Section 608.54, the Chesapeake Bay, Va., area (R-388), amended on May 4, 1956, in 21 F.R. 2977 is further amended by changing the "Controlling Agency" column to read: "VACAPES OPAREACORD, NOB, Norfolk, Va."

(Part 608 - Restricted Areas - Amendment 180)
(November 5, 1956)

(1) In Section 608.52, a Deseret, Utah, area (R-514), is added to read: "Description by Geographical Coordinates: North boundary: lat-40-16-27; East boundary: long. 112-18-43; South boundary: lat 40-15-42; West boundary: long. 112-21-01. Designated Altitudes: Surface to 10,000 ft MSL. Time of Designation: Unlimited. Controlling Agency: Chief of Ordnance, Deseret Ordnance Depot.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31)	-	Month and day item was reported.
**	-	New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★	-	New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE	-	Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.

BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd. Racing is done on Sun only. (9-28)

BIRMINGHAM-RADIO: Aug 20, VOR shut down - relctn. Will be recmsnd about Dec 13 at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun arpt. (8-30)

BIRMINGHAM ARPT: Caution - tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9)

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

HUNTSVILLE-RADIO: VOR radials 005°-030° unusable due to roughness and bends. (5-11)

MONTGOMERY-DANNELLY FLD-TOWER: About Oct 16, ILS glide slope, MM and LMM will be shut down until approx Jan 1 - relctn. Lclzr, OM and LOM will remain in opern. (8-29) FLD:Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft lndg and taking-off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. E/W rnwy clsd to all military acft-const. Eastern-most 5000' avail. days, easternmost 6000' avail. sunset-sunrise to civil acft. Western end mrkd by flags-days, lgts-ngts. (5-15)

ALABAMA: MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends. (4-22)

ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)

COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)

FORT HUACHUCA-SPECIAL NOTICE: Restricted Area (R-181) in use daily until Dec 15, 1956 - artillery firing and drone flying. (9-10)

GILA BEND-SPECIAL NOTICE: Captive balloons anchored on 1500' cables will be flown 1100 Mon thru 1100 Fri on 24 hr basis at Dateland and Gila Bend Aux AFB. Lgtd by one red lgt ngts. Extreme caution advised at low alts near these locations. (8-23)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial. (8-23)

HASSAYMPA-SPECIAL NOTICE: Effect Nov 15, 1956, Caution Area (C-422) is rescinded.

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. Const in progress S of taxiway 1 from rnwy 8L to trans ramp and S to arpt entrance road.

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185°, 39 n mi at 10,000'.

SALOME, SITE#27B, LAX-PHX: Caution-puncture vines. (6-18)

SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)

TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000'; 060°-075°, 35 n mi 11,000'; 075°-085°, 21 n mi 11,000; 090°-170°, 40 n mi 12,000' 225°-230°, 40 n mi 7,000; 330°-345°, 35 n mi 11,000; 345°-360°, 25 n mi 11,000'.(7-17)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000' (d) NE quad 13,000'.

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. (8-27)

ARKANSAS: EL DORADO-RADIO: DME 2000' MSL coverage 43.5 mi 325° thru N to 225°; 2000' MSL coverage 35 mi 225° thu W to 325°. (3-30)

HARRISON ARPT: Fld clsd ngts.

**LITTLE ROCK-ADAMS ARPT: 140' (400' MSL) lgtd rdo twr erected 1.1 n mi SSW (219 °T) at lat 34-43-30, long 92-15-00. (8-31)

NORTH LITTLE ROCK-CENTRAL ARPT: Fld closed to all operns-const. (3-1)

TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends.

CALIFORNIA:**ARROYO GRANDE, BCN SITE 14, LAX-SFO: Bcn site perm discontd. (9-28)

AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)

BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)

CAMARILLO-RADIO: All courses have multiples. (6-17)

**CASTAIC-BCN SITE 3B, LAX-SFO: Bcn site 3B perm. discontd. (9-28)

CHINO PACIFIC ARPT: Clsd to all acft xcpt on official business PAC Airmotive Co. Equip on or near rnwys-caution. Rnwy 3-21 under const both ends. Rnwy 8-26 clsd.

CRESCENT CITY-RADIO: VOR rnwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

DIXON ARPT: Closed. (8-30)

ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.

FAIRFIELD-SUISUN ARPT: Unattended - no fuel available. (8-30)

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. About Nov 10, VOR will be shut down until approx Dec 10. During that period, the following arwys will not be usable: V-107 LAX-Maricopa Int; V-209 LAX-Int FIM 296°, SBA 013°; V-12 SBA-Saugus Int. (10-15)

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

★FRESNO AIR TERMINAL-TOWER: Apch bear. ILS lclzr: 289°. (9-27) Aug 13, lclzr and glide slope shut down until approx. Feb 1, 1957 - relctn. (10-8) FLD: Exercise

CALIFORNIA: extreme caution in vicinity, particularly when using VOR airways. Jet aircraft climbing and descending in areas of extended centerlines runways 29-11 and areas north and east of airport. Extensive construction and heavy equip. both ends rnwy 11-29, apch areas and adj taxiways. First 250' rnwy 11 clsd - usable length 6750'. Extreme caution apch end rnwy 11 clsd - usable length 6750'. Extreme caution apch end rnwy 11, large equip. working in rnwy extension area. (7-5)

GLENDALE-GRAND CENTRAL ARPT-TOWER: About Oct 15, will oper daily sunrise to

** sunset. FLD: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)

**GONZALES, BCN SITE 25, LAX-SFO: Bcn site perm. discontd. (10-3)

KLAMATH-McBETH ARPT: Closed. (6-13)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340° 7000'; 340°-040°, 12,000; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)

LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during arpt const. (8-18) FLD: Several 230' MSL protable oil derricks NW, W & S of fld. No fuel servicing avail for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd const. 6200' rnwy 30 avail lndgs and take-offs. Rnwy 12 clsd. (6-27) About Oct 12, 3 SE neon lgts rnwy 30 will be discontd. (9-27)

LOS ANGELES-RADIO-SPECIAL NOTICE: July 3, transcribed weather bdcasts oper test basis. Hrs opern: 0800-1800. Manual bdcast continues on VOR and both VOR & LF combined. (7-16)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (7-16) About Oct 15 VOR will be shutdown until approx Nov. 15. During this period the following arwys will not be usable: V-23 Long Beach - White Oaks Int; V-16 Ontario - Los Angeles; V-107, 209 Fillmore - Los Angeles; V201 Corbina Int - Berry Int; V-210 Daggett-Los Angeles. (9-26)

LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx. 4000' W of Sepulveda Blvd open VFR tfc only. Equip. on and adj to const areas. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL, approx the intersection of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu Intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommended cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LF rng and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10)

LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700.

MARYSVILLE-RADIO: Sept 4, VOR shut down.

★MODESTO-RADIO: VOR voice call: "Modesto Radio". (10-2)

NATIONAL CITY ARPT: Extensive const around arpt. 75' obstns E end of rnwy. (7-19)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500 ft will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Effect. Sept 1, military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340° 350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only. (8-20)

(16 Oct 1956)

CALIFORNIA: OAKLAND INTN'L ARPT-TOWER: Effect. Oct 18 at 0800, radar arrivalcontrol will be inaugurated. (10-3) FLD: Dredging and clam shell equip. working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area.

OCEANSIDE-RADIO: Sept 25, VOR shut down until approx Oct 16. (9-25)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

★ONTARIO INTN'L ARPT-TOWER: Oct 12, ILS lclzr freq changed to 109.7 mc; glide path to 333.2 mc. (10-13) FLD: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as mrkd by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th fighter interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)

All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Simulated apch ILS not allowed under 200' daylgt hrs. Rnwy 30 intermittently clsd. Only low pressure oxygen avail. Tfc make left hand apch to rnwys 26, 22 and 17; rgt hand to rnwys 35, 04 and 08. Exercise vigilance to maintain lateral separation with acft on final apch to rnwy 03 Biggs Air Force Base. Formation take-offs

TEXAS: prohibited. Turn on landings lgts 5 miles out, during darkness.

FT. WORTH-MEACHAM FLD-TOWER: ILS glide slope not to be used from MM to touchdown.

GEORGETOWN ARPT: N/S and NW/SE rnwys lgts and bcn inop.

GRAND PRAIRIE-RADIO: About Oct. 16, H fac freq 407 kc will be changed to 248 kc.

GULF OF MEXICO OFF MATAGORDO ISLAND: Air-to-ground gunnery, dive bombing, rocket firing, horizontal bombing and firing at rdo controlled targets, sunrise, sunset, within circular area with radius of 4.3 n mi centered at lat 28-17, long. 96-32.

HONDO AIR BASE: Inten day and ngt USAF primary trng VFR to 10,000' Mon-Fri within 35 mi radius. Clsd to all civil acft xcpt ofl bus. or prior approval USAF Operns or Civil Director of Flying. 2-way rdo rqrd. Clsd all acft ngts, Sat., Sun and holidays xcpt emergency or prior approval. Approval obtained durg normal duty hrs or by letter.

HOUSTON-RADIO: VOR radials 120° thru 140° and 306° unreliable-roughness and scalloping. Caution in vicinity of Cleveland, Texas - intermittent interference.

HOUSTON INTERNATIONAL ARPT: Caution - aerial targets will be dropped on arpt between 0800-1600 Sat and Sun. Deep ruts in E shoulder of NW/SE rnwy. Stay on pavement. Tetrahedron uncontrollable and unreliable-not to be used as tfc direction indicator. Non-rdo equipped acft use extreme caution and abide by control twr lgt signals. ILS rnwy 3-21 clsd- reconst. Repairs and reconst of other rnwys in progress. Men and equipment in construction areas.

HOUSTON-SAM HOUSTON ARPT: Men and equip. on fld. N/S and E/W rnwys clsd. Fld lgtg inop. Soft shoulders. Use rnwys. No ngt operns. Only NW/SE rnwy usable.

HUDSPETH-RADIO: About Oct 29, VOR will be shut down, during this period the MEA on V-66 between El Paso VOR and Culberson VOR is 10,000'.

JEFFERSON-CYPRESS RIVER ARPT: Rough-use extreme caution.

KARNACK-SPECIAL NOTICE: Avoid flying over Longhorn Ordnance Plant approx 1.7 n mi ESE below 3000' - photo flash explosions daily 0700-1700.

KERMIT-ROBINSON ARPT: Closed due to oil well drilling.

**LOLITA-WALKER ARPT: 305'(355'MSL) lgtd rdo twr erected 7.9 n mi NE(047°T) at lat 28-54-38, long 96-27-43.

LUBBOCK ARPT: W 300' of E ramp open as taxiway. E 500' of E ramp closed to acft for cotton storage.

LUFKIN-RADIO: DME coverage 125°-145°, 43 n mi at 1500'; 145°-280°, 35 n mi at 1500'; 280°-305°, 35 n mi at 1700'; 305°-315°, 26 n mi at 1700'; 315°-335°, 35 n mi at 1700'; 335°-015°, 35 n mi at 2000'; 015°-060°, 35 n mi at 1700'; 060°-125°, 35 n mi at 1500'.

MARFA-RADIO: Sept 21, VOR shut down until approx Oct. 21-modernization.

MARSHALL-SPECIAL NOTICE: 166' lgtd temp drilling twr erected 6.1 n mi SW.

MARSHALL-BEER'S CADDO LAKE ARPT: Auto races being conducted periodically daylgt hrs Sundays. Fld will be clsd by a white X both ends of strip. Acft desiring to land circle fld and fld will be opened as acft will be given priority.

McALLEN-MILLER ARPT: Rnwy 18 clsd for take-offs and landings.

McKINNEY-SPECIAL NOTICE: 166' lgtd temp. drilling derrick erected 3.5 n mi NW.

MIDLAND ARP'K: Mil student flying restricted from use of N/S rnwy.

MINERAL WELLS-RADIO: VOR/DME coverage 30 n mi from 0°-95° at 2300'MSL.

ODESSA-ECTOR COUNTY ARPT: Rnwy 7-25 closed.

PORT ISABEL ARPT: Closed all operations - construction.

ROCKPORT-ARANSAS COUNTY ARPT: Caution - oil drilling operns, structures are moved intermittently and any rnwy may be clsd on short notice.

SAN ANTONIO-STINSON ARPT: 168'(795'MSL) lgtd twr being erected 2.7 n mi WSW(262°T) at lat 29-20-50, long. 98-31-53.

SAN MARCOS ARPT: NE/SW strip rough - caution.

SHAMROCK ARPT: Bcn and rnwy lgts inop.

SINTON ARPT #1: 126' lgtd derrick erected 2500' N of E/W rnwy.

SNYDER-WINSTON FLD: 150'(2577'MSL) lgtd rotary drilling rig being erected 2552 ft. SE N/S rnwy.

TEXARKANA-SPECIAL NOTICE: Demolition in progress during daylight hours on Green Arwy #5 approx 13.4 n mi WSW of Texarkana LF range.

**TEXAS CITY-GULF COAST ARPT: 136'(167'MSL) lgtd derrick erected 4.9 n mi ESE (105°T) at lat 29-22-55, long 94-51-27.

TYLER POUNDS FLD-TOWER: ILS glide slope not to be used from MM to touchdown-caution.

WACO-RADIO: DME coverage 190°-290°, 35 n mi at 2300'; 290°-190°, 43 n mi at 2300'. Coverage over Restricted Areas 219 and 443 not certified.

(16 Oct 1956)

UTAH: BONNEVILLE-RADIO: DME coverage 295° - 350°, 35 n mi at 12,000'.
BRYCE CANYON-RADIO: VOR has lgt roughness below 13,000'.
DELTA-RADIO: VOR coverage 40°-80° and 100°-136°, 35 n mi at 11,000'. DME coverage 40° 90° 26 n mi at 13 000'.
HANKSVILLE-RADIO: VOR coverage 40°-60°, 35 n mi at 10,000'; 172° 190°, 26 n mi at 13 000'
LUCIN-RADIO: VOR usable dist at min IFR terrain clearance alt 280° to 300°, 35 n mi; 350° 30° and 180° 220°, 25 n mi. (11-26)
MILFORD-RADIO: VOR coverage 20°-140° 22 n mi; 235° 330° 35 n mi at min en route alt. (1-2)
OGDEN RADIO: VOR coverage 5° 120° 30 n mi at 11,000'. DME coverage 360° 150° 17 n mi at 12,000'.
SALT LAKE CITY-RADIO: VOR course scalloping prevalent between 290°-350°. Coverage this area 17 n mi at 6500'MSL 30 n mi at 11,000'MSL. Coverage 10°-135° 22 n mi at min. terrain clearance alt. DME coverage 20°-140°, 17 n mi at 13,000'MSL; 180°-235°, 35 n mi at 12,000' MSL; 340°-20°, 26 n mi at 12,000'MSL. (8-10).
UTAH LAKE-RADIO: VOR usable dist at 14,000'MSL from 010° thru 040°, 35 n mi, 40°thru 50°, 30 n mi, 50°-85°, 40 n mi; at 13,000' MSL from 145° thru 155°, 35 n mi, and 275° thru 295°, 30 n mi. Course roughness exists over mountain ridges N thru F between 15 and 20 n mi. (2-1)
VERMONT: SPECIAL NOTICE: Arpt condition info avail. by calling Vt. Aero Comm (tel. CApital 3-2311, Ext.808) 0830-1630, Mon thru Fri or CAA Communs Stn, Barre-Montpelier Arpt anytime (tel. CApital 3-2376). Acft in flgt call Montpelier Rdo.
BARRE-MONTPELIER ARPT: Cautiion 500' extn S end rnwy 35 under const; men, equip on fld.
BRISTOL ARPT: E/W rnwy clsd - obstn. (4-4)
BURLINGTON-RADIO: VHF/DF bearings unreliable inbound headings 055°-110° below 6000'; 110°-140° below 4000'; 235°-255° below 4000'; 255°-355° below 9000' all beyond 50 n mi. UHF/DF bearings unreliable inbound headings 134°-194° beyond 45 n mi below 7500'; 195°-250° beyond 45 n mi below 8500'; 251°-268° beyond 50 n mi below 8500'; 269°-343° beyond 40 n mi below 7600'; 344°-133° beyond 45 n mi below 5000'. About Oct. 22, LFR will be shut down for approx 3 days - use for homing only during shutdown.(8-21)
★NEWPORT-RADIO: H fac is State operated. (10-9)
VIRGINIA: BLACKSTONE AAF: Fld open to civil in emerg or prior arrangement thru C. O. Camp Picket, Va. Frequent parachute dropping exercises involving personnel and equip in progress. Exercise extreme caution when in vcnty. Ctc Blackstone Rdo for advisory info. (7-25)
CHASE CITY-EMILE'S ARPT: Extension to S end rnwy under const.
CHINCOTEAGUE-SPECIAL NOTICE: Effect Nov 15, 1956, Warning Area (W-108) is amended by changing the Controlling Agency to: VACAPES OPAREACORD, NOB, Norfolk, Va. Co., Ft. Miles, Del., and CG TACAIRCOMD, Langley AFB, Va.
**DAHLGREN-SPECIAL NOTICE: Restricted Area (R-38) daily air and surface firing present. Extreme hazard to acft all altitudes all times.
**DANVILLE ARPT: Two 285' twrs erected 16.1 n mi North (4°T) at lat 36-55-31, long 79-19-50.
FRONT ROYAL-RADIO: VOR coverage 120°-160°, 175°-200°, 220°-226°, 270°-010°, 35 n mi at 4000'. INSACS and ranges controlled from Martinsburg, W. Va. (7-25)
GORDONSVILLE-RADIO: VOR has roughness in all quads. DME coverage 55°-75°, 35 n mi at 1500'; 75°-85°, 30 n mi at 1500'; 85°-130°, 35 n mi at 1500'; 130°-160°, 39 n mi at 8000''.(6-11)
**GORDONSVILLE ARPT: Unicom available daylight hrs. (10-11)
HERNDON-RADIO: VOR usable dist 35 n mi at min instr alt NE quad. Terrain causes minor course roughness in SW quad.
HOT SPRINGS-INGALLS ARPT: NE/SW rnwy clsd. (10-11)
LAWRENCEVILLE-RADIO: Roughness all arwy radials VOR. Radials 185°-240° usable only to 22 mi MEA. (7-23)
LEESBURG ARPT: New 3500' E/W strip clsd - old strip lying parallel and S will be available - 2200'. (3-14)
LEXINGTON ARPT: Land at own risk. Unattended - no fuel.
LYNCHBURG PRESTON GLEN ARPT: Signal for below VFR wea minimums inop, ngts.
MONTEBELLO-RADIO: VOR coverage 110°-220°, 35 n mi at MEA. DME coverage 150°-180°, 35 n mi at 3000'; 180°-210°, 35 n mi at 5000'.
NORFOLK-RADIO: Visual courses VAR slightly rough.

VIRGINIA: NORFOLK-AIR ROUTE TRAFFIC CONTROL CENTER: Soon, TASR will be shut down for antenna modification.
PENDLETON-SPECIAL NOTICE: Effect. Nov 15, 1956, Pendleton Warning Area (W-50) is amended by changing the controlling Agency to: VACAPES OPAREACORD, NOB, Norfolk, Va.
PULASKI-RADIO: VOR coverage 305°-15°, 22 n mi; 15°-55° and 195°-210°, 35 n mi at min instr alt. DME coverage 10°-40°, 35 n mi at 6000'; 40°-120°, 43 n mi at 6000'; 120°-200°, 35 n mi at 6000'; 200°-225°, 26 n mi at 6000'; 225°-255°, 43 n mi at 6000'; 255°-010°, 26 n mi at 6000'.
RICHMOND-BYRD FLD; Due to non-visibility twr unable to ctl tfc on N portion of N/S taxiway parallel to rnwy 2-20. All acft rqrd to have 2-way rdo for ngt opern and at least rdo rcvr for daylgt opern. Use paved areas only, all other soft. Landing FEE for multi-eng executive and non-scheduled acft. (9-15)
ROANOKE MUN-WOODRUM FLD: Due to non-visibility twr unable to ctl tfc last 200' NE/SW taxi strip and 200' approx midway E/W strip. Men and equip adj all rnwys and taxi ways-caution.
VIRGINIA CAPES-SPECIAL NOTICE: Effect. Nov 15, 1956, Warning Area (W-386) is amended by changing the Controlling Agency to: VACAPES OPAREACORD, NOB, Norfolk, Va.
WASHINGTON: SPECIAL NOTICE: Unmrkd p-lines across coves in Puget Sound area and lakes.
BELLINGHAM-RADIO: VOR radial 280°, on Vancouver, B.C. lmtd to usable dist of 27 n mi acct course roughness at the lowest instr alt of 1500'. In general, usable dist of other radials are lmtd in the signal shadow areas imposed by intervening high terrain.
BELLINGHAM ARPT: 1000' NE end NE/SW rnwy clsd to hvy tfc. (11-19)
BREMERTON-KITSAP COUNTY ARPT: The first 2000' rnwy 1 clsd to all Naval acft.
DEER PARK ARPT: F/W rnwy clsd on alternate Sundays - drag races. (4-9)
ELLENSBURG-RADIO: DME and VOR coverage 40°-60°, 26 n mi at 7000'; 60°-150° unknown prohibited area; 150°-175°, 26 n mi at 5500'; 175°-260°, 43 n mi at 10,000'; 260°-290°, 43 n mi at 8000'; 290°-40°, 26 n mi at 10,000'.
EPHRATA-RADIO: DME and VOR coverage 124°-209°, unknown prohibited area; 227°-280°, 35 n mi at 8000'; 280°-340°, 26 n mi at 5000'; 340°-350°, 35 n mi at 5000'.
EPHRATA ARPT: Rnwy lgts on rnwy 2-20 inoperative. (10-8)
EVERETT-PAINE AFB-RADIO: USAF VHF/DF steers unreliable 080°-160° below 9000'.
OLYMPIA-RADIO: VOR coverage 340°-45°, 43 n mi at 4000'; 45°-135°, 43 n mi at 8000'; 135°-155°, 43 n mi at 7000'; 155°-225°, 43 n mi at 5000'; 225°-275°, 17 n mi at 5000'; 275°-340°, 43 n mi at 8000'. 314° radial on Shelton usable for 26 n mi at 2000'. 143° radial on Portland, Oregon intsxn usable for 35 n mi at 5000'. (5-3)
OLYMPIA ARPT: Farming activities adj to rnwys and taxiways spring thru fall.
OTHELLO ARPT: Caution - unlgtd power line approx 50' high E end - unmrkd.
PULLMAN-MOSCOW ARPT: Clsd to ngt operns. (6-15)
** SEATTLE-BOEING FLD: All multi-eng acft use main rnwy. 2-way rdo equipped, medium ty pe, single-eng acft may use main rnwy on req, PROVIDED local tfc permits. Single-eng acft with retractable lndg gear drop lndg gear prior to entering tfc pat. (7-19)
SEATTLE-BOEING FLD: All daylgt VFR operns of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxiing off lgt plane strip made toward twr. Hvy acft make tfc pat. W of fld at 1500' - use main rnwys, taxi strips only. Due to non-visibility twr unable to ctl tfc W blast fence in front Boeing Flgt Center and parking apron #4. W side taxiway clsd to tfc until further notice. (10-11)
SEATTLE-TACOMA INTERNATIONAL ARPT-TOWER: Glide slope point of touchdown 1314' N of apch end rnwy 34. Glide slope rough not approved for automatic apch. (3-15) FLD: S 800' of rnwy 16-34 and taxiway between rnwy 29 and rnwy 34 clsd. Rnwy 11-29 clsd. Radiosonde balloon being released at approx 0300Z, 0900Z, 1500Z and 2100Z daily - actual release time will be broadcast by Seattle rdo. (8-14) N three rows of hi-intensity apch lgt sys shut down - const. Threshold lgts S end of N/S rnwy temp. relocated 750' N of S end of rnwy. (8-31)
SPOKANE-RADIO: DME and VOR coverage 36°-152°, 43 n mi at 7000'; 153°-224°, 43 n mi at 5000'; 225°-264°, 43 n mi at 6000'; 265°-35°, 43 n mi at 8000'. (6-17)
SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat. and mrkd area S of rnwy. Equip. on fld.
SPOKANE-GEIGER FLD-TOWER: UHF/DF coverage 110°-260°, 50 n mi at 5000'; 261°-280°, unreliable; 281°-330°, 40 n mi at 9000'; 331°-110°, 50 n mi at 9000'.

WASHINGTON: SPOKANE-GEIGER FLD: Perm crash barriers 40" high lctd 150' off ends rnwy 3-21.

ON-REQUEST REPORTING POINTS: The following on-request reporting points are designated, redesignated or cancelled and shall become effective November 15, 1956:

DESIGNATE:

(1) SCOTLAND, NEW JERSEY RBN.

(2) SCOTLAND, NEW JERSEY(VHF) INTSXN- Intsxn 139° T radial Caldwell, N. J. VOR and the SW course Idlewild, New York ILS localizer.

(3) MEADOWBROOK, NEW JERSEY (VHF) INTSXN - Intsxn 326° T radial Idlewild, New York VOR and the 230° T radial Wilton, Connecticut VOR.

REDESIGNATE:

(1) GLEN COVE, NEW YORK (VHF) INTSXN - Intsxn 196° T radial Wilton, Connecticut VOR and the 262° T radial Riverhead, New York VOR and the back course Idlewild, New York ILS localizer.

CANCELLED:

(1) SCOTLAND, NEW JERSEY(LF) INTSXN - Intsxn SE course Newark, New Jersey LFR and the SW course Idlewild, New York LFR.

SEE ALSO PAGE 10

NON-STANDARD HOLDING PATTERNS: The following non-standard holding patterns are designated, redesignated or cancelled and shall become effective November 15, 1956:

DESIGNATE:

(1) GLEN COVE, NEW YORK (LF) INTSXN - direction of holding **NE on NE crs.** Idlewild, New York LFR; direction of turns-Right; time one minute.

(2) MEADOWBROOK, NEW JERSEY(LF) INTSXN - direction of **holding NE on back crs.** Teterboro, New Jersey ILS lclzr; direction of turns- Right; time one minute. **(Minimum altitude 3000').**

(3) SCOTLAND, NEW JERSEY RBN - Direction of holding SW on **SW crs. Idlewild,** New York LFR; direction of turns - Right; time one minute.

(4) SCOTLAND, NEW JERSEY(VHF) INTSXN - direction of holding **SW on SW crs.** Idlewild, New York ILS lclzr; directionof turns - Right; time one minute.

(5) GLEN COVE, NEW JERSEY(VHF) INTSXN - direction of holding **NE on NE crs.** Idlewild ILS lclzr; direction of turns - Right; time one minute.

(6) MEADOWBROOK, NEW JERSEY (VHF) INTSXN - direction of **holding NE on 230°** T radial Wilton, Connecticut VOR; direction of turns - Right; time one minute.

REDESIGNATE:

(1) LONG BEACH, NEW YORK(LF) INTSXN - direction of holding **SW on SW crs.** Mitchel, New York LFR; direction of turns - Right; time one minute.

CANCELLED:

(1) SCOTLAND, NEW JERSEY(LF) INTSXN. **(16 Oct 1956)**

(2) GLEN COVE, NEW YORK RBN.

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods: (a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator(FPDI) centered, the omnibearing selector should read 0° with the to-from indication being "From"; or the omnibearing selector should read 180° with the to-from indication reading "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an indivisual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that thould be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of ±4° be indicated through use of the ground check or ± 6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of this date check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 112.0 mc)
*Chicago (Midway 111.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)
**Wichita (Municipal 111.0 mc)

NOTES. *Continuous monitoring
**Checked daily for accuracy

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS: IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions (television towers, smoke stacks, etc) which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. When the list does not appear in the Guide, all new obstructions will be carried as two-starred items in the NOTAMS. The list will be brought up to date each time it is issued; newly added or changed material will be indicated by arrows.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position, height and top elevation above MSL of these new obstructions can be taken from the list given below. New obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

INSACS = Interstate Airway Communications Station/s (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSACS. (C) The station identification is monitored continuously by the communicator at the associated INSACS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSACS. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSACS, and located too distant from INSACS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. **(P) = Private facility.** (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)=Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
* = Automatic voice identification
[redacted] Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled

DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-drectional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and voice.
T. . . . . Teletype
TASR . . . Terminal Area Surveillance Radar
TVOR. . . Low power VOR (no standby equipment) located on airport
TX. . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same INSACS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

RADAR AVAILABLE : How and Where

(30 Oct 1956)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. TASR = Terminal Area Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - **The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.**

PRECISION APPROACHES - **Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.**

SURVEILLANCE or ASR APPROACHES - **Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.**

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an amergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR FLIGHT ADVISORY SERVICE: If radar advisory service is desired, the pilot of an aircraft will request such service through the appropriate Air Route Traffic Control Center, using normal en route communications facilities. ARTC will determine if service can be provided and will request pilot to change to appropriate frequency for direct communication with radar. Radar station will be identified by "THIS IS AIR FORCE RADAR ADVISORY". All suggested vectors to circumnavigate storm areas will be of advisory nature and do not relieve pilot of responsibility for safety of aircraft. If advisory service cannot be furnished for any reason, the procedure word "UNABLE" will be used. This will terminate radar advisory service to the aircraft without further explanation. This service will be available in the following ARTC Flight Advisory Areas; Chicago, St. Louis, Minneapolis, Kansas City, Albuquerque, San Antonio, Ft. Worth, Oakland, Denver, Great Falls, Los Angeles, and the area immediately around Knoxville, Tenn.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

V = 135.9, 135.0 mc transmitted. # = Guards same VHF and UHF frequencies facility transmits except 122.2, 135.0 mc. (1) = 3023.5 kc guarded. (2) = 3023.5 kc; 122.5 mc. (3) = 3023.5 kc; 122.1, 126.7, 135.9 mc. e.g., (3)-135.9, 122.1 guards every frequency in group (3) except 135.9, 122.1 mc. (g) = Twr equipped with 121.9 mc or (g.7) = Twr equipped with 121.7 mc for control of ground traffic. * = Automatic voice identification. NOTE: FIRST FREQUENCY LISTED IS THE NAVIGATIONAL AID CHANNEL; OTHERS ARE COMMUNICATIONS CHANNELS.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-..- -.-... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

✓ INTERFERENCE ON INSACS COMMUNICATIONS CHANNELS: If excessive interference is noted on INSACS VFR or UHF simplex frequencies, pilots should request the INSACS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, regardless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

(30 Oct 1956)

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200. 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights cleared by ATC to operate at least 1000 feet on top shall conform to the following position reporting procedures:

1. Flights along airways. Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. ATC may specify additional reports as required.

2. Flights operating on a direct route. Regardless of the altitude being flown, pilots shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and over each fix along the route designated as a compulsory reporting point for all altitudes. ATC may specify additional reports as required.

Pilots filing direct route flight plans requesting an altitude of at least 1000 feet on top should designate the route flight by appropriate fixes approximately 200 miles apart over which they plan to report.

IFR RATE OF CLIMB OR DESCENT: In the interest of standardizing operating procedures for IFR flight and to provide greater utilization of available airspace, pilots are requested to adhere to the following procedure when cleared by air traffic control to climb or descend in excess of 1000 feet to an approved altitude:

1. Unless cleared otherwise by air traffic control, climb as rapidly as practicable to 1000 feet below the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

2. Unless cleared otherwise by air traffic control, descend as rapidly as practicable to 1000 feet above the assigned altitude and then not to exceed 500 feet per minute until the assigned altitude is reached.

✓ NEW YORK ARTC PREFERENTIAL ROUTING BULLETIN: Effective November 6, 1956, preferential routes listed on page 4 from Washington, D.C. to New York are revised as follows: To Newark - no change. To Idlewild - Route 1. Riverdale, Baltimore LF Red 45 V140 Woodstown V123, V166 Colts Neck direct Red Bank direct Scotland, Route 2 - No change to LaGuardia - Riverdale Baltimore LF Red 45 V140 Woodstown V123.

✓ ATC DEPARTURE CLEARANCES: Effective November 1, 1956, air traffic controllers will discontinue issuing departure clearances specifying that any portion of the departure shall be conducted in "VFR conditions" unless provision of positive separation will result in an excessive departure delay and the pilot indicates that he will accept a VFR restriction. To reduce communications and expedite departures wherever possible, pilots should include in their requests for departure clearances a statement that they will accept a VFR restriction either during climb to cruising altitude or to a specified altitude.

✓ NAVAL AIR MANEUVERS: U. S. Navy conducting extensive air maneuvers surface to 40,000', 301900Z October to 151200Z November in the following areas:

A. Area bounded by 32-00N, 78-00W to 35-00N, 75-00W to 32-00N, 72-20W to 29-00N, 75-00W to 32-00N, 78-00W. Ending this area Oct 300300Z.

B. Area bounded by 29-30N to 35-00N from 74-00W Westward to coast of U.S. 30 October 1300Z to 2200Z. 5 Nov 1300Z to 2200Z. 31 Oct and Nov. 1, 2, 3, 6, 7, 8, 9 from 1000Z to 2200Z.

C. Area bounded by 30-00N, 79-00W to 30-00N, 74-00W to 35-00N, 75-00W to 30-00N, 79-00W less Warning Area 122. 30, 31 Oct and Nov 1, 2, 3, 6, 7, 8, 9. 2200Z for a six hour period until 0400Z the following day.

D. Area bounded by 30-00N, 77-00W to 32-12N, 77-00W to 35-00N, 73-00W to 37-00N, 73-00W to 37-00N, 68-00W to 32-00N, 68-00W to 30-00N, 77-00W. Nov 12 0500Z to Nov 15 1200Z.

U.S. Navy will have blanket approval to operate in the entire area/s. Except when non-participating aircraft are in transit CAA will issue routine IFR clearances to all transiting flights and Navy will avoid those areas and altitudes occupied by the non-participating aircraft. Navy will have flight plans on all non-participating aircraft, will monitor enroute air-ground frequencies and will provide a minimum of ten (10) miles radar separation between maneuver and non-participating aircraft when lateral separation necessary.

SPECIAL MILITARY EXERCISE: Effective October 25 - November 14, 1956, SAC will conduct special low level missions with jet acft operating between 350-500 knots. Low level - 500 ft above terrain - route direct between Offutt AFB and Bemidji, Minn. Arpt. Acft will execute pull-up over Bemidji Arpt climbing to high altitude on direct course to Grand Island LFR. Additional low level operations will begin when crossing 39-45N on direct route Grand Island-Camp Phillips Bomb Range - adjacent to Smoky Hill AFB- thence to Camp Phillips Bomb Range, thence to a point near Clay Center, Kansas where direct route between Camp Phillips Bomb Range and Offutt AFB crosses the Republican River. Climb will be started to high altitude when crossing the river. All low level operations will be conducted in accordance with VFR. Aircraft will arrive over Bemidji Airport in elements of two at ten-minute intervals during period 0945-1315C on the following dates: Oct 25, 30; Nov. 2, 7 and 14. If unfavorable weather exists on any of the primary dates, mission for that day will be postponed in increments of 24 hours until flown. Aircraft will approach Bemidji Arpt. from S to N crossing intersection of runways at 500 ft. before starting pull-up. An observer team will be stationed at Bemidji Airport with UHF facilities for direct communication with participating aircraft and will notify them when approaching from S of any other aircraft in vicinity of airport during low-level pass. All aircraft are warned to avoid use of area within 5-mile radius of Bemidji Airport during scheduled dates of this mission. All aircraft also requested to be alert on all other segments of the subject mission.

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

OWD	Norwood, Mass., Memorial Arpt (Change from NWD)
XMD	McDougall Intsxn, Alaska (Assignment)

New type location identifiers consisting of a single figure and two letters will soon come into use. The figure indicates the CAA Regional area, except that the figure 7 will be used to indicate First Region area locations.

The Weather Bureau will use one group for identifying certain local storm reports from ADC or other radar sites. Similar identifiers will also be used to identify certain reporting points, some intersections and certain airports.

✓ MINIMUM EN ROUTE ALTITUDES: The following minimum en route altitudes are authorized as follows, effective November 15, 1956:

V-100 and V-116, LeRoy Intsxn to Jackson Intsxn, Mich. MEA 5200 ft, MRA at LeRoy Intsxn 2500 ft, MOCA 2300 ft; Jackson Intsxn to Salem, Mich. VOR MEA 2400 ft; LeRoy Intsxn to Jackson Intsxn MEA 2500 ft utilizing Jackson LF/RBN.

✓ ON-REQUEST REPORTING POINTS: The following on request reporting points are changed and shall become effective immediately:

(1) CAMPBELLTON LF and VHF INTSXNS in Atlanta, Georgia area are renamed: "CHATTAHOOCHEE INTSXNS".

✓ ON-REQUEST REPORTING POINTS: The following on-request reporting points are designated or redesignated and shall become effective November 15, 1956:

DESIGNATE:

(1) HADLEY (VHF) INTSXN - the intsxn of the 315°T radial of the Colts Neck, N. J. VOR and the SW course of the Newark, N. J. LFR.

(2) LONG BEACH, N. Y. (VHF) INTSXN - the intsxn of the SW course of the Mitchel, N. Y. LFR and the 141°T radial of the Idlewild, N. Y. VOR.

REDESIGNATE:

(1) LONG BEACH, N. Y. (LF) INTSXN - the intsxn of the SW course of the Mitchel, N. Y. LFR and the SE course of the Idlewild, N. Y. LFR and the 141°T radial of the Idlewild, N. Y. VOR.

(2) WALLING, N. J. (VHF) INTSXN - the intsxn of the 236°T radial of the Idlewild, N. Y. VOR and the 012°T radial of the Colts Neck, N. J. VOR and the SW course of the LaGuardia, N. Y. ILS lclzr.

✓ NON-STANDARD HOLDING PATTERNS: The following non-standard holding patterns are designated, redesignated or cancelled and shall become effective November 15, 1956:

DESIGNATE:

(1) HADLEY, N. J. (VHF) INTSXN - direction of holding - SW on SW course Newark, N. J. LFR; direction of turns - LEFT; time - one minute.

(2) LONG BEACH, N. Y. (VHF) INTSXN - direction of holding - SW on SW course of Mitchel, N. Y. LFR; direction of turns - RIGHT; time - one minute.

(3) WALLING, N. J. (VHF) INTSXN - direction of holding - SW on 236°T radial of the Idlewild, N. Y. VOR; direction of turns - RIGHT; time - one minute.

REDESIGNATE:

(1) NEW BRUNSWICK, N. J. (LF) INTSXN - direction of holding - W on E course of the Allentown, Pa. LFR; direction of turns - RIGHT; time - one minute.

(2) NEW BRUNSWICK, N. J. (LF) INTSXN - direction of holding - SW on SW course of the Newark, N. J. LFR; direction of turns - RIGHT; time - one minute.

CANCEL:

(1) NEWARK, N. J. (ILS/LOM) - direction of holding - SW on SW course of the Newark, N. J. ILS lclzr; direction of turns - LEFT; time - one minute.

✓ COMPULSORY REPORTING POINTS FOR AIRCRAFT OPERATING BELOW 15, 200 FEET MSL: Effective November 15, 1956, the following existing reporting points should be depicted compulsory only for aircraft operating below 15, 200 feet MSL:

(1) Grants, New Mexico omnirange station
(2) Santa Fe, New Mexico omnirange station
(3) Otto, New Mexico omnirange station
(4) San Francisco, Calif. omnirange station
(5) Richmond Intsxn (VHF) - intsxn of the Oakland, Calif. omnirng 330°T and the Sacramento, Calif. omnirng 233°T radials.
(6) Evergreen, Calif. radio beacon

✓ NEWARK INSACS CHANGES: Effective 1600EST Nov 5, all functions and services of the Newark, N. J. INSACS will be transferred to and consolidated with the New York INSACS, CAA Operations Building New York International Airport, Jamaica, New York. Voice broadcast, monitoring and control of the Newark LF radio range will be performed by New York Radio, Idlewild. One-stop briefing service with private line flight plan telephone to Idlewild will be available at the Newark Airport weather station briefing counter for pilots. In addition the present Newark INSACS business telephone MArket 2-0121 will be provided with direct Idlewild extension for flight plan filing in Newark and the surrounding area.

✓ NEW YORK OFACS CHANGES: Effective November 1, 1956, all facilities and services of the New York Overseas/Foreign Aeronautical Communications Station (Voice Call New York Overseas Radio, Radio Call WSY) and the New York International Notam Office will be relocated from LaGuardia Field (KLGA) to the CAA Operations Building, New York International Airport (KIDL), Jamaica, New York. Telephone service as follows: Administrative OLympia 6-5580, Operations OLympia 6-5371, Idlewild Airport interphone 719. All air-ground radiotelegraph and radiotelephone frequencies remain as published. All aeronautical fixed telecommunications network circuits and domestic tributaries will be terminated in a semi-automatic message relay center and services performed as heretofore. Some circuits and services except telephone will be subject to brief interruptions immediately prior to and following cut over.

✓ CIVIL AIRWAY AND CONTROL AREA EXTENSION AMENDMENTS: Effective November 1, 1956, the following civil airway and control area extension are amended in whole or in part as follows:

CIVIL AIRWAY:

(1) VOR civil airway No. 137 (Thermal, Calif. to Salinas, Calif.), is amended by changing the portion which reads: "point of intsxn of the Bakersfield, Calif., omnirng 210°T and the Coalinga omnirng 153°T radials;" to read: "point of intsxn of the Bakersfield, Calif., omnirng 210°T and the Coalinga omnirng 152°T radials;"

CONTROL AREA EXTENSION:

(1) (Eniwetok Island), is added to read: "All the airspace from 700 feet upwards within a radius of 50 nautical miles of the Eniwetok nondirectional rdo bcn at lat 11-21-00N, long. 162-20-00E."

✓ TEMPORARY CONTROL AREA EXTENSION AND CONTROL ZONE AMENDMENTS: Effective November 5 thru December 31, 1956, the following temporary control area extension and control zone are amended as follows:

CONTROL AREA EXTENSION:

(1) (Canton Island), is added to read: "All of the airspace from 700 feet upwards within a radius of 100 nautical miles centered on the Canton Island nondirectional radio bcn."

CONTROL ZONE:

(1) (Canton Island), is added to read: "That airspace from the surface upwards within a radius of 5 nautical miles centered on Canton Airport, at lat 02-46-10S, long. 171-43-15W.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 26 - Asheville, N.C. Correct CAA telephone number to read: ARden 4901.
(2) Page 27 - Dallas, Tex. Correct CAA telephone number to read: FLeetwood 2-1919.
(3) Page 102 - (Ground) Sidney, Nebr. Add VOR rcvr check point: 069°; intersection of the NW/SE and E/W rnwy Municipal Airport.
(4) Page 106 - (Ground) Pueblo, Colo. Add rcvr check point: Location #1 - 254°, NE end of ramp and center taxi strip to runway 26. Location #2 - 253°; NW end of ramp and center taxi strip to runway 08. Location #3 - 252°; at terminal, center parking space in cross line.

AIRMAN'S GUIDE CORRECTIONS: Vol 11, No. 16 (Oct. 16, 1956) - Page 10 - Under Non-Standard Holding Patterns, (1), (2) and (3) delete word "INTSXN". (30 Oct 1956)

✓ AERONAUTICAL CHARTS OF THE U.S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Grand Canyon	San Diego Local	WAC 364
Grand Junction	San Francisco Local	WAC 404
Mt. Shasta	WAC 136	RC 2214
Sacramento	WAC 362	3073
Los Angeles Local	WAC 363	

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE - Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.
BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd. Racing is done on Sun only. (9-28)
BIRMINGHAM-RADIO: Aug 20, VOR shut down - relctn. Will be recmsnd about Dec 13 at lat 33-40-11, long 86-53-58, about 10 n mi NW Birmingham Mun Arpt. (8-30)
BIRMINGHAM ARPT: Caution - tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9)
**DOTHAN ARPT: 154'(469.7'MSL) lgtd rdo twr erected 4.0 n mi E (110°T) at lat 31-13-02, long 85-23-32. (10-5)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.
HUNTSVILLE-RADIO: VOR radials 005°-030° unusable due to roughness and bends. (5-11)
MONTGOMERY-DANNELLY FLD-TOWER: October 17, ILS glide slope, MM and LMM shut down until approx January 1 - relctn. Lclzr, OM and LOM will remain in opern. FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft lndg and taking-off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. E/W rnwy clsd to all military acft-const. Easternmost 5000' avail. days, easternmost 6000' avail sunset-sunrise to civil acft. Western end mrkd by flags-days, lgts-nights. (5-15)
MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends. (4-22)
ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)
FORT HUACHUCA-SPECIAL NOTICE: Restricted Area (R-181) in use daily until Dec 15, 1956 - artillery firing and drone flying. (9-10)
GILA BEND-SPECIAL NOTICE: Captive balloons anchored on 1500' cables will be flown 1100 Mon thru 1100 Fri on 24 hr basis at Dateland and Gila Bend Aux AFB. Lgtd by one red lgt ngts. Extreme caution advised at low alts near these locations. (8-23)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial. (8-23)

CALIFORNIA: AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys
BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300°, 20 n mi 300°-320°, 35 n mi 345°-015° at MEA. (8-20)
BURBANK-LOCKHEED AIR TERMINAL-TOWER: About Nov 1, rcvr 122.5 mc will be replaced with 122.7 mc. (10-12)
CAMARILLO-RADIO: All courses have multiples. (6-17)
CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.
DAGGETT-RADIO: VOR flgt-checked on arwy radials only.
DIXON ARPT: Closed. (8-30)
**DOS PALOS-EAGLE ARPT: Runway lgts discontd. (10-15)
ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.
FAIRFIELD-SUISUN ARPT: Unattended - no fuel available. (8-30)
FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi a 11,000'; 280°-320°, 26 n mi at 11,000'. About Nov 10, VOR will be shut down until approx Dec 10. During that period, the following arwys will not be usable: V-107 LAX-MARICOPA Int; V-209 LAX-Int FIM 296° SBA 013°; V-12 SBA-Saugus Int. (10-15)
FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.
FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.
FRESNO AIR TERMINAL-TOWER: Aug 13, lclzr and glide slope shut down - until approx. Feb 1, 1957 - relctn. (10-8) FLD:Exercise extreme caution in vcnty, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Extensive const and hvy equip. both ends rnwy 11-29, apch areas and adj taxiways. First 250' rnwy 11 clsd - usable length 6750'. Extreme caution apch end rnwy 11, large equip. working in rnwy extension area. (7-5)
**FRESNO-SIERRA SKY PARK ARPT: Attended 24 hr., 80/87 oct fuel, flares prior request.
**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)
KLAMATH-McBETH ARPT: Closed (6-13)
LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340° 7000'; 340°-040°, 12,000';040-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)
LONG BEACH ARPT-TOWER: ILS glide slope subject to indef shutdown periods during arpt const. (8-18)
LONG BEACH ARPT: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd const. 6200' rnwy 30 avail lndgs and tk-offs. Rnwy 12 clsd. (6-27) About Nov 16, neon apch lgt lane will be decmsnd. Three SE neon lgts scheduled for Oct 12 decmsnd will continue operg until Nov 16.

CALIFORNIA: LOS ANGELES-RADIO-SPECIAL NOTICE: July 3, transcribed weather bdcasts oper test basis. Hrs opern: 0800-1800. Manual bdcast continues on VOR and both VOR & LF combined. (7-16)
LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (7-16) Soon VOR will be shut down until approx Nov 22. During this period the following arwys will not be usable: V-23 Long Beach-White Oaks Int; V-16 Ontario-Los Angeles; V-107, 209 Fillmore-Los Angeles; V-201 Corbina Int-Berry Int; V-210 Daggett-Los Angeles. (10-19)
LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx.4000' W of Sepulveda Blvd open VFR tfc only. Equip. on and adj to const areas. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL, approx the intersection of the extended centerlines of the above rnwys with the shore line. Acft proceeding E-bound from Malibu Intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LF rng and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10) Effec Nov 5, hi-intensity appch lgts rnwy 25 L will be converted from slope line sys to centerline sys configuration A. No interruption to service xcpt green threshold lgts of slope line sys intermittently inop durg conversion. (10-17)
LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700.
NATIONAL CITY ARPT: Extensive const around arpt. 75' obstns E end of rnwy. (7-19)
OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling obstructions of less than 1500 ft will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.
OAKLAND-RADIO-SPECIAL NOTICE: Effect. Sept 1, military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)
OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.
OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and landings at Oakland, San Francisco and Sacramento, as depicted on approach plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emergency only.
OAKLAND INTN'L ARPT: Dredging and clam shell equip working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within thie area.
OCEANSIDE-RADIO: Oct 15, VOR flgt-checked, opern normal. VOR coverage: restricted to 35 n mi 310° to 020°. (10-24)
ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000; 350°-360°, 35 n mi at 13,000'. (7-30)
ONTARIO INTN'L ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as mrkd by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th fighter interceptor acft. Due to non-visibility twr unable to ctl tfc on on ANG ramp and taxiway leading to ANG hangar area. (7-16)
OXNARD AFB-RADIO: USAF VHF/DF unreliable below 12,000' within 50 n mi. (4-20)
PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)
PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.

[redacted]: **PETALUMA-SKY RANCH ARPT: Unicom. (10-11)
RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'.(6-30)
**RINCON-LAZY H SKY RANCH ARPT: Closed to public n avail. only on written permission of owner. (10-20)
**SACRAMENTO ARPT: 553' (574'MSL) antenna twr erected 4.4 n mi N (008°T) at lat 38-35-16, long. 121-29-22. (7-6) Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather.
SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.
**SAN BERNARDINO ARPT: Only one rnwy avail - (11-29) 4600' unpaved. (10-10)
SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads except 20 mi MEA from 310° to 330°. (9-17)
SAN DIEGO-LINDBERGH FLD: 500' W end rnwy 9-27 clsd - jet barrier. (2-29)
SAN FRANCISCO: See Oakland Control Zone Notam.
SAN FRANCISCO-RADIO SPECIAL NOTICE: Acft not on IFR flight plan and not desiring IFR approach, requested to make initial call to San Grancisco Tower, freq 119.1 mc.(7-25)
